

***City of Brisbane  
Planning Commission  
Agenda Report***

**TO:** Planning Commission For the Meeting of January 24, 2013

**FROM:** John Swiecki, Community Development Director  
Hal Toppel, City Attorney

**SUBJECT:** Amendment to Grading Ordinance and Section 17.32.110 of the Zoning Ordinance

**Recommendation:**

Approval of Planning Commission Resolution RZ-1-13 recommending to the City Council that the proposed amendment to Section 17.32.220 of the Zoning Ordinance be adopted.

**Environmental Determination:**

The legislative action is categorically exempt under Section 15308 of the CEQA Guidelines as an action being taken by the City to assure the maintenance, restoration, or enhancement of natural resources and for the protection of the environment. Also, the amendment to the Zoning and Grading Ordinances will not, in itself, authorize the performance of any construction work or other modification of the environment.

**Applicable Code Sections:**

Section 15.01.110 of the proposed Grading Ordinance and Section 17.32.110 of the Zoning Ordinance.

**Background and Discussion:**

The City has prepared a comprehensive revision to the Grading Ordinance, as contained in Chapter 15.01 of the Municipal Code. The proposed ordinance is the result of a collaborative effort between the City staff and Mountain Watch and incorporates many comments and suggestions made by Mountain Watch and its legal counsel. Both a redline and clean copy of the proposed ordinance have been included in your packet. The redline copy represents all of the changes that have been made to the Grading Ordinance, as compared to the existing provisions in the Municipal Code.

The Grading Ordinance is part of the City's Building and Construction regulations. Amendments to these regulations are normally adopted by the City Council without prior review and recommendation by the Planning Commission. However, Section 2 of the proposed ordinance (on page 44 of the redline draft and page 43 of the clean draft) is an amendment to Section 17.32.220 of the Zoning Ordinance, which does require a review and recommendation by the Planning Commission. A corresponding amendment to the Grading Ordinance will be made in Section 15.01.110 (on page 9 of the redline and clean drafts). This memo will primarily discuss the proposed changes to the Zoning Ordinance.

The existing language of Section 17.32.220 uniformly requires a permit from the Planning Commission whenever the grading involves more than 250 cubic yards of material, or where more than 50 cubic yards of material will be removed from the site, or where grading is not otherwise approved in connection with issuance of a building permit. This language fails to distinguish between types of grading projects and results in the Commission being involved in grading operations that raise engineering concerns rather than planning issues. Moreover, the existing ordinance fails to articulate the factors that should be taken into account by the Planning Commission in its evaluation of an application for a grading permit, nor does it indicate the findings that need to be made for issuance of the permit. In other words, the existing ordinance can result in the Planning Commission being given the impression they have similar review responsibility of the City Engineer without the professional qualification (i.e., licensure and defined authority per the Professional Engineers Act) or guidance (as specified in the California Building Code) to carry out that responsibility.

The proposed ordinance will amend Section 15.01.110 to clarify that grading permits are only issued by the City Engineer but the application for such permit will be reviewed by the Planning Commission in certain defined circumstances. The quantity limit of 250 cubic yards would still apply, but the project site must be located within certain zoning districts (Brisbane Acres, Southwest Bayshore, Central Brisbane, Northeast Ridge, Northwest Bayshore, or the Quarry), *and* the grading is part of an application for which a land development permit (such as a design permit, PD permit or use permit) is being considered by the Planning Commission.

As a totally separate basis for Planning Commission review, and regardless of the quantity of material to be graded, the application for a grading permit would be reviewed by the Planning Commission if the site is located within the HCP area, *unless* the grading operation is limited to weeding, or clearing and grubbing (as such terms are defined in the ordinance), and such work is being performed pursuant to a site activity approval issued by the HCP Plan Operator.

If a review by the Planning Commission is required by Section 15.01.110.A, the amendment to Section 17.32.220 will now specify the potential impacts that the Commission should consider in making its comments and recommendations to the City Engineer. These potential impacts raise planning and environmental issues that the Commission routinely considers during the course of its review of land development applications under the subdivision and zoning ordinances. In other words, the Commission would be performing its traditional role as the planning agency of the city and not acting as a civil or geotechnical engineer.

Although the Commission is not being asked to review or comment on the revisions to Chapter 15.01, listed below, for information purposes, are some of the other major changes that would be made by the proposed ordinance:

- Specific requirements for revegetation have been added. The term has been defined, a revegetation plan must now be submitted with the application for a grading permit, and specific requirements for submittal and implementation of the revegetation plan have been added as Section 15.01.200.
- The scope of the ordinance has been expanded to include weeding, clearing and grubbing (as defined) and provisions added to make it clear that such activities cannot be performed within the HCP area without a site activity review by the Plan Operator.
- Where grading operations will also be controlled or guided by other regulatory authorities, a reference to such regulations has been added. For example: compliance with "best management practices," as defined in Section 15.01.040(6); compliance with the "HCP," as defined in Section 15.01.040(30); protection of historic or archaeological resources required by CEQA, as addressed in Section 15.01.060; and compliance with the Municipal Regional Permit regulating erosion and sediment control.
- Where a violation of the grading ordinance is determined to have been willful, reckless or grossly negligent, the City would be able to impose a supplemental penalty up to \$10,000 for each violation. This penalty would be in addition to any other remedies available to the City under the general code enforcement provisions contained in Title 1 of the Municipal Code.

John Swiecki,  
Director of Community Development

Section 17.32.220 in Chapter 17.32 of the Municipal Code is amended to read as follows:

**§17.32.220 Grading permit; when review by Planning Commission is required.**

A. Grading permits to be issued by the Director of Public Works/City Engineer pursuant to Chapter 15.01 of this Code shall be subject to review by the Planning Commission when required by the provisions of Subsection 15.01.110.A of this Code. The review shall be based upon a consideration of the following potential impacts of the proposed grading:

- (1) Will the proposed grading be minimized and designed to reflect or fit comfortably with the natural topography?
- (2) Will the proposed grading be designed to avoid large exposed retaining walls?
- (3) Will the proposed grading be designed to minimize removal of:
  - (i) existing street trees, (see Section 12.12.020);
  - (ii) any California Bay Laurel, Coast live Oak or California Buckeye trees;
  - (iii) three or more trees of any species on the same site having a circumference of at least 30 inches measured 24 inches above grade?

Where removal of existing trees is necessary, do the landscape plans for the project include the planting of appropriate replacement trees?

B. The Planning Commission may provide comments and recommendations to the City Engineer concerning mitigation or avoidance of any potential adverse impacts of the proposed grading considered by the Commission pursuant to this Section.

RESOLUTION NO. RZ-1-13

RESOLUTION OF THE PLANNING COMMISSION OF THE CITY OF BRISBANE  
RECOMMENDING TO THE CITY COUNCIL THE ADOPTION OF ZONING TEXT  
AMENDMENT RZ 1-13, TO AMEND TITLE 17, SECTION 17.32.220 OF THE ZONING  
ORDINANCE PERTAINING TO GRADING

WHEREAS, a proposed amendment to Section 17.32.220 has been presented to the Planning Commission, being part of Ordinance No. 579 amending Chapter 15.01 of the Municipal Code pertaining to grading; and

WHEREAS, on January 24, 2013, the Planning Commission conducted a public hearing on the proposed amendment, at which time any person interested in the matter was given an opportunity to be heard; and

WHEREAS, the Planning Commission reviewed and considered the staff report describing the proposed amendment and the written and oral evidence presented to the Planning Commission in support of and in opposition to the amendment; and

WHEREAS, the Planning Commission finds that the proposed project to amend the Municipal Code is categorically exempt from environmental review under Section 15308 of the CEQA Guidelines; and

WHEREAS, the Planning Commission hereby finds that the proposed Zoning Text Amendment is consistent with the 1994 General Plan, specifically Land Use Policies #18 and 22, which encourage grading options which minimize grading and limit transformation of the landform and direct that clear performance standards be established for the physical character of land use developments.

NOW, THEREFORE, BE IT RESOLVED, that based on the above findings, the Planning Commission hereby recommends approval of the Categorical Exemption and adoption of Zoning Text Amendment RZ-1-13 to the City Council.

---

Jameel Munir, Chairman

I hereby certify that the foregoing Resolution No. RZ-1-13 was duly and regularly passed and adopted by the Brisbane Planning Commission at a regular meeting thereof held on January 24, 2013, by the following roll call vote:

AYES:  
NOES:

H-1.5

ORDINANCE NO. ~~\_\_\_\_\_~~ **579**

AN ORDINANCE OF THE CITY OF BRISBANE  
AMENDING CHAPTER 15.01 AND SECTION 17.32.220  
OF THE MUNICIPAL CODE PERTAINING TO GRADING

The City Council of the City of Brisbane hereby ordains as follows:

**SECTION 1:** Chapter 15.01 of the Municipal Code, entitled "Grading," is amended in its entirety to read as follows:

Chapter 15.01  
GRADING

Sections:

15.01.010	Title
15.01.020	Purpose <u>and objectives</u>
15.01.030	Scope
15.01.040	Definitions
15.01.050	Precautions imposed by City Engineer
15.01.060	<u>Discovery of prehistoric, historic, or unique archaeological resources, or human remains</u>
15.01.07 <del>60</del>	Other laws
15.01.08 <del>70</del>	Severability and validity
15.01.09 <del>80</del>	Permit required
<u>15.01.100</u>	<u>HCP Permission required</u>
15.01.110 <del>84</del>	Planning Commission <del>approval</del> <u>review of application for grading permit</u>
15.01.120 <del>82</del>	Quarry operations
15.01.130 <del>83</del>	Application to annexed territory
15.01.140 <del>84</del>	Exemptions
15.01.150 <del>90</del>	Application <u>for grading permit</u>
15.01.160 <del>94</del>	Application form
15.01.170 <del>92</del>	Site map and grading plan
15.01.180 <del>93</del>	Interim erosion and sediment control plan (interim plan)
15.01.190 <del>94</del>	Final erosion and sediment control plan (final plan)
<u>15.01.200</u>	<u>Revegetation plan</u>
15.01.210 <del>95</del>	Soils engineering report (soils report)
15.01.220 <del>96</del>	Engineering geology report
15.01.230 <del>97</del>	Work schedule and transport routes
15.01.240 <del>98</del>	Security
15.01.250 <del>00</del>	Fees
15.01.260 <del>05</del>	Grading permit fee exemption

15.01.11270	Action on application
15.01.1280	Permit duration
15.01.13290	Appeals
15.01.14300	Revised plans
15.01.15310	Cessation of operations
15.01.16320	Assignment of permit
15.01.17330	No improvements planned
15.01.18340	Grading permit, paving
15.01.19350	Grading permit, drainageway alteration
15.01.20360	Excavation blasting permit
15.01.23705	Truck haul permit
15.01.24380	Issuance of grading permits
15.01.22390	Time and noise limitations on grading operations
15.01.23400	Implementation of permits - permittee's duties
15.01.2410	Implementation of permits – <u>requirements of City Engineer</u>
15.01.4250	Grading inspection
15.01.255430	Completion of work
15.01.26440	Removal of ground cover
15.01.27450	Wet season grading
15.01.28460	Cuts
15.01.29470	Fills
15.01.30480	Setbacks
15.01.31490	Drainage and terracing
15.01.32500	Import and export of earth material
15.01.33510	<del>Site</del> Dust control
15.01.34520	Protection of adjoining property
15.01.3530	Removal of hazards
15.01.36540	Post-grading procedures
15.01.37550	Revocation or suspension of permits
15.01.38560	Violation – penalties
15.01.39570	Action against the security
15.01.39580	Public nuisance abatement
15.01.45909	Release of security
15.01.44600	Cumulative enforcement procedures

**§15.01.010 Title**

This Chapter shall be known as the "City of Brisbane Grading Ordinance" and may be so cited.

**§15.01.020 Purpose and objectives**

A. The purpose of this Chapter is to provide for grading operations; to safeguard life, limb, health, property and public welfare; and to preserve and enhance the natural environment, including but not limited to water quality, by regulating and controlling clearing and grading of property within the City.

B. This Chapter is intended to achieve the following objectives:

- (1) Grading plans shall be designed so that grading operations do not create or contribute to landslides, accelerated soil creep, settlement, subsidence, or hazards associated with strong ground motion and soil liquefaction.
- (2) Grading plans shall contain reasonable provisions for the preservation of natural land and water features, vegetation, drainage, and other indigenous features of the site.
- (3) Grading plans shall be designed to preserve and enhance the city's aesthetic character.
- (4) Grading plans shall require compliance with all applicable laws, rules and regulations pertaining to air and water pollution, noise control, and preservation of archaeological remains.
- (5) Grading operations shall be conducted so as to expose the smallest practical area of soil to erosion for the least possible time, consistent with an anticipated build-out schedule.

