Brisbane Council Members,

I am writing regarding the Baylands Housing site North of the future Geneva Ave connection to Hwy 101.

Why would any Brisbane voter accept this proposal, with no Open Space, Housing built eight to ten stories high, which would have 18,000 to 20,000 units. Also the consideration of an Annex to San Francisco, setting a precedent that Brisbane is fine with allowing this type of building.

I feel that a better living situation on the Baylands is to spread out the Housing Units on both sides of the future Geneva Ave of the Baylands and giving Open Space throughout the site. This can be a safety net for Brisbane if a Development Agreement is made for all of the Baylands. Then the City of Brisbane has control over what can be done in the Baylands. (Isn't this what we've all been working for the last several decades?)

Please don't let the proposed site be built as it is. Brisbane deserves better.

Thank you for listening,
Lynne Grant
