2016 Tide Tables are here!

Marina News

IMPORTANT REMINDER ⟶ The dredge begins in ONLY **2 months**, so– if your vessel has no means of propulsion, you need to either **repair the boat**, or to arrange in advance for a short-notice tow **out of** then later, **back into** your slip. ***We will not be moving your vessel***, as we do not have the staff or time available to accomplish this demanding task. We have information in the office on tow providers– but, per your berth license agreement, your boat must be running and seaworthy.

Vessel Registration: The Brisbane Marina AND State of California require that your boat be currently registered. One need only walk the docks to see the **large numbers of vessels with expired California CF numbers**. Our State S.A.V.E. grant, which pays for the removal of sunken and derelict boats, is funded from these fees. The grant program administrator has indicated that if they make a site visit and discover that our Marina has a large number of boats that are NOT registered as required, we **can lose our grant** monies. SO– **Brisbane Police will come to the docks to issue registration CITATIONS to those vessels with expired CF numbers in May.**
You should immediately re-register if your boat's tags are expired! Bring us a copy.

WiFi News: The installers are meeting with me in the first week of April to finalize details, the repeaters are in and we should have very good (25 mbps) coverage. We will post passwords and the network name in our office.

Michael Hahn
Harbormaster

Thank you!

Dr. Arnold Goldschlager purchased an AED (automatic external defibrillator) device and has placed it in the SPYC clubhouse. He provided a training session open to anyone interested, and Teresa C. from our office attended.

We want to THANK the good Doctor for his thoughtfulness– these devices save lives!