**§15.01.030 Scope.**

A. This Chapter amends Chapter 70 of the Uniform Building Code by the addition thereto of the regulations pertaining to grading as set forth in the California Building Standards Code, as adopted in Chapter 15.04 of this Code. In the event of any conflict or inconsistency between the provisions of this Chapter and the provisions of Chapter 15.04 or any of the codes adopted by reference therein, the provisions of this Chapter shall be controlling.

B. This Chapter and sets forth rules and regulations to control excavation, land disturbances, land fill, and soil storage, and erosion and sedimentation resulting from such activities. This Chapter provides that all excavation or landfilling activities or soil storage shall be undertaken in a manner designed to minimize surface runoff, erosion, and sedimentation and to avoid or mitigate damage caused by grading activities to areas having habitat value. This Chapter also establishes procedures for the issuance, administration and enforcement of grading permits.

**§15.01.040 Definitions**

When used in this Chapter, the following words shall have the meanings ascribed to them in this ~~chapter~~ Section:

- (1) "Applicant" means any person, corporation, partnership, association of any type, public agency or any other legal entity that submits an application to the City Engineer for a permit pursuant to this chapter.

- ~~(2)~~ "As-graded" means the surface conditions extant on completion of grading.
- (3). "BAAQMD CEQA Guidelines" means the recommended measures detailed in Table 8-1 of the Bay Area Air Quality Management District's "California Environmental Quality Act-Air Quality Guidelines, Updated May 2011", and any additional measures, including those recommended in Table 8-2 of the reference, as determined necessary and appropriate by the City Engineer.
- ~~(4)~~3. "Bedrock" means in-place solid rock.
- ~~(5)~~4. "Bench" means a relatively level step excavated into earth material. Bench also includes terraces.
- ~~(6)~~5. "Best management practices" **(BMPs)** means a technique or series of techniques which, when used in an erosion control plan, is proven to be effective in controlling construction-related runoff, erosion and sedimentation. Approved BMPs can be found in the California Stormwater Quality Association "Construction BMP Handbook/Portal", the State of California Department of Transportation March 2003 "Construction Site Best Management Practices (BMPs) Manual", the San Mateo Countywide Water Pollution Prevention Program Construction Best Management Practices" plan sheet, Erosion & Sediment Control Handbook, by Goldman, Jackson and Bursztynsky, and any amendment, revision or reissuance thereof.
- ~~(7)~~6. "Borrow" means earth material acquired from an off-site location for use in grading on a site.
- ~~(8)~~7. "City" means the city of Brisbane.
- ~~(9)~~8. "City Engineer" means the Director of Public Works/City Engineer of the City of Brisbane and his/her duly authorized designees. The City Engineer may delegate any of his or her duties under this Chapter to his or her authorized agents or representatives.
- ~~(10)~~9. "City street" means any public or private street in the city of Brisbane.
- ~~(11)~~0. "Civil engineer" means a professional engineer registered in the state of California to practice in the field of civil engineering.
- ~~(12)~~1. "Civil engineering" means the application of the knowledge of the forces of nature, principles of mechanics and the properties of materials to the evaluation, design and construction of civil works for the beneficial uses of humankind.
- (13) Clearing and grubbing means the removal of trees, shrubs, bushes, windfalls and all other materials from above and below the natural ground surface. This activity removes vegetative ground cover, removes top soil, and removes/disturbs root mat.

(14) Community Development Director means the director of planning of the City of Brisbane.

~~(152)~~: **"Compaction"** means the densification of a fill by mechanical means.

~~(163)~~: **"Contour rounding"** means the rounding of cut and fill slopes in the horizontal and/or vertical planes to blend with existing contours or to provide horizontal variation, to eliminate the artificial appearance of slopes. (See Figure 1)

~~(174)~~: **"Drainageway"** means natural or manmade channel ~~which~~ that collects and intermittently or continuously conveys stormwater runoff.

~~(185)~~: **"Dry season"** means the period from April 15th to October 15th.

~~(196)~~: **"Earth material"** means any rock, natural soil, fill or combination thereof.

~~(2017)~~: **"Engineering geologist"** means a geologist experienced and knowledgeable in engineering geology and qualified to practice engineering geology in the State of California.

~~(2118)~~: **"Engineering geology"** means the application of geologic knowledge and principles in the investigation and evaluation of naturally occurring rock and soil for use in the design of civil works.

~~(2219)~~: **"Erosion"** means the wearing away of the ground surface as a result of the movement of wind or water.

~~(230)~~: **"Excavation"** means any act by which earth, sand, gravel, rock or any other similar material is cut into, dug, quarried, uncovered, removed, displaced, relocated, or bulldozed, including the conditions resulting therefrom.

~~(241)~~: **"Fill/land fill"** means any act by which earth, sand, gravel, rock or any other similar material is deposited, placed, pushed, pulled or transported to a place other than the place from which it was excavated, including the conditions resulting therefrom.

~~(252)~~: **"Final erosion and sediment control plan (final plan)"** means a set of best management practices or equivalent measures designed to control surface runoff and erosion and to retain sediment on a particular site after all other planned final structures and permanent improvements have been erected or installed.

(26) General Plan means the General Plan adopted by the City of Brisbane and all amendments thereto.

~~(273)~~: **"Grade"** means the vertical location of the ground surface.

(a)- **"Existing grade"** means the grade prior to grading.

(b)- **"Rough grade"** means the stage at which the grade approximately conforms to the approved plan.

(c)- **"Finish grade"** means the final grade of the site which conforms to the approved plan.

(284)- **"Grading"** means any land disturbance or excavation or fill or any combination thereof and shall include the conditions resulting from any land disturbance, excavation or fill. Grading shall include trenching on public or private property including within public streets.

(295)- **"Grading permit"** means the formal approval required by this Chapter for any grading, filling, excavating, storage or disposal of soil or earth materials or any other excavation or land filling activity. Application to the City Engineer and the City Engineer's approval is required under the process of this Chapter.

(30) HCP means the San Bruno Mountain Area Habitat Conservation Plan, as approved and adopted by the U.S. Fish and Wildlife Service in 1983, including subsequent amendments.

(31)26. **"Interim erosion and sediment control plan (interim plan)"** means a set of best management practices or equivalent measures designed to control surface runoff and erosion and to retain sediment on a particular site during the period in which construction-related excavations, fills and soil storage occur, and before the final plan is completed.

(32)27. **"Key"** means a designed compacted fill placed in a trench excavated in earth material beneath the toe of a proposed fill slope.

~~(33)28. **"Manual of standards"** means ABAG Manual of Standards for Surface Runoff Control Measures (Latest Revision).~~

(334)29. **"Permittee"** means the applicant in whose name a valid permit is duly issued pursuant to this Chapter and his/her agents, employees and others acting under his/her direction.

(345) Plan Operator is the Habitat Conservation Plan Manager, presently the San Mateo County Department of Parks, and also means any successor agency.

(356) Revegetation means the replanting of disturbed natural ground surfaces on properties within the HCP and on properties that the Community Development Director has determined requires mitigation to restore habitat value.

- ~~(367)~~30. "Sediment" means earth material deposited by water or wind.
- ~~(378)~~31. "Site" means a parcel or parcels of real property owned by one or more than one person ~~which~~ that is being or is capable of being developed as a single project, including phased construction. Site also includes any public or private property or rights-of-way on which excavation, fill or land disturbance ~~is provided~~ occurs.
- ~~(389)~~32. "Slope" means an inclined ground surface the inclination of which is expressed as a ratio of horizontal distance to vertical distance.
- ~~(4039)~~33. "Soil" means naturally occurring superficial deposits overlying bedrock.
- ~~(401)~~34. "Soils engineer" means a civil engineer experienced and knowledgeable in the practice of soils engineering. Soils engineer and geotechnical engineer are synonymous.
- ~~(412)~~35. "Soils engineering" means the application of the principles of soil mechanics in the investigation, evaluation and design of improvements involving the use of earth materials and the inspection and testing of the construction thereof. Soils engineering and geotechnical engineering are synonymous.
- ~~(423)~~36. "Structure" means anything built or constructed including pavement and pipelines.
- ~~(434)~~37. "Temporary erosion control" consists of, but is not limited to, constructing such facilities and taking such measures as are necessary to prevent, control, and abate water, mud and wind erosion damage to public and private property during grading operations.
- ~~(445)~~38. "Terrace" means a relatively level step constructed in the face of a graded slope surface for drainage and maintenance purposes. Terrace also includes benches.
- ~~(456)~~39. "Truck haul" means the movement over public streets of any excavated material.
- ~~(457)~~40. "Vertical slope rounding" means the rounding of the top and toes of cut and ~~fill~~ slopes.
- ~~(478)~~ Weeding means the removal of noxious, dangerous, or invasive plants. This activity also includes the removal of vegetation which attains such a large growth as to become a fire menace when dry, and further includes the removal of dry grass, grass cuttings, tree trimmings, vines, stubble or other growth material which endangers the public by creating a fire hazard.

including any such hazard determination made by the fire department pursuant to the City's weed abatement ordinance. Any activity that disturbs more than 15% of the natural ground surface shall be classified as "clearing and grubbing."

~~(489)41-~~ "Wet season" means the period from October 15th to April 15th.

#### **§15.01.050 Precautions imposed by City Engineer**

A. If, at any stage of grading, the City Engineer determines by inspection that conditions are such that further work as authorized by an existing grading permit is likely to endanger any property or public way, the City Engineer may require, as a condition to allowing the work to be continued, that reasonable safety precautions be formulated by the permittee and submitted to the City Engineer for his/her consideration and the grading permit be amended to avoid such danger. "Safety precautions" may include but shall not be limited to specifying a flatter exposed slope, construction of additional drainage facilities, berms, terracing, compaction, cribbing, or retaining walls, or planting of slopes.

B. The sole and primary responsibility ~~of for~~ meeting the requirements of this Section and of this Chapter for any civil or criminal liability as a result of the ~~exercise of this performance of grading work pursuant to a grading permit~~ shall be upon the permittee. ~~Neither the City, the City Engineer, its or any employees or agents of the City shall in no way be responsible for said any liability for issuance of a grading permit or the conduct of any inspections thereunder.~~

#### **§15.01.060 Discovery of prehistoric, historic, or unique archaeological resources, or human remains.**

A. In the event of the accidental discovery of prehistoric, historic, or unique archaeological resources, the permittee shall immediately cease work and follow the protocol established in the Guidelines for Implementation of the California Environmental Quality Act, as contained in California Code of Regulations, Title 14, Division 6, Chapter 3 ("CEQA Guidelines"), specifically, Section 15064.5(f) and any amendments thereto. This includes obtaining an evaluation from a qualified archaeologist to be forwarded to the Community Development Director for review/approval, and will include a finding as to the categorization of the discovery, any recommended avoidance measures or appropriate mitigation, and a statement as to what portions of the site, if any, are cleared for resumption of work while the recommended mitigation is being performed. If the find is determined to be significant, contingency funding and a time allotment sufficient to allow for implementation of appropriate mitigation or avoidance measures shall be provided.

B. In the event of the accidental discovery or recognition of any human remains, the permittee shall immediately cease work and implement the protocol established in the CEQA Guidelines, specifically, Section 15064.5(e)(1) et. seq. and any amendment thereto.

**§15.01.0760 Other laws**

Neither this Chapter nor any administrative decision made under it:

A. Exempts the permittee from complying with other applicable laws or from procuring other required permits or complying with the requirements and conditions of such a permit; or

B. Limits the right of any person to maintain, at any time, any appropriate action, at law or in equity, for relief or damages against the permittee arising from the permitted activity; or

C. Exempts any person from complying with any applicable laws or allows any person to perform any grading without complying with such other applicable laws.

**§15.01.0870 Severability and validity**

If any part of this Chapter is found not valid, the remainder shall remain in effect.

**§15.01.0980 Permit required**

Except as exempted under Section 15.01.084140, it shall be unlawful for any person to clear and grub, grade, fill, excavate, store or dispose of soil and earth materials or perform any other excavation or land-filling activity without first obtaining a grading permit as set forth in this Chapter. A separate grading permit shall be required for each site. With respect to subdivisions, a separate permit will be required for each phase of development. The grading permit issued for each site may also cover the utility construction associated with the site provided the required information for the utilities is included with the application. A building permit shall not be issued prior to the issuance of a grading permit, when required.

**§15.01.100 HCP Permission required**

No owner of property within the boundaries of the HCP shall weed, clear and grub, grade, fill, excavate, store, or dispose of soil and earth materials or perform any other excavation or land filling activity without first obtaining permission from the Plan Operator. Permission for the listed activities is presently obtained through submittal of a Site Activity Review Application; no grading permit will be issued by the City for any property within the HCP until the property owner has first complied with the requirements of the Plan Operator.

