WELCOME TO PENINSULA CLEAN ENERGY

Here's What You Should Know

Peninsula Clean Energy (PCE) is San Mateo County's official electricity provider and offers residents cleaner electricity at lower rates.

LOWER RATES

Peninsula Clean Energy's ECOplus saves you 5% on the electricity generation portion of your bill. CARE and medical baseline customers automatically stay in these programs **and** enjoy this savings.

INVESTING IN OUR COMMUNITY

Savings go back in your pocket. If you have solar, you'll receive a 1¢/kWh premium for the local electricity you sell back to the grid.

LOCAL CONTROL

PCE is a public agency launched by San Mateo County and all 20 of its cities to meet local climate action goals through cleaner energy.

GREENER CHOICES

Customers are automatically enrolled in ECOplus, and you can opt up to ECO100 via phone or online. Residential and commercial customers will be enrolled by May 2017.* PCE offers two clean energy choices:

ECOplus PENINSULA CLEAN ENERGY — 50% renewable energy, 75% greenhouse gas free

OR

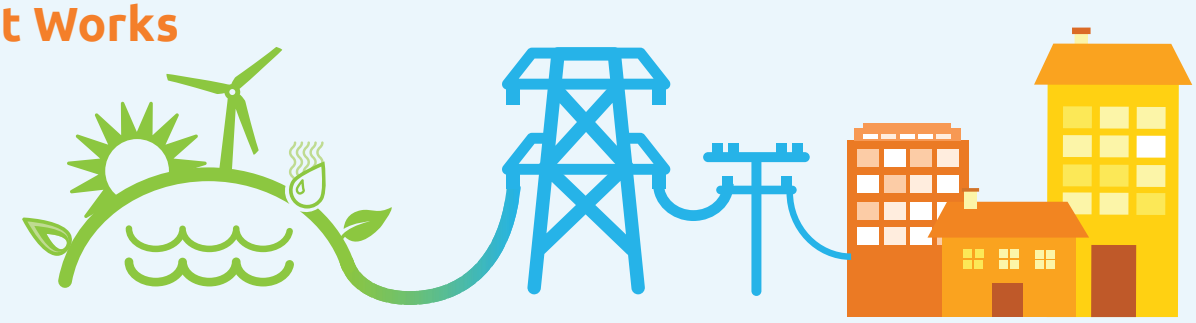
ECO100 PENINSULA CLEAN ENERGY — 100% renewable energy for a small premium

REDUCING GREENHOUSE GASES

Help secure the future of our children by reducing the risks of climate change.

* Net metering customers are enrolled after their PG&E true-up date through September 2017.

How It Works



RENEWABLE ENERGY
Electric Generation
Peninsula Clean Energy

Peninsula Clean Energy purchases electricity on your behalf according to your preference for 50% or 100% renewable energy.

SAME RELIABLE SERVICE
Electric Delivery and Billing
PG&E

PG&E still maintains the wires and sends you one single bill. PCE ECOplus customers will see about a 5% savings on electricity generation.

YOUR COMMUNITY CHOICE
Cleaner Energy, Lower Rates
You

You get choices! If you want ECOplus, you don't have to do anything. CARE and medical baseline customers automatically continue receiving their discounts.
