Subject: Baylands Education Study

Hi Ingrid,

Sorry to miss the city council meeting tonight because of travel but wanted to express my support for the Baylands study that will evaluate the education opportunities for the children and future children of Brisbane. I feel the more data we can collect will inform better decisions for the Baylands development. I know the school zones can be a tricky subject so let's do our best to get the information needed to support the school systems and budgets that potentially will be effected.

Best,

//Alex