**§15.01.11081 Planning Commission ~~approval~~ review of application for grading permit**

A. Where a grading permit is required by the provisions of this Chapter, it shall be obtained from issued by the City Engineer following his/her approval of the permit application, except that grading permit approval by the Planning Commission shall be required in the event The permit application shall also be reviewed by the Planning Commission where:

(1) All of the following circumstances are applicable:

- (a) More than two hundred fifty (250) cubic yards of material is to be moved or planned to be moved in any single grading or excavation operation; and
- (b) The parcel or parcels of land on which the grading will be performed is located within any of the following zoning districts as defined by the City's most current Zoning Map: ~~or if more than fifty (50) cubic yards of materials is to be exported from any single parcel of land; or Brisbane Acres, Southwest Bayshore, Central Brisbane, Northeast Ridge, Northwest Bavshore or the Quarry;~~ and
- (c) The grading is being performed as part of a project for which an application for a permit, approval, or other land use entitlement is being considered by the Planning Commission as the approving authority for such application.

(2) Benches or terraces are required in cut and/or fill slopes, in which case landscaping for screening may be required by the City, to soften the visual impact. (See Section 17.32.220.) Grading is to be performed on any parcel of land within the boundaries of the HCP; provided, however, review by the Planning Commission shall not be required if the only grading operation to be conducted is weeding, or clearing and grubbing, where such work is performed pursuant to an HCP site activity approval issued by the Plan Operator.

B. Where Planning Commission review of an application for a grading permit is required by Subsection 15.01.110.A above, the review shall be based upon a consideration of the following potential impacts of the proposed grading:

- (1) Will the proposed grading be minimized and designed to reflect or fit comfortably with the natural topography?
- (2) Will the proposed grading be designed to avoid large exposed retaining walls?
- (3) Will the proposed grading be designed to minimize removal of:
  - (i) existing street trees, (see Section 12.12.020);
  - (ii) any California Bay Laurel, Coast live Oak or California Buckeye trees;

(iii) three or more trees of any species on the same site having a circumference of at least 30 inches measured 24 inches above grade?

Where removal of existing trees is necessary, do the landscape plans for the project include the planting of appropriate replacement trees?

C. The Planning Commission may provide comments and recommendations to the City Engineer concerning mitigation or avoidance of any potential adverse impacts of the proposed grading considered by the Commission pursuant to this Section.

#### **§15.01.12082 Quarry operations**

No grading permit for an excavation shall be issued if the excavation for which a grading permit is required shall involve the operation of a quarry ~~as defined in the zoning ordinance~~, which quarry is otherwise prohibited ~~until a use permit therefor has first been granted pursuant to by~~ the provisions of the Zoning Ordinance of the City.

#### **§15.01.13083 Application to annexed territory**

Activities regulated by this Chapter, whether operative or nonoperative, which are located in territory hereafter annexed to the City shall not operate from and after thirty (30) days following annexation to the City, unless, in the case of operative activities, or before recommencement of operations in the case of inoperative activities, a grading permit shall have been granted as provided herein.

#### **§15.01.14084 Exemptions**

A grading permit shall not be required in the following instances:

A. Exploratory excavations and trenches under the direction of a soils engineer or engineering geologist, provided ~~all that these~~ excavations and trenches comply with all of the following:

(1) All earth material removed from the trenches or excavations that is not completely removed from the project site must be stored in a manner that prevents erosion, sedimentation, off-site migration, and smothering of natural vegetative ground cover;

(2) All trenches and excavations are properly backfilled;

(3) All ~~such~~ excavations and trenches are subject to the applicable sections of Title 8 of the State Safety Order, Division of Industrial Safety.

B. An excavation which does not exceed five (5) cubic yards on any one site and is less than two (2) feet in vertical depth and which does not create a cut slope steeper than

two feet horizontal to one vertical (2:1). Such excavation, however, is not exempt from the requirements of Sections 15.01.~~340180~~ and 15.01.~~350190~~.

C. A fill less than one foot in depth placed on natural grade with a slope flatter than five horizontal to one vertical (5:1), which does not exceed five (5) cubic yards on any one site and does not obstruct a drainageway. Such fill, however, is not exempt from the requirements of Section 15.01.~~340180~~.

D. Grading in connection with dredging operations in San Francisco Bay for which approval for such grading has been granted by the City under other permits or agreements.

E. Grading in connection with the operation of salvage, garbage and disposal dumps for which approval for such grading has been granted by the City under other permits or agreements.

F. Emergencies posing an immediate danger to life or property, or substantial flood or fire hazards, or interruption of utility services to the public, in which case a permit shall be obtained as soon as possible.

G. Excavation by public utilities in connection with the placement of facilities, including repair and maintenance of local utility distribution and service utilities, if such excavation is authorized by a valid street encroachment permit.

**§15.01.150~~00~~ Application for grading permit**

The application for a grading permit shall be in writing and filed with the City Engineer in duplicate and must include all of the following items, unless otherwise waived by the eCity eEngineer:

- A. Application form;
- B. Site map and grading plan;
- C. Interim erosion and sediment control plan;
- D. Final erosion and sediment control plan;
- E. Revegetation plan;
- FE. Soils engineering report;
- GF. Engineering geology report;
- HG. Work schedule and transportation routes;
- IH. Security;

J. Fees;

K. Confirmation of the proposed recycling or reuse of all rocks, soils, tree remains, trees and other vegetative matter resulting from the grading operations, which shall be satisfied by providing a copy of the Recycling and Diversion of Debris permit issued by the Building Department pursuant to Chapter 15.75 of this Code.

L. Any other material required by the City Engineer.

#### **§15.01.16091 Application form**

The following information is required on the application form unless waived or modified by the City Engineer:

A. Name, address and telephone number of the applicant;

B. Names, addresses and telephone numbers of any and all contractors, subcontractors or persons actually doing the excavating and land-filling activities and their respective tasks;

C. Name(s), address(es) and telephone number(s) of the person(s) responsible for the preparation of the site map and grading plan;

D. Names(s), address(es) and telephone number(s) of the person(s) responsible for the preparation of the interim and/or final erosion and sediment control plan, and the revegetation plan;

E. Name, address and telephone number of the soils engineer and/or the engineering geologist responsible for the preparation of the soils and engineering geology reports;

F. A vicinity map showing the location of the site in relationship to the surrounding area's watercourses, water bodies and other significant geographic features, and roads and other significant structures;

G. Date of the application;

H. Title report confirming ownership;

I. Signature(s) of the owner(s) of the site or of an authorized representative.

#### **§15.01.17092 Site map and grading plan**

The site map and grading plan shall contain all the following information unless waived or modified by the eCity eEngineer:

A. Plan views and cross sections showing the existing and proposed topography of the site. The plan view shall show contours at an interval sufficiently detailed to define the topography over the entire site. The minimum contour interval shall be two feet where ground slope is less than fifteen (15) percent and five (5) feet where ground slope exceeds fifteen (15) percent;

B. Two contour intervals off-site and extension of the on-site contours a minimum of one hundred (100) feet off-site, and sufficient to show on and off-site drainage;

C. An accurate plat plan drawn by a registered civil engineer or licensed land surveyor showing the site's exterior boundaries in true location with respect to the plan's topographic information, all easements, boundaries of the "Habitat Conservation Plan" area, special districts, and any other pertinent information;

D. Location and graphic representation of all existing and proposed natural and manmade drainage facilities;

E. Detailed plans of all surface and subsurface drainage devices, walls, cribbing, dams and other protective devices to be constructed with, or as a part of the proposed work, together with a map showing the drainage area and the estimated runoff of the area served by any drain;

F. Location and graphic representation of proposed excavation and fills, of on-site storage of soil and other earthen material, and of on-site disposal of soil and other earthen material;

G. Location of existing vegetation types and the location and type of vegetation to be left undisturbed;

H. Location of proposed final surface runoff, and of erosion and sediment control measures;

I. Quantity of soil or earthen materials in cubic yards to be excavated, filled, stored or otherwise removed from or utilized on-site;

J. Location of any buildings or structures on the property where the work is to be performed and the location of any buildings or structures on land of adjacent owners which are within fifteen (15) feet of the property or which may be affected by the proposed grading operations;

K. Location and slope of proposed streets and driveways. Driveways shall not exceed a centerline slope of twenty (20) percent and, unless specifically approved by the City Engineer, streets shall not exceed a centerline slope of fifteen (15) percent.

**§15.01.18003 Interim erosion and sediment control plan (interim plan)**

A. An interim plan containing all of the following information shall be provided with respect to conditions existing on the site during excavation or filling activities or soil

storage and before the final plan is completed; furthermore, the plan submitted shall demonstrate compliance with the requirements of the Municipal Regional Permit, as defined in Section 13.06.040:

~~(1)A.~~ The location and amount of runoff discharging from the site, calculated using a method approved by the eCity eEngineer;

~~(2)B.~~ A delineation and brief description of the measures to be undertaken to control erosion caused by surface runoff and by wind and to retain sediment on the site including, but not limited to, the design and specifications for berms and sediment detention basins, types and method of applying mulches, the design and specifications for diverters, dikes and drains, seeding methods, the type, location and extent of pre-existing and undisturbed vegetation types, and a schedule for maintenance and upkeep.

B. The location of all the measures listed by the applicant under subsection ~~A(2)(B)~~ above shall be depicted on the site map and grading plan, or on a separate plan, at the discretion of the City Engineer.

C. An estimate of the cost of implementing and maintaining all interim erosion and sediment control measures shall be submitted in a form acceptable to the City Engineer.

D. The applicant may propose the use of any erosion and sediment control techniques in the interim plan provided such techniques are proven to be as or more effective than the equivalent best management practices contained in the manual of standards.

#### **§15.01.~~19094~~ Final erosion and sediment control plan (final plan)**

A. A final plan containing all of the following information shall be provided with respect to conditions existing on the site after final structures and improvements (except those required under this section) have been completed; furthermore, the plan submitted shall demonstrate compliance with the requirements of the Municipal Regional Permit, as defined in Section 13.06.040:

~~(1)A.~~ The location and amount of runoff discharging from the site, calculated using a method approved by the City Engineer;

~~(2)B.~~ A description of and specifications for sediment retention devices;

~~(3)C.~~ A description of and specifications for surface runoff and wind erosion control devices;

~~(4)D.~~ A description of vegetative measures;

~~(5)E.~~ A graphic representation of the location of all items in subsections B through D above, and items A through K in 15.01.~~17092~~ above.

B. An estimate of the costs of implementing all final erosion and sediment control measures must be submitted in a form acceptable to the City Engineer.

C. The applicant may propose the use of any erosion and sediment control techniques in the final plan provided such techniques are proven to be as or more effective than the equivalent best management practices contained in the manual of standards.

#### §15.01.200 Revegetation plan

A revegetation plan is designed to effectively mitigate impacts to the site's habitat values by restoring or replacing native vegetation to the maximum extent practical and reasonable to achieve. Sites subject to revegetation requirements shall submit a plan to replant and maintain disturbed surfaces for review and approval by the City Engineer and Community Development Director in accordance with the following:

A. Topsoil removed from the surface shall be stored on or near the site and protected from soil loss while the work is underway. Such storage shall not cause damage to root systems of onsite trees intended to be preserved.

B. Mulching, seeding, planting of groundcover, shrubs or trees, or other suitable stabilization measures shall be used to protect exposed soil, to minimize soil loss, and to maximize slope stability. Use of drought tolerant native plant species that are fire resistant is encouraged. Use of plant species identified as invasive in the most current HCP Vegetation Management Activities Report is prohibited, whether or not the project site is within the boundaries of the HCP.

C. The City Engineer may require the permittee to monitor revegetation for a period up to five years, to provide reports of such monitoring to the City Planning Department, to allow for third-party assessment of the success of the revegetation at the applicant's expense, and to provide security to correct, complete, or remediate the approved revegetation plan. The City Engineer and the Community Development Director shall each retain discretion as to whether the approved revegetation plan has been successfully implemented.

D. Onsite mitigation is preferred. In the event that the Community Development Director determines that adequate mitigation can not be reasonably achieved onsite, the City may approve an offsite revegetation plan to achieve the goals of restoring habitat value. Such offsite mitigation shall comply with the provisions of this Chapter that govern onsite mitigation.

E. For sites located within the HCP, the City may impose restoration/revegetation requirements in addition to those required by the Plan Operator, so long as a reasonable rationale is provided for the additional requirements. A decision to require more stringent measures may be based upon the biological features of the site, for example, if the site is an existing or potential wildlife corridor or part of a buffer zone between developed areas and existing habitat, or if the site has particular geological features, such as potential for erosion or susceptibility to seismic hazards.

