Scheduled Water Shutdown

The City of Brisbane Public Works Department will be turning off the water to the following areas on **Wednesday, March 6, 2013 from 9:00 PM to 1:00 AM** in order to make necessary improvements to the local water mains:

101 – 163 Visitacion Ave.
132 – 184 Visitacion Ave.

Notices have been hand delivered to all the addresses affected by the temporary water shut down.

If you have to leave your business or residence after the water has been turned off, please ensure that all your faucets and fixtures are off to prevent the possibility of flooding when the water main is turned back on.

After the water is turned on, you may initially notice some discoloration in your water. This is normal and not a water quality problem. Turn your cold water on for several minutes until it runs clear, and then resume normal use.

If you have any other questions regarding this shutdown, please call Jerry Flanagan in the Public Works Department at 415.508.2130. We apologize ahead for any inconvenience this may cause you.
