Subject: Support of Educational Study

To: "Padilla, Ingrid"

Dear Brisbane City Council Members,

I am writing in support of the Educational Study that will explore possible school district configurations. I am aware that a new school will need to be built to accommodate the growth in population that will result from the Baylands development. It has been brought to my attention that the land is located in the Bayshore school district and that the Brisbane school district will not benefit from the millions of new tax dollars that will be generated from the Baylands development. I feel this study is important to determine whether it is feasible to make changes to ensure that the current residents of Brisbane and their children receive the most benefit from the development.

Although I do not currently have children, I would like my family to have the most opportunities and choices possible, if and when the time comes. From what I have learned from more seasoned residents, Brisbane parents have long struggled with the ability to send their kids to a quality high school. Many of them had the financial burden of paying for private school. Others have their children wake in the early hours to catch an hour long bus ride to Pacifica. To have a well rated new high school within our town's borders would be a huge benefit to the all of our residents. This town is currently populated with educated, professional, and involved residents who care deeply about the community. If a new high school were to be built within the Bayshore development, I have no doubt that the residents of this town will ensure that it will provide a state of the art education for our children. At the very least, the steps should be attempted to explore whether all children that reside in Brisbane can benefit from the new changes the Baylands development will bring. This study would be the first step.

I am asking you as a current resident of Brisbane and on behalf of all new residents to come, that you approve this educational study.

Sincerely,

Raymond (My Khai) La