**§15.01.21095 Soils engineering report (soils report)**

A. A soils report, when required by the City Engineer, is to be prepared by an approved soils engineer and shall be based on adequate and necessary test borings, and shall contain all the following information, in addition to the minimum applicable requirements ~~of Chapter 70~~ of the latest edition of the California Building Code adopted by the City ~~of the Uniform Building Code~~:

- ~~(1)A.~~ Data regarding the nature, distribution, strength, and erodibility of existing soils;
- ~~(2)B.~~ Data regarding the nature, distribution, strength and erodibility of soil to be placed on the site, if any;
- ~~(3)C.~~ Conclusions and recommendations for grading procedures;
- ~~(4)D.~~ Conclusions and recommended designs for soil stabilization for interim conditions and after construction is completed;
- ~~(5)E.~~ Design criteria for corrective measures when necessary;
- ~~(6)F.~~ Foundation and pavement design criteria when necessary;
- ~~(7)G.~~ Opinions and recommendations covering suitability of the site for the proposed uses;
- ~~(8)H.~~ Other recommendations, as necessary, commensurate with the project grading and development.

B. Recommendations included in the report and approved by the City Engineer shall be incorporated in the grading plan.

C. Whenever a soils engineering report is required, the final submitted grading plans shall include a review letter from the soils engineer confirming that his/her recommendations have been incorporated into the plans.

**§15.01.22096 Engineering geology report**

A. An engineering geology report, when required by the ~~e~~City ~~e~~Engineer, is to be prepared by a qualified engineering geologist and shall be based on adequate and necessary test borings and shall contain the following information, in addition to the minimum applicable requirements ~~of Chapter 70~~ of the latest edition of the California Building Code adopted by the City ~~of the Uniform Building Code~~:

- ~~(1)A.~~ An adequate description of the geology of the site, including identification of actual and potential geologic hazards;

~~(2)B.~~ Conclusions and recommendations regarding the effect of geologic conditions on the proposed development;

~~(3)C.~~ Recommendations for mitigation of identified hazards wherever appropriate;

~~(4)D.~~ An opinion as to the extent that instability on adjacent properties may adversely affect the project;

~~(5)E.~~ Opinions and recommendations covering suitability of the site for the proposed uses;

~~(6)F.~~ Other recommendations, as necessary, commensurate with the project grading and development.

B. Recommendations included in the report and approved by the City Engineer shall be incorporated in the grading plan.

C. Whenever an engineering geology report is required, the final submitted grading plans shall include a review letter from the engineering geologist confirming that his/her recommendations have been incorporated into the plans.

#### §15.01.~~23097~~ Work schedule and transport routes

A. The applicant shall submit a master work schedule showing the following information:

~~(1)A.~~ Proposed grading schedule;

~~(2)B.~~ Proposed conditions of the site on each July 15th, August 15th, September 15th, October 1<sup>st</sup>, and October 15<sup>th</sup> during which the permit is in effect;

~~(3)C.~~ Proposed schedule for installation of all interim erosion and sediment control measures including, but not limited to, the stage of completion of erosion and sediment control devices and vegetative measures on each of the dates set forth in subsection BA(2);

~~(4)D.~~ Schedule for construction of the proposed improvements on the site;

~~(5)E.~~ Schedule for installation of permanent erosion and sediment control devices where required.

B. The applicant shall also submit a description of the routes of travel to be used for access to and from the site for removing excavated material and bringing in fill or other materials.

#### §15.01.~~24098~~ Security

A. The applicant shall provide a performance bond or other acceptable security for the performance of the work described and delineated on the approved grading plan and the approved revegetation plan prior to the issuance of the grading permit, in an amount to be set by the City Engineer but not less than one hundred (100) percent of the approved estimated cost of performing said work. The form of security shall be one or a combination of the following to be determined and approved by the City Engineer:

- (1)- Bond or bonds issued by one or more duly authorized corporate sureties. The form of the bond or bonds shall be subject to the approval of the City Attorney;
- (2)- Deposit, either with the City or a responsible escrow agent or trust company at the option of the City, of money, negotiable bonds of the kind approved for securing deposits of public moneys, or an unconditional irrevocable letter of credit other instrument of credit from one or more financial institutions subject to regulation by the state or federal government wherein said financial institution pledges funds are on deposit and guaranteed for payment;
- (3)- Cash in U.S. currency.

B. The applicant shall provide security for the performance of the work described and delineated in the interim plan in an amount to be determined by the City Engineer, but not less than one hundred (100) percent of the approved estimated cost of performing said work. The form of the security shall be as set forth in subsection A of this section.

C. The applicant shall provide security for the performance of the work described and delineated in the final plan in an amount to be determined by the City Engineer but not less than one hundred percent (100%) of the approved estimated cost of performing said work. The form of the security shall be as set forth in subsection A of this section.

D. The applicant shall provide a cash deposit in an amount established by resolution of the City Council to insure the repair of damage to public property or cleaning of public streets. In the event of failure by the applicant, after written notification if time permits, to maintain public property or right-of-way in a manner satisfactory to the City Engineer, the City Engineer may order repairs made or cleaning performed and deduct the cost from the deposit. Any unused balance shall be returned to the applicant upon completion of the grading.

#### §15.01.~~12500~~ Fees

A. Before accepting a grading permit application and plans for checking, the City Engineer shall collect ~~all applicable~~ plan checking fees as ~~approved-established~~ by resolution of the City Council and as provided in this Chapter.

B. Unless exempted under Section 15.01.~~260~~<sup>105</sup> of this Chapter, a fee for each grading permit shall be paid to the City prior to issuance of a grading permit, in such amount as established from time to time by resolution of the City Council.

C. Failure to pay fees and obtain a permit before commencing work shall be deemed a violation of this ~~code Chapter~~, except when it can be proven to the City Engineer's satisfaction ~~of the City Engineer~~ that an emergency existed ~~which that~~ made it impractical to first obtain the permit. A violation shall result in an assessment of double permit fees for work done prior to permit issuance. Payment of a double fee shall not relieve any person from complying with the requirements of this ~~code Chapter~~ nor from any other penalties prescribed herein.

DC. Additional fees approved by resolution of the City Council and contained in this Chapter shall be paid as required ~~to the City Engineer~~.

ED. If after written notification (if time allows) the City Engineer performs emergency work on private property, he shall charge the property owner all direct and indirect costs which are necessary to complete the work to his satisfaction ~~as provided in Section 15.01.098(D)~~. In addition, the City Engineer may charge a mobilization cost equal to ten ~~(10)~~ percent (10%) of the cost for performing the work. Fees or deposits required for special purposes, i.e.g., cleanup, dust control, etc., collected but not expended for the purpose for which they are collected, will be refunded.

#### **§15.01.~~12605~~ Grading permit fee exemption**

A. A fee for a grading permit shall not be required in the following instances: grading for the foundation, basement, and other features (e.g., walkways, patios, terracing) of a building or structure for which a building permit has been issued, provided that all grading, drainage, retaining wall, and ground cover work will be started and completed within a single dry season. A soils report and other information relating to such grading, and a performance bond or other acceptable security for the performance of the work, and a cash deposit to insure the repair of damage to public property or cleaning of public streets, may be required in connection with the issuance of the grading permit. The amount and form of such security and cash deposit shall be as set forth in Section 15.01.~~24098~~.

B. Notwithstanding the provisions of paragraph A above, a grading permit fee will be required where the grading to be performed, other than that solely for the building and its foundation and driveway, is such as to require grading permit approval by the Planning Commission under Section 15.01.~~11081~~.

#### **§15.01.~~11270~~ Action on application**

A. No grading permit shall be issued by the City Engineer unless the applicant provides sufficient information for the City Engineer to find that the work, as proposed by the applicant, is likely not to endanger any property or public way or detrimentally affect water quality. Factors to be considered by the City Engineer in making his finding shall include, but shall not be limited to, the soils engineering report, the engineering geology

report, possible saturation by rains, earth movements, run-off of surface waters, and subsurface conditions such as the stratification and faulting of rock, and the nature and type of soil or rock.

B. Applications shall be reviewed by the City Engineer in the order that they are received.

#### **§15.01.1280 Permit duration**

Permits issued under this Chapter shall be valid for the period during which the proposed excavation or filling activities and soil storage takes place or ~~is~~ are scheduled to take place per Section 15.01.23097. Permittee shall commence permitted activities within sixty (60) days of the scheduled commencement date for grading or the permittee shall resubmit all required application forms, fees, maps, plans, schedules and security to the City Engineer, except where an item to be resubmitted is waived by the City Engineer.

#### **§15.01.13290 Appeals**

A. Any person may appeal to the ~~Planning Commission~~ City Manager the issuance, denial, or conditions of a grading permit, the suspension after a hearing by the City Engineer, or the revocation of a grading permit, or the failure to suspend or revoke a grading permit. Any such appeal shall be in writing and shall be filed with the ~~Planning Department City Clerk~~ City Clerk within fifteen (15) days after the action complained of. The appeal ~~shall be accompanied by a fee, as set by the City Council, and shall clearly state the reason for appeal.~~

B. ~~Upon receipt of such an appeal, the planning department, acting under the direction of the Planning Director, shall bring the appeal before the Planning Commission within thirty (30) days and shall notify the appellant and (if different) the applicant of the date and time of the Planning Commission meeting at which the appeal will be heard. No other notice need be given, except such additional notice as may be required by state or other law. The Planning Commission shall proceed to hear and determine the appeal at the same meeting or at such later meeting as it shall determine, and in connection therewith may continue the same from time to time. The City Manager shall consider the appeal and may conduct an informal hearing to receive oral and documentary evidence from the appellant and the City Engineer. The City Manager may affirm, reverse or modify the action of the City Engineer and shall provide a written decision on the appeal to the appellant, with a copy to the City Engineer and to the applicant if a different party has appealed.~~

C. ~~The action~~ City Manager's decision of the Planning Commission may be appealed to the City Council in the same manner as an appeal from a decision of the Planning Commission, as set forth in Chapter 17.52 Sections 17.52.020 and 17.52.040 of this Code.

**§15.01.14300 Revised plans**

If the City Engineer finds the soil or other conditions to ~~not be as be different from~~ those stated in the application for a grading permit, he or she may immediately suspend the grading permit, and permittee shall cease all work on the work site, excepting work to make the site safe, until approval is obtained from the City Engineer for revised plans which conform to the existing conditions.

**§15.01.15310 Cessation of operations**

~~In the event~~ If the operation of any activity regulated by this Chapter is voluntarily ceaseds for a continuous period of more than ninety (90) days (which period is not stated in the approved work schedule per Section 15.01.23097) then, ~~in that event,~~ the grading permit shall be null and void and the operation of said activity shall not be recommenced until a new grading permit is obtained as provided herein.

**§15.01.16320 Assignment of permit**

A permit issued pursuant to this Chapter may be assigned, provided all of the following conditions are satisfied:

A. The permittee notifies the eCity eEngineer of the proposed assignment;

B. The proposed assignee:

~~(1)-~~ Submits an application form pursuant to Section 15.01.~~09~~160; and

~~(2)-~~ Agrees in writing to all the conditions and duties imposed by the permit; and

~~(3)-~~ Agrees in writing to assume responsibility for all work performed prior to the assignment; and

~~(4)-~~ Provides security pursuant to Section 15.01.~~24~~098; and

~~(5)-~~ Agrees to pay all applicable fees.

C. The City Engineer approves the assignment. The City Engineer may disapprove an assignment for cause and shall not unreasonably withhold approval.

**§15.01.17330 No improvements planned**

Where an applicant does not plan to construct permanent improvements on the site, or plans to leave portions of the site graded but unimproved, applicant must meet all the requirements of this Chapter.

**15.01.18340 Grading permit, paving**

No person shall construct pavement surfacing on natural or existing grade for the purpose of a private road, parking lot or travelway without a valid grading permit, unless waived by the City Engineer. Resurfacing or maintenance of existing paved surfaces shall be exempt from this requirement. ~~Refer to Section 15.01.100(B) and (C) for fees.~~

**§15.01.19350 Grading permit, drainageway alteration**

No person shall alter an existing watercourse, channel, or revetment by excavating, or placing fill, rock protection or structural improvements without a valid grading permit, unless waived by the City Engineer, or unless the work is performed as interim protection under an emergency situation (Section 15.01.14084 (HF)). ~~Refer to Section 15.01.100(B) and (C) for fees.~~

**§15.01.20360 Excavation blasting permit**

No person shall possess, store, sell, transport or use explosives and/or blasting agents in violation of any existing laws or ordinances or do any excavation by explosives or blasting without a grading permit and without a separate blasting permit issued by the City ~~f~~ire ~~d~~epartment.

**§15.01.23705 Truck haul permit**

A truck haul permit shall be obtained from the City Engineer for the movement over a City street of any excavated or fill material to or from any property in the City or to or from any property outside the City which has direct access to a City street. This requirement shall not be applicable, however, to any quarrying operations nor to any transportation of materials not exceeding fifty (50) cubic yards from any one site. Before issuing a truck haul permit for moving excavated material over a City street, the City Engineer shall collect a fee as approved by resolution of the City Council ~~and as provided in this chapter.~~

**§15.01.21380 Issuance of grading permits**

The City Engineer may issue a grading permit upon receipt and approval of the items listed in Section 15.01.09150. Permits shall be issued subject to the following conditions:

A. The permittee shall maintain a copy of the permit and all approved plans and reports, required under Sections 15.01.09150 and 15.01.23400, ~~(B)~~, on the work site, and the permit, plans and reports shall be available for public inspection during all working hours;

B. The permittee shall, at all times, conduct operations in conformity with approved site map, grading plan, and other required plans and reports.

C. The permittee shall comply with other conditions imposed by the City Engineer as are reasonably necessary to prevent the proposed operations from being conducted in such a manner as to constitute or create a nuisance or a hazard to life, ~~or~~ property, or the environment. Such conditions may include but are not limited to:

- (1)- The route and time of travel over public streets so as to cause the least interference with general traffic and to cause the least damage to public streets;
- (2)- The removal of rock, earth or other material that may be deposited on public streets by reason of said grading operations;
- (3)- The payment to City of the cost of repairing damage to public streets caused by trucking operations in connection with said grading operations;
- (4)- The installation of suitable fencing, barricades, signage, and lighting surrounding the grading operations.

D. The permittee shall implement temporary erosion control as necessary to protect public and private property, and as required in Section 15.01.180. Temporary erosion control shall be continuous throughout the work.

E. Permittee shall be knowledgeable of the conditions and/ or restrictions of the grading permit as outlined in applicable sections of this ~~code~~ Chapter, and as contained on the approved site map, grading plan, and other required plans and reports.

#### **§15.01.22390 Time and noise limitations on grading operations**

A. The time and noise limitations on all grading operations shall be those set forth for construction activities in Chapter 8.28, ~~n~~Noise eControl, of this Code.

B. ~~In addition, n~~No grading work shall be performed during hours other than the normal working hours of the City ~~p~~Public wWorks dDepartment's inspection and maintenance personnel without approval of the City Engineer and without first obtaining a special permit for such work from the City Engineer. Before issuing a special permit for such work, the City Engineer shall collect a fee as approved by resolution of the City Council ~~and as provided in this chapter~~. Permitted hours of operation may be shortened by the City Engineer's finding of a previously unforeseen effect on the health, safety or welfare of the surrounding community.

#### **§15.01.23400 Implementation of permits; permittee's duties**

In addition to performing as required under Section 15.01.21380:

A. The permittee shall request an inspection of the site by the City Engineer at each of the following stages of the grading operation listed below. The City Engineer shall

approve the work inspected or notify, in writing, the permittee or owner wherein it fails to comply with the ~~law~~ any approved grading plans or any other applicable requirement. Any portion of the work ~~which~~ that does not comply with the ~~law~~ grading plans or other applicable requirement shall be corrected. The stages of work at which inspections shall be requested are:

- (1)- Initial: when the permittee is ready to begin grading work;
- (2)- Rough grading: when all rough grading has been completed;
- (3)- Interim erosion control: the installation of all interim erosion control devices and the completion of planting revegetation requirements;
- (4)- Final: readiness of the site for final inspection, including, but not limited to, finished grading, installation of drainage devices and final erosion control measures.

B. Permittee shall submit, status reports to the City Engineer, ~~status reports~~ with revised work schedules ~~which are~~ required by Section 15.01.~~23097~~, or other reports as required by City Engineer, for the City Engineer's approval if:

- (1)- There are delays in obtaining materials, machinery, services, or manpower necessary to the implementation of the grading, interim, or final plans as scheduled;
- (2)- There are any delays in excavation, land-disturbing, filling activities, or soil storage;
- (3)- The work is not being done in conformance with ~~the~~ any approved grading ~~plan, interim or final plans~~;
- (4)- There are any delays in the implementation of the interim or final plans.

C. Permittee shall submit recommendations for corrective measures, if necessary and appropriate, with the reports made under Subsection B of this Section, unless the City Engineer waives the requirement ~~is waived by the City Engineer~~.

#### **§15.01.~~2410~~ Implementation of permits – requirements of City Engineer**

A. The permittee shall submit all reports as may be required in this Section and in Sections 15.01.~~24380~~ and 15.01.~~23400~~ to the City Engineer for review. The City Engineer may require permittee to modify the site map and grading plan, interim or final plans, and maintenance methods and schedules. The City Engineer shall notify the permittee in writing ~~within a reasonable period of time~~ of the requirement to modify and may specify a ~~reasonable~~ specific period of time within which permittee must comply. All modifications are subject to the City Engineer's approval.

B. The City Engineer may inspect the site:

- (1)- Upon receipt of any report by permittee under provisions of Section 15.01.23400.(B);
- (2)- To verify completion of modifications required under Subsection A of this Section-15.01.240(A);
- (3)- During and following any rainfall;
- (4)- At any other time, at the City Engineer's discretion.

C. Upon completion of the rough grading work and at the final completion of the work, the City Engineer may require the following reports and drawings and supplements thereto:

- (1)- An as-graded grading plan prepared by the civil engineer who prepared the approved grading plan, including original ground surface elevations, as-graded ground surface elevations, lot drainage patterns and locations and elevations of all surface and subsurface drainage facilities. The civil engineer shall provide a statement that the work was done in general conformance with the final approved grading plan;
- (2)- A soil grading report prepared by the soils engineer including locations and elevations of field density tests, summaries of field and laboratory tests, and other substantiating data and comments on any changes made during grading and their effect on the recommendations made in the soil engineering investigation report. The soils engineer shall provide a statement as to compliance of the work with his/her recommendations and as to the adequacy of the site for the intended use;
- (3)- An engineering geology report prepared by the geologist containing a final description of the geology of the site including any new information disclosed during the grading and the effect of same on recommendations incorporated in the approved grading plan. The geologist shall provide a statement as to compliance of the work with his/her recommendations and as to the adequacy of the site for the intended use as affected by geologic factors.

D. No person shall in any way hinder or prevent the City Engineer or any of his/her authorized representatives from entering and inspecting any property on which grading has been or is being done.

**§15.01.4250 Grading inspection**

A. All grading operations for which a permit is required shall be subject to inspection by the City Engineer. When required by the City Engineer, special inspection of grading operations and special testing shall be performed ~~in accordance with~~ according to the provisions of Subsection B of this Section.

B. In addition to complying with all requirements of ~~Chapter 70 of the Uniform the California Building Code~~, as amended by this Chapter, "regular grading" and "engineered grading" applicants/permittees shall be subject to and comply with the following:

(1)A. Engineered and Regular Grading Designation. Grading in excess of one thousand (1000) cubic yards and/or ten (10) feet vertical depth of cut and/or fill shall be performed ~~in accordance with the~~ according to approved grading plan prepared by a civil engineer, and shall be designated as "engineered grading." Grading involving less than one thousand (1000) cubic yards and/or less than ten (10) feet vertical depth of cut and/or fill shall be designated "regular grading" unless the applicant/permittee, with the City Engineer's approval ~~of the City Engineer~~, or the City Engineer, independently, chooses to have the grading performed as "engineered grading."

(2)B. Engineered Grading Requirements. For engineered grading, it shall be the responsibility of the civil engineer who prepares the approved grading plan to incorporate all recommendations from the soil engineering and engineering geology reports into the grading plan. He/she shall also be responsible for the professional inspection and approval of the grading within his area of technical specialty. This responsibility shall include, but need not be limited to, inspection and approval as to the establishment of line, grade, and drainage of the development area. The civil engineer shall act as the coordinating agent ~~in the event if~~ the need arises for liaison between the other professionals, the contractor and the City Engineer. The civil engineer shall also be responsible for the preparation of revised plans and the submission of as-graded grading plans and compliance statements upon completion of the work.

(3) Soils Engineering and Engineering Geology Requirements. Soils engineering and engineering geology reports shall be required at the discretion of the City Engineer. During grading, all necessary reports, compaction data, soils engineering and engineering geology recommendations shall be submitted to the owner, the geologist, the civil engineer, and the City Engineer by the soils engineer and the engineering geologist. Areas of responsibility shall be as follows:

(a) The soils engineer's area of responsibility shall include, but need not be limited to, the professional inspection and approval concerning the preparation of ground to receive fills, testing for required compaction, stability of all finish slopes, and the design of buttress fills, where required, incorporating data supplied by the engineering geologist.

(b) The engineering geologist's area of responsibility shall include, but need not be limited to, professional inspection and approval of the adequacy of natural ground for receiving fills and the stability of cut slopes with respect to geological matters and the need for subdrains or other groundwater drainage devices. He/she shall report ~~his~~ the

findings to the owner, the soils engineer, the City Engineer and the civil engineer.

(c) The City Engineer shall inspect the project as required under Section 15.01.2410 and at any more frequent interval necessary to determine that the professional consultants are exercising adequate control, ~~is being exercised by the professional consultants.~~

(4)C. Regular Grading Requirements. The City Engineer may require the permittee to provide inspection and testing by a professional testing company acceptable to the City Engineer. The testing agency's responsibility shall include, but need not be limited to, approval concerning the inspection of cleared areas and benches to receive fill, and the compaction of fills. When the City Engineer has reasonable cause to believe that geologic factors may be involved, the grading operation will be required to conform to "engineered grading" requirements.

(5)D. Notification of Noncompliance. If, in the course of fulfilling their responsibility under this Section, the civil engineer, the soils engineer, the engineering geologist, or the testing agency finds that the work is not being done in conformance with this Section or the approved grading plans, the discrepancies shall be reported immediately in writing to the person in charge of the grading work and to the City Engineer (see Section 15.01.23400). Recommendations for corrective action measures, if necessary, shall be submitted.

(6)E. Transfer of Responsibility for Approval. If the civil engineer, the soils engineer, the engineering geologist, or the testing agency of record is changed during the course of the work, the work shall be stopped until the replacement has agreed to accept the responsibility within the area of their technical competence for approval upon completion of the work.

#### §15.01.255430      **Completion of work**

A. Final Reports. Upon the completion of the rough grading work and at the final completion of the work, the City Engineer may require the following reports and drawings and supplements thereto:

(1)- An as-graded grading plan prepared by the civil engineer who prepared the approved grading plan, including original ground surface elevations, as-graded ground surface elevations, lot drainage patterns and locations and elevations of all surface drainage facilities. The civil engineer shall state that to the best of his/her knowledge the work was done ~~in accordance with~~ according to the final approved grading plan;

(2)- A soil grading report prepared by the soils engineer, including locations and elevations of field density tests, summaries of field and laboratory tests, and other substantiating data and comments on any changes made during

grading and their effect on the recommendations made in the soils engineering investigation report. The civil engineer shall render a finding as to the adequacy of the site for the intended use as affected by geologic factors;

(3)- A geologic grading report prepared by the engineering geologist, including a final description of the geology of the site and any new information disclosed during the grading and the effect of same on recommendations incorporated in the approved grading plan. The engineering geologist shall render a finding as to the adequacy of the site for the intended use as affected by geologic factors.

B. Notification of Completion. The permittee or his/her agent shall notify the City Engineer when the grading operation is ready for final inspection. Final approval shall not be given until all work, including installation of drainage facilities and their protective devices, and all erosion control measures have been completed ~~in accordance with~~ according to the final approved grading plan and the required reports have been submitted.

#### **§15.01.26440 Removal of ground cover**

A. All debris from clearing and grubbing shall be removed from the site within three (3) months from the completion of that activity.

B. During the dry season, the natural vegetative ground cover of any watershed shall not be destroyed or removed more than thirty (30) days prior to grading. During the wet season, such ground cover shall not be destroyed or removed more than five (5) days prior to such grading. The City Engineer may grant an extension of time when justified by the circumstances.

#### **§15.01.27450 Wet season grading**

A. Commencement or continuation of any grading during the wet season is prohibited unless the City Engineer grants permission ~~is granted by the City manager~~ as provided in this Section.

B. The City ~~Engineer manager~~ may, at his or her discretion, grant permission to commence or continue grading during the wet season, on the basis of the information submitted by the applicant or permittee, weather forecasts, experience or any other factors which he or she may consider pertinent, so long as such grading will not cause a hazardous condition, erosion, or sedimentation to occur or continue.

C. For continuance of wet season grading activities, other than installation, maintenance or repair of measures in the interim or final erosion control plan, ~~during the wet season,~~ applicant/permittee shall submit evidence to the City ~~Engineer manager~~, as often as ~~said the City Engineer manager~~ requires, demonstrating that erosion and sedimentation are being effectively controlled.

D. Applicant/permittee's failure to submit the required information to obtain permission for wet season grading activity shall result in suspension or revocation of the grading permit, action against the security, filing a lien on the property to recover City's costs, and/or prosecution as provided in Sections 15.01.~~37550~~ through 15.01.~~395580~~ of this Chapter.

#### §15.01.28460 Cuts

A. General. Unless otherwise recommended in the approved soil engineering and/or engineering geology report, and specifically waived by the City Engineer, cuts shall conform to the provisions of this Section and in accordance with Figures 1 and Figure 2 of this Chapter.

B. Cut slopes. Cut slopes shall be no steeper than two ~~to one (2:1 - (2)-two~~ horizontal to ~~one (1)-vertical~~ ~~(2:1)~~ unless otherwise justified in the soil engineering or engineering geology report. Justification shall consist of ~~an accepted~~ geotechnical slope stability analysis acceptable to the City Engineer, with factors of safety in proportion to the affected structures and type of loading (e.g. earthquake). ~~Accepted-The factors of safety to be analyzed analysis~~ shall be those determined by-at the discretion of the City Engineer.

C. Slope adjustments. The City Engineer may require that the excavation be made with cut face flatter in slope than two (2) horizontal and one (1) vertical if he/she finds the material in which the excavation is to be made is unusually subject to erosion, or if other conditions make such flatter slope necessary for stability and safety.

D. Drainage and Terracing. Drainage and terracing shall be provided as required by Section 15.01.~~37490~~.

#### §15.01.29470 Fills

A. General. Unless otherwise recommended in the approved soil engineering report and/or engineering geology report, and specifically waived by the City Engineer, fills shall conform to the provisions of this Section and Figure 1 and Figure 2 of this Chapter. In the absence of an approved soils engineering report, these provisions may be waived for minor fills not intended to support structures.

B. Fill Location. Fill slopes shall not be constructed on natural slopes steeper than two to one (2:1), or where the fill slope terminates above a planned or existing cut slope, within a horizontal distance equal to one-third (1/3) of the vertical height of the fill, unless specifically addressed in the soils engineering report or the engineering geology report and approved by the City Engineer.

C. Preparation of Ground. The ground surface shall be prepared to receive fill by removing vegetation, noncomplying fill, top-soil and other unsuitable materials scarifying to provide a bond with the new fill, and, where slopes are steeper than five to one (5:1), and the height is greater than five (5) feet, by benching into sound bedrock or other competent material as determined by the soils engineer. The bench under the toe of a fill

on a slope steeper than five to one (5:1) shall be at least ten (10) feet wide. The area beyond the toe of fill shall be sloped for sheet overflow, or a paved drain shall be provided. Where fill is to be placed over a cut, the bench under the toe of fill shall be at least ten (10) feet wide, but the cut must be made before placing fill and shall be approved by the soils engineer and engineering geologist as suitable foundation for fill. Unsuitable soil is soil which that, in the opinion of the building official or the civil engineer or the soils engineer or the geologist, is not competent to support other soil or fill, to support structures or to satisfactorily perform the other functions for which the soil isn intended.

D. Fill Material. Detrimental amounts of organic material shall not be permitted in fills. Except as permitted by the City Engineer, no rock or similar irreducible material with a maximum dimension greater than eight (8) inches shall be buried or placed in fills.

Exception: the City Engineer may permit placement of larger rock when the soils engineer properly devises a method of placement, continuously inspects its placement, and approves the fill stability. The following conditions shall also apply:

- (1)- Prior to issuance of the grading permit, potential rock disposal areas shall be delineated on the grading plan.
- (2)- Rock sizes greater than eight (8) inches in maximum dimension shall be ten (10) feet or more below grade, measured vertically.
- (3)- Rocks shall be placed so as to assure filling of all voids with fines.

E. Compaction. All fills shall be compacted to a minimum of ninety (90) percent of maximum density as determined by ~~Building Code Standard No. 70-1~~ Appendix J of the 2010 California Building Standards Code or equivalent, as approved by the City Engineer. Field density shall be determined ~~in accordance with~~ according to Appendix J of the 2010 California Building Standards Code Building Code Standard No. 70-2 or equivalent, as approved by the City Engineer.

In addition to the inspections of fills, the City Engineer may require a statement from an approved soils engineer based on tests of the fill at selected stages. If favorable conditions exist, the City Engineer may, by prior approval, waive requirements for inspection of or soils tests by an approved soils engineer. The requirements of the City Engineer for the compaction of fills may include but shall not be limited to the following:

- (1)- Preparation of the natural ground surface by removing top soil and vegetation and by compacting the fill upon a series of terraces;
- (2)- Control of moisture content of the material used for the fill;
- (3)- Limitation of the use of various kinds of materials;
- (4)- Maximum thickness of the layers of the fill to be compacted;
- (5)- Method of compaction;

(6)- Density requirements of the completed fill depending upon the location and use of the fill;

(7)- Compaction tests required during the process of filling.

F. Slope. The slope of fill surfaces shall be no steeper than is safe for the intended use. Fill slopes shall be no steeper than two (2) horizontal to one (1) vertical (2:1). The City Engineer may require that the fill be made with a slope face flatter in slope than two ~~(2) horizontal~~ to one ~~(1) vertical~~ (2:1) if he or she finds the material of which the fill is to be made is unusually subject to erosion, or if other conditions make such flatter slope necessary for stability and safety.

G. Drainage and Terracing. Drainage and terracing shall be provided and the area above fill slopes and the surfaces of terraces shall be graded and paved as required by Section 15.01.~~314~~490.

#### **§15.01.~~304~~180 Setbacks**

A. General. The setbacks and other restrictions specified by this Section are minimum and may be increased by the City Engineer or by the recommendations of a civil engineer, soils engineer, or engineering geologist, if necessary for safety and stability or to prevent damage of adjacent properties from deposition or erosion or to provide access for slope maintenance and drainage. Retaining walls may be used to reduce the required setbacks when approved by the City Engineer.

B. Setbacks from Property Lines. The tops of cuts and toes of fill slopes shall be set back from the outer boundaries of the permit area, including slope-right areas and easements, in accordance with Figure 2 of this Chapter. The tops and toes of cut and fill slopes shall be set back from property lines and structures as far as necessary to provide for safety of adjacent property, safety of pedestrians and vehicular traffic, required slope rounding, adequate foundation support, required swales, berms, and drainage facilities, and applicable zoning requirements. Except for pier-type foundations or other special foundation design, setbacks shall not be less than as shown on Figure 2 of this Chapter.

#### **§15.01.~~314~~490 Drainage and terracing**

A. General. Unless otherwise indicated on the approved grading plan, drainage facilities and terracing shall conform to the provisions of this Section.

B. Terrace. Terraces at least six (6) feet in width shall be established at not more than thirty (30) feet vertical intervals on all cut or fill slopes to control surface drainage and debris, except that where only one terrace is required, it shall be at mid-height. For cut or fill slopes greater than sixty (60) feet and up to one hundred twenty (120) feet in vertical height, one terrace at approximately mid-height shall be twelve (12) feet in width. Terrace width and spacing for cut and fill slopes greater than one hundred twenty (120) feet in height shall be designed by the civil engineer who prepares the approved

grading plan and approved by the City Engineer. Suitable access shall be provided to permit proper cleaning and maintenance. Swales and ditches shall comply with the following requirements:

(1) Swales or ditches on terraces shall have a minimum gradient along and towards the ditch of five (5) percent unless approved by the City Engineer and must be paved with reinforced concrete not less than three (3) inches in thickness or an approved equal paving. They shall have a minimum depth at the deepest point of one (1) foot and a minimum, paved width of three (3) feet or as required by the City Engineer.

(2) A single run of swale or ditch shall not exceed a length of one hundred fifty (150) feet or collect runoff from a tributary area exceeding thirteen thousand five hundred (13,500) square feet (projected) without discharging into a down drain, unless approved by the City Engineer.

C. Subsurface Drainage. Cut and fill slopes shall be provided with subsurface drainage as necessary for stability.

D. Disposal. All drainage facilities shall be designed to carry waters to the nearest practicable drainage way approved by the City Engineer and/or other appropriate jurisdiction as a safe place to deposit such waters. Erosion of ground in the area of discharge shall be prevented by installation of nonerosive down drains or other devices. Building pads shall have a drainage gradient of two (2) percent toward approved drainage facilities, unless waived by the City Engineer.

Exception: the gradient from the building pad may be one (1) percent if all the following conditions exist throughout the permit area:

(1)- No proposed fills are greater than ten (10) feet in maximum depth;

(2)- No proposed finish cut or fill slope faces have a vertical height in excess of ten (10) feet;

(3)- No existing slope faces, which have a slope face steeper than ten (10) horizontally to one (1) vertically, have a vertical height in excess of ten (10) feet;

(4)- A two (2) percent gradient is provided for the first five (5) feet adjacent to the structure.

E. Interceptor Drains. Adequate provision shall be made to prevent any surface waters from damaging the cut face of an excavation or the sloping surface of a fill. At the discretion of the City Engineer, paved interceptor drains shall be installed along the top of all cut slopes where the tributary drainage area above slopes towards the cut and has a drainage path greater than forty (40) feet measured horizontally. Interceptor drains shall be paved with a minimum of three (3) inches of concrete or gunite and reinforced. They shall have a minimum depth of twelve (12) inches and minimum paved width of thirty (30)

inches measured horizontally across the drain or as required by the City Engineer. The slope of drain shall be subject to approved by the City Engineer's approval.

#### **§15.01.32500 Import and export of earth material**

On project sites where earth materials are moved on public roadways from or to the site, the following requirements shall apply:

A. ~~Either water or dust palliative or both must be applied for the alleviation or prevention of excessive dust resulting from the loading or transportation of earth from or to the project site on public roadways. Dust control shall be implemented as specified in Section 15.01.510 below.~~ The permittee shall be responsible for maintaining public rights-of-way used for hauling purposes in a condition free of dust, earth, or debris attributed to the grading operation.

B. Loading and hauling of earth from or to the site must be accomplished within the limitations established in Section 15.01.22390 of this ~~grading code~~ Chapter.

C. Access roads to the premises shall be only at points designated on the approved grading plan. Access roads shall include stabilized construction entrances and/or other BMPs as required by the City Engineer.

D. The last fifty (50) feet of the access road, as it approaches the intersection with the public roadway, shall have a grade not to exceed three (3) percent. There ~~must~~ shall be ~~three hundred (300) feet a~~ clear, unobstructed sight distance of three hundred (300) feet to the intersection from both the public roadway and the access road. If the three hundred (300) feet sight distance cannot be obtained, flagmen and/or signs shall be posted.

E. A stop sign conforming to the requirements of the California Vehicle Code shall be posted at the entrance of the access road to the public roadway.

F. An advance warning sign, conforming to the requirements of the current California Manual for Uniform Traffic Control Devices, shall be posted on both sides of the access intersection ~~must be posted on the public roadway four hundred (400) feet on either side of the access intersection, carrying the words "Truck Crossing." The sign shall be diamond shape, each side being thirty (30) inches in length, shall have a yellow background, and the letters thereon shall be five (5) inches in height. The sign shall be placed six (6) feet from the edge of the pavement and the base of the sign shall be five (5) feet above the pavement level.~~ The advance warning sign shall be covered or removed when the access intersection is not in use.

#### **§15.01.33510 ~~Site d~~Dust control**

The movement of earth materials either within, to, or from a site shall require the ~~periodic~~ implementation of dust control measures in accordance with the BAAQMD CEQA Guidelines, and any additional measures that the City Engineer deems to be necessary and

appropriate. ~~On projects as~~ determined by the eCity eEngineer, a water truck shall be continuously present on-site to assure maximum control.

#### **§15.01.34520 Protection of adjoining property**

In accordance with California Civil Code Section 832. Each adjacent owner is entitled to the lateral and subjacent support ~~which that~~ his/her land receives from the adjoining land, subject to the right of the owner of the adjoining land to make proper and usual excavations on the same for purposes of construction or improvement as provided by law.

#### **§15.01.3530 Removal of hazards**

Whenever the City Engineer determines that any existing excavation, ~~or~~ embankment, or fill on private property has become a hazard to any person, endangers property, or adversely affects the safety, use, or stability of a public way or drainage channel, the owner of the property upon which the excavation or fill is located, or other person or agent in control of such property, upon receipt of notice ~~in writing~~ from the City Engineer, shall immediately repair or eliminate such excavation or embankment so as to remove the hazard and be in conformance to conform with the requirements of this Chapter. Notice from the City Engineer to remove a hazard may be verbal if the hazard presents an immediate threat of injury or damage, and as soon as reasonably possible thereafter, the verbal notice shall be followed by a written notice from the City Engineer.

#### **§15.01.36540 Post-grading procedures**

Upon completion of final grading and permanent improvements, where such permanent improvements are planned at the time grading is performed, permittee shall notify the City Engineer that the grading is completed. The City Engineer shall review the grading performed, and the final reports required in Section 15.01.430, and, if found in substantial conformance to the permit conditions, the City Engineer may release the unexpended and unencumbered amount of the cash deposit and initiate the release of the security bonds posted by the permittee in accordance with Section 15.01.40590.

#### **§15.01.37550 Revocation or suspension of permits**

A. The City Engineer may suspend ~~any~~ grading permit ~~may be suspended by the City Engineer~~ for the violation of any condition of the permit, the violation of any provision hereof or any other applicable law or ordinance, or the existence of any condition or the doing of any act constituting or creating a nuisance, threatening water quality, or endangering life, property, or the environment, ~~the lives or property of others.~~ Upon written notification of suspension of a permit, the permittee shall cease all work on the work site, except work necessary to remedy the cause of the suspension.

B. Following the suspension, the permittee shall be granted a hearing by said the City Engineer within five (5) days of the written notice of suspension. The written notice shall state, generally, the grounds of complaint and the time and place where such hearing will be held.

C. At the conclusion of said hearing, and within thirty (30) days thereafter, the City Engineer shall make his/her findings and notify, in writing, the permittee of the action taken.

D. If the permittee, after written notice of suspension, fails or refuses to cease work, as required under Subsection A of this Section, the City Engineer may revoke the permit.

E. The City Engineer ~~shall~~may reinstate a suspended permit upon the permittee's correction of the cause of the suspension.

F. The eCity eEngineer shall not reinstate a revoked permit.

#### **§15.01.~~385~~60 Violation - penalties**

A. The violation of any of the provisions of this Chapter shall constitute a misdemeanor, punishable by the fines, penalties and enforcement provisions set forth in Chapters 1.14, 1.16 and 1.18 of this Code.

B. Where a violation of any of the provisions of this Chapter is determined by the City to have been willful, reckless, or grossly negligent, then in addition to the fines, penalties and enforcement provisions referenced in Paragraph A above or set forth elsewhere in this Code, the City may impose a supplemental fine of up to ten thousand dollars (\$10,000) for each violation.

#### **§15.01.~~395~~70 Action against the security**

The City Engineer may retain and/or execute security required by Section 15.01.~~240~~98 if one of the conditions listed in Subsections A through D below exists. The City Engineer shall use funds from the appropriate security to finance remedial work undertaken by the City or private contractor under contract to the City, and to reimburse the City for all direct costs incurred in the process of the remedial work, including but not limited to the following conditions:

A. The permittee ceases land-disturbing activities and/or filling and abandons the work site prior to the completion of the work shown on the site map, ~~and~~ grading plan and revegetation plan (if applicable);

B. The permittee fails to conform to the conditions of the grading permit as approved or as modified under Section 15.01.~~213~~80 and has had his/her permit revoked under Section 15.01.~~235~~50;

C. The techniques utilized under the interim or final erosion control plan fail within one (1) year of installation, or before a final erosion control plan is implemented for the site or portions of the site, whichever is later;

D. The City Engineer determines that action by the City is necessary to prevent excessive erosion from occurring on the site.

**§15.01.39580 Public nuisance abatement**

A. The City Council of the city of Brisbane finds and declares that any work site on which grading has been started, and has been abandoned or is not completed ~~in accordance with~~ according to the site plan, grading plan, and grading permit, or on which the interim or final erosion control facilities have failed, or where on-site grading and erosion control facilities either are not working properly, or are ~~considered~~ inadequate or incomplete, creates a danger to public health, safety and welfare, and constitutes a public nuisance. All duties of the City Manager under this Chapter may be delegated to other officers, agents or employees of the City.

BA. The public nuisance abatement procedures provided in this Section are, at the City's option, ~~an alternative or additional to the~~ procedures provided in Sections 15.01.39570 and 15.01.3530 of this Chapter, or to any applicable procedures provided by this Code, including Chapters 1.14, 1.16, 1.18, 8.38, or any other City ordinance, or provided by state law or any other ordinance of the City.

CB. The City Manager is authorized to abate each and every such nuisance or cause the same to be abated in the manner provided by the provisions of this Section.

DC. Before abating any condition which is declared to be a public nuisance, the City Manager shall post upon or in front of the property on which such nuisance exists, a notice which shall be substantially in the following form:

**NOTICE TO ABATE NUISANCE OR REMOVE HAZARD**

Notice is hereby given that ~~grading the following activity/condition on the property located at \_\_\_\_\_, in the City of Brisbane, County of San Mateo, State of California, identified as Assessors Parcel Number \_\_\_\_\_ has been started and, (has been abandoned, ( not in conformance with the site plan, grading plan and grading permit,) the ) on-site grading and interim or final erosion control facilities have failed, ( erosion control facilities are not complete, and that constitutes a violation of the City of Brisbane Grading Ordinance or a violation of a permit or approval issued pursuant to such Ordinance:~~

~~Such condition creates a danger to the public health, safety, and welfare and is a public nuisance which must be abated by immediately removing the hazard and/or by completing the planned permitted work. by taking the following corrective action:~~

If said nuisance is not abated or said hazard is not removed within ~~three~~ \_\_\_\_\_ days from and after the date of posting of this notice, or if good cause is not shown to the undersigned within said ~~three days time~~ why such corrective action should not be ~~done taken~~, the City will abate such nuisance by removing or causing to be removed said hazard and completing or causing to be completed the ~~planned permitted work~~ corrective action described above, and in such event, the cost and expense of such removal and abatement will be specifically assessed upon or against the parcel of land from which the hazard is removed and on which the ~~planned permitted work~~ corrective action is completed, and such assessment will constitute a lien upon the property until paid.

~~The above mentioned parcel of land on which said public nuisance exists is situated in the City of Brisbane, County of San Mateo, State of California which is described in the last equalized assessment roll of the county of San Mateo as:~~

APN \_\_\_\_\_

All interested persons having any objection to the above shall present such objections to the undersigned City Manager at ~~City offices~~ Hall, 50 Park Place, Brisbane, California 94005, within ~~three~~ \_\_\_\_\_ days from and after the posting, herein specified, of this notice.

Posted/Mailed this \_\_\_\_\_ day of \_\_\_\_\_, 1920

CITY MANAGER OF THE  
CITY OF BRISBANE

By: \_\_\_\_\_

ED. Before abating any condition which is declared to be a public nuisance in this Section, the City Manager, in addition to posting of notice or notices as provided by Subsection (DE) of this Section, may mail, or cause to be mailed, to the person or persons who are designated on the last equalized assessment roll of the county of San Mateo, as owner or owners of the parcel of land on which such nuisance exists, at their address or addresses as shown on the last equalized assessment roll, a written notice or notices which shall be substantially in the same form shown in Subsection (DE) above.

FE. ~~1-~~The owner or owners of any private parcel of land within or upon which a public nuisance, as described in this Section, exists, have a duty to abate such nuisance at his, her or their own cost and expense by removing any hazard and completing any planned permitted grading within the time prescribed in the notice which is posted upon such property, or if notice is given by mail within the time prescribed in the mailed notice. 2-If such owner or owners fail to abate such nuisance ~~as above prescribed~~ within said time, and if, in addition, they fail to show cause to the satisfaction of the City engineer-Manager why said nuisance should not be abated, then in that event the City may abate said nuisance or cause same to be abated.

GF. In order to abate said nuisance, the City may cause the removal of said nuisance and complete the planned permitted work, or perform such other work as may be necessary or appropriate to abate the nuisance or may cause a licensed contractor to abate the nuisance in such manner for reasonable rates not in excess of prevailing rates for similar work within the City.

HG. In the event the City Manager finds that any public nuisance, above described in this Section, within or upon any parcel of land is so serious and presents such an immediate menace or danger to the public health, safety and welfare that such nuisance should be immediately abated without first posting or mailing notices, as above provided, and without first giving the owner or owners of said parcel further time to abate the same, then in that event the City Manager may immediately abate said nuisance or cause the same to be abated in the manner provided in subsection (GF) of this Section without first posting or mailing any notices and without giving the owner or owners of the parcel further time to abate the same. However, the City Manager, if he or she abates such nuisance, shall prepare and file in his or her office a written report describing the location, nature and extent of the public nuisance and setting forth the reasons why he or she had to abate it immediately, as aforesaid, and he or she shall cause a copy of said report to be ~~transmitted to the city manager and to be~~ mailed within ten (10) days from and after completion of such abatement, to the owner or owners of the parcel within or upon which nuisance existed, as such owner or owners are shown on the last equalized assessment roll of the county of San Mateo, at their addresses as shown on said roll.

IH. The City Manager shall keep a record of the cost and expense incurred by him or her in abating or causing to be abated, pursuant to this Section, each public nuisance within or upon each separate parcel of land. To said costs and expenses, the City Manager shall add an amount for overhead and administration and incidental expenses and shall submit them to the City Council for confirmation of an itemized written report showing all costs and expenses incurred by the City in abating each public nuisance.

JJ. A copy of City Manager's report to the City Council shall be posted for at least ten (10) days prior to its submission to the City Council at the usual place where City notices are posted, together with a notice of the time and place when and where it will be submitted to the City Council for a hearing. The notice shall state a time and place when and where property owners may appear and object to any matter contained in the report.

KJ. At the time fixed for receiving and considering the report, the City Council shall hear it with any objections of the property owners liable to be assessed for the abatement. It may modify the report if it is deemed necessary. If ~~T~~the City Council finds the report to be acceptable, it shall ~~then~~ confirm the report by ~~motion or~~ resolution.

LK. After confirmation of the report, a certified copy of the same shall be filed with the County of San Mateo. The description of the parcels reported shall be those used for the same parcels on the county's assessor's map books for the current year.

ML. The cost of abatement within or upon each parcel of land, as confirmed, constitutes a special assessment against that parcel, and upon such confirmation it is a lien on the parcel. ~~M.~~Laws relating to the levy, collection and enforcement of county taxes

apply to such special assessment taxes. ~~N.~~The appropriate county official shall enter each assessment on the county tax roll opposite the parcel of land. ~~O.~~The amount of the assessment shall be collected at the time and in the manner of ordinary municipal taxes. If delinquent, the amount is subject to the same penalties and procedures of foreclosure and sale provided for ordinary municipal taxes.

~~NP.~~ As an alternate method, the county tax collector, in his or her discretion, may collect the assessments without reference to the general taxes by issuing separate bills and receipts for the assessments.

~~OQ.~~ The City Finance Director may receive the amount due on the abatement cost and issue receipts at any time after confirmation of the report and until August-July 1st of the calendar year in which the report is confirmed. If the cost is paid in full, no report shall be filed with the County of San Mateo to levy a special assessment for such cost.

~~PR.~~ The City Council may order refunded all or part of a special assessment paid pursuant to this Section if it finds that all or part of the special assessment has been erroneously levied. A special assessment or part shall not be refunded unless a claim is filed on or before March 1st next following the date the tax became due and payable. The claim shall be verified by the person who paid the tax, or his or her ~~guardian, executor or administrator~~ duly authorized representative.

#### ~~§15.01.45900~~ Release of security

Security deposited with the City for faithful performance of the grading, ~~and revegetation (if applicable), and~~ erosion control work, and to finance necessary remedial work shall be released according to the following schedule:

A. Securities held against the successful completion of the work shown on the site map, grading plan and the interim plan, shall be released to the permittee at the termination of the permit, or the satisfactory completion of the grading operations, provided no action against such security is filed prior to that date;

B. Securities held against the successful completion of the work shown on the final plan shall be released to the permittee either one (1) year after termination of the permit or when the final plan is approved as completed, or when the City Planning Department approves a final revegetation monitoring report, whichever is later, provided no action against such security has been filed prior to that date.

#### ~~§15.01.41600~~ Cumulative enforcement procedures

The procedures for enforcement of a permit, as set forth in this Chapter, are cumulative and not exclusive.

FIGURE 1

NOTE. No rounding at laytimes.

**FIGURE 2**

**Table A**

Min. Setback From Adjacent Slope					
H (hgt) Feet	a	b	c	d	e
0 < 5	3'	7'	3'	5'	1'
6-14	5'	7'	H/2	H/2	H/5
14-30	5'	H/2 10' Max.	H/2	H/2 10' Max.	H/5
+30	5'	10'	15'	10'	6'

**Table B**

H (hgt) Feet	Max. Hw.	Min. Setback
0-5	3'	3' Min.
6-12	H/2	H/2
12-30	6'	H/2
+30	6'	15'

**NOTES:**

PA means permit area boundary and/or property line; 1. MFD means manufactured surface.

Setbacks shall also comply with applicable zoning 2. regulations.

Table A applies to manufactured slopes and 2:1 or 3. steeper natural slopes. Setbacks from natural slopes flatter than 2:1 shall meet the approval of the eCity eEngineer.

"b" may be reduced to 5' minimum if an approved 4. drainage device is used; roof gutters and downspouts may be required.

"b" may be reduced to less than 5' if no drainage is 5. carried on this side and if roof gutters are included.

If the slope between "a" and "b" levels is replaced 6. by a retaining wall, "a" may be reduced to zero and "b" remains as shown in Table A. The height of the retaining wall shall be controlled by zoning regulations.

"b" is measured from the face of the structure to the 7. top of the slope.

"d" is measured from the lower outside edge of the 8. footing along a horizontal line to the face of the slope. Under special circumstances "d" may be reduced or recommended in the approved soil report and approved by the eCity eEngineer.

The use of retaining walls to reduce setbacks (Fig. 9. B) must be approved by the eCity eEngineer.

"f" may be reduced if the slope is composed of sound 10. rock that is not likely to produce detritus and is recommended by the soil engineer or engineering geologist and approved by the eCity eEngineer.

"a" and "e" shall be 2' when PA coincides with 11. Arterial or local street right-of-way and when improved sidewalk is adjacent to right-of-way.

"e" shall be increased as necessary for interceptor 12. drains.

**SECTION 2** Section 17.32.220 in Chapter 17.32 of the Municipal Code is amended to read as follows:

**§17.32.220 Grading permit; When review by Planning Commission is required.**

A. Any grading, as defined in Section 12.08.020, shall require a permit from the Planning Commission when more than two hundred fifty (250) cubic yards of material are involved in any single operation, or if more than fifty (50) cubic yards of material is to be removed from any single parcel of land, or when grading is not otherwise approved in connection with issuance of a building permit. (Reference: Section 12.08.120.) Grading permits to be issued by the Director of Public Works/City Engineer pursuant to Chapter 15.01 of this Code shall be subject to review by the Planning Commission when required by the provisions of Subsection 15.01.110.A of this Code. The review shall be based upon a consideration of the following potential impacts of the proposed grading:

- (1) Will the proposed grading be minimized and designed to reflect or fit comfortably with the natural topography?
- (2) Will the proposed grading be designed to avoid large exposed retaining walls?
- (3) Will the proposed grading be designed to minimize removal of:
  - (i) existing street trees, (see Section 12.12.020);
  - (ii) any California Bay Laurel, Coast live Oak or California Buckeye trees;
  - (iii) three or more trees of any species on the same site having a circumference of at least 30 inches measured 24 inches above grade?

Where removal of existing trees is necessary, do the landscape plans for the project include the planting of appropriate replacement trees?

B. The Planning Commission may provide comments and recommendations to the City Engineer concerning mitigation or avoidance of any potential adverse impacts of the proposed grading considered by the Commission pursuant to this Section.

**SECTION 3:** If any section, subsection, sentence, clause or phrase of this Ordinance is for any reason held by a court of competent jurisdiction to be invalid or unconstitutional, such decision shall not affect the validity of the remaining portions of this Ordinance. The City Council of the City of Brisbane hereby declares that it would have passed this Ordinance and each section, subsection, sentence, clause and phrase thereof, irrespective of

the fact that one or more sections, subsections, sentences, clauses or phrases may be held invalid or unconstitutional.

**SECTION 4:** This Ordinance shall be in full force and effect thirty days after its passage and adoption.

\* \* \* \*

The above and foregoing Ordinance was regularly introduced and after the waiting time required by law, was thereafter passed and adopted at a regular meeting of the City Council of the City of Brisbane held on the \_\_\_\_\_ day of \_\_\_\_\_, 2012, by the following vote:

AYES:  
NOES:  
ABSENT:  
ABSTAIN:

\_\_\_\_\_  
Cliff Lentz, Mayor

ATTEST:

\_\_\_\_\_  
Sheri Marie Spediacci, City Clerk

APPROVED AS TO FORM:

\_\_\_\_\_  
Harold S. Toppel, City Attorney

**DRAFT ORDINANCE NO. 579**

**AN ORDINANCE OF THE CITY OF BRISBANE  
AMENDING CHAPTER 15.01 AND SECTION 17.32.220  
OF THE MUNICIPAL CODE PERTAINING TO GRADING**

**The City Council of the City of Brisbane hereby ordains as follows:**

**SECTION 1:** Chapter 15.01 of the Municipal Code, entitled "Grading," is amended in its entirety to read as follows:

**Chapter 15.01**

**GRADING**

**Sections:**

15.01.010	Title
15.01.020	Purpose and objectives
15.01.030	Scope
15.01.040	Definitions
15.01.050	Precautions imposed by City Engineer
15.01.060	Discovery of prehistoric, historic, or unique archaeological resources, or human remains
15.01.070	Other laws
15.01.080	Severability and validity
15.01.090	Permit required
15.01.100	HCP Permission required
15.01.110	Planning Commission review of application for grading permit
15.01.120	Quarry operations
15.01.130	Application to annexed territory
15.01.140	Exemptions
15.01.150	Application for grading permit
15.01.160	Application form
15.01.170	Site map and grading plan
15.01.180	Interim erosion and sediment control plan (interim plan)
15.01.190	Final erosion and sediment control plan (final plan)
15.01.200	Revegetation plan
15.01.210	Soils engineering report (soils report)
15.01.220	Engineering geology report
15.01.230	Work schedule and transport routes
15.01.240	Security
15.01.250	Fees
15.01.260	Grading permit fee exemption
15.01.270	Action on application
15.01.280	Permit duration

15.01.290	Appeals
15.01.300	Revised plans
15.01.310	Cessation of operations
15.01.320	Assignment of permit
15.01.330	No improvements planned
15.01.340	Grading permit, paving
15.01.350	Grading permit, drainageway alteration
15.01.360	Excavation blasting permit
15.01.370	Truck haul permit
15.01.380	Issuance of grading permits
15.01.390	Time and noise limitations on grading operations
15.01.400	Implementation of permits - permittee's duties
15.01.410	Implementation of permits – requirements of City Engineer
15.01.420	Grading inspection
15.01.430	Completion of work
15.01.440	Removal of ground cover
15.01.450	Wet season grading
15.01.460	Cuts
15.01.470	Fills
15.01.480	Setbacks
15.01.490	Drainage and terracing
15.01.500	Import and export of earth material
15.01.510	Dust control
15.01.520	Protection of adjoining property
15.01.530	Removal of hazards
15.01.540	Post-grading procedures
15.01.550	Revocation or suspension of permits
15.01.560	Violation – penalties
15.01.570	Action against the security
15.01.580	Public nuisance abatement
15.01.590	Release of security
15.01.600	Cumulative enforcement procedures

**§15.01.010 Title**

This Chapter shall be known as the "City of Brisbane Grading Ordinance" and may be so cited.

**§15.01.020 Purpose and objectives**

A. The purpose of this Chapter is to provide for grading operations; to safeguard life, limb, health, property and public welfare; and to preserve and enhance the natural environment, including but not limited to water quality, by regulating and controlling clearing and grading of property within the City.

B. This Chapter is intended to achieve the following objectives:

- (1) Grading plans shall be designed so that grading operations do not create or contribute to landslides, accelerated soil creep, settlement, subsidence, or hazards associated with strong ground motion and soil liquefaction.
- (2) Grading plans shall contain reasonable provisions for the preservation of natural land and water features, vegetation, drainage, and other indigenous features of the site.
- (3) Grading plans shall be designed to preserve and enhance the city's aesthetic character.
- (4) Grading plans shall require compliance with all applicable laws, rules and regulations pertaining to air and water pollution, noise control, and preservation of archaeological remains.
- (5) Grading operations shall be conducted so as to expose the smallest practical area of soil to erosion for the least possible time, consistent with an anticipated build-out schedule.

**§15.01.030 Scope.**

A. This Chapter amends the regulations pertaining to grading as set forth in the California Building Standards Code, as adopted in Chapter 15.04 of this Code. In the event of any conflict or inconsistency between the provisions of this Chapter and the provisions of Chapter 15.04 or any of the codes adopted by reference therein, the provisions of this Chapter shall be controlling.

B. This Chapter sets forth rules and regulations to control excavation, land disturbances, land fill, soil storage, and erosion and sedimentation resulting from such activities. This Chapter provides that all excavation or landfilling activities or soil storage shall be undertaken in a manner designed to minimize surface runoff, erosion, and sedimentation and to avoid or mitigate damage caused by grading activities to areas having habitat value. This Chapter also establishes procedures for the issuance, administration and enforcement of grading permits.

**§15.01.040 Definitions**

When used in this Chapter, the following words shall have the meanings ascribed to them in this Section:

- (1) **Applicant** means any person, corporation, partnership, association of any type, public agency or any other legal entity that submits an application to the City Engineer for a permit pursuant to this chapter.
- (2) **As-graded** means the surface conditions extant on completion of grading.

- (3). **BAAQMD CEQA Guidelines** means the recommended measures detailed in Table 8-1 of the Bay Area Air Quality Management District's "California Environmental Quality Act-Air Quality Guidelines, Updated May 2011", and any additional measures, including those recommended in Table 8-2 of the reference, as determined necessary and appropriate by the City Engineer.
- (4) **Bedrock** means in-place solid rock.
- (5) **Bench** means a relatively level step excavated into earth material. Bench also includes terraces.
- (6) **Best management practices (BMPs)** means a technique or series of techniques which, when used in an erosion control plan, is proven to be effective in controlling construction-related runoff, erosion and sedimentation. Approved BMPs can be found in the California Stormwater Quality Association "Construction BMP Handbook/Portal", the State of California Department of Transportation March 2003 "Construction Site Best Management Practices (BMPs) Manual", the San Mateo Countywide Water Pollution Prevention Program Construction Best Management Practices" plan sheet, *Erosion & Sediment Control Handbook*, by Goldman, Jackson and Bursztynsky, and any amendment, revision or reissuance thereof.
- (7) **Borrow** means earth material acquired from an off-site location for use in grading on a site.
- (8) **City** means the city of Brisbane.
- (9) **City Engineer** means the Director of Public Works/City Engineer of the City of Brisbane and his/her duly authorized designees. The City Engineer may delegate any of his or her duties under this Chapter to his or her authorized agents or representatives.
- (10) **City street** means any public or private street in the city of Brisbane.
- (11) **Civil engineer** means a professional engineer registered in the state of California to practice in the field of civil engineering.
- (12) **Civil engineering** means the application of the knowledge of the forces of nature, principles of mechanics and the properties of materials to the evaluation, design and construction of civil works for the beneficial uses of humankind.
- (13) **Clearing and grubbing** means the removal of trees, shrubs, bushes, windfalls and all other materials from above and below the natural ground surface. This activity removes vegetative ground cover, removes top soil, and removes/disturbs root mat.

- (14) **Community Development Director** means the director of planning of the City of Brisbane.
- (15) **Compaction** means the densification of a fill by mechanical means.
- (16) **Contour rounding** means the rounding of cut and fill slopes in the horizontal and/or vertical planes to blend with existing contours or to provide horizontal variation to eliminate the artificial appearance of slopes. (See Figure 1)
- (17) **Drainageway** means natural or manmade channel that collects and intermittently or continuously conveys stormwater runoff.
- (18) **Dry season** means the period from April 15th to October 15th.
- (19) **Earth material** means any rock, natural soil, fill or combination thereof.
- (20) **Engineering geologist** means a geologist experienced and knowledgeable in engineering geology and qualified to practice engineering geology in the State of California.
- (21) **Engineering geology** means the application of geologic knowledge and principles in the investigation and evaluation of naturally occurring rock and soil for use in the design of civil works.
- (22) **Erosion** means the wearing away of the ground surface as a result of the movement of wind or water.
- (23) **Excavation** means any act by which earth, sand, gravel, rock or any other similar material is cut into, dug, quarried, uncovered, removed, displaced, relocated, or bulldozed, including the conditions resulting therefrom.
- (24) **Fill/land fill** means any act by which earth, sand, gravel, rock or any other similar material is deposited, placed, pushed, pulled or transported to a place other than the place from which it was excavated, including the conditions resulting therefrom.
- (25) **Final erosion and sediment control plan (final plan)** means a set of best management practices or equivalent measures designed to control surface runoff and erosion and to retain sediment on a particular site after all other planned final structures and permanent improvements have been erected or installed.
- (26) **General Plan** means the General Plan adopted by the City of Brisbane and all amendments thereto.
- (27) **Grade** means the vertical location of the ground surface.

- (a) **Existing grade** means the grade prior to grading.
  - (b) **Rough grade** means the stage at which the grade approximately conforms to the approved plan.
  - (c) **Finish grade** means the final grade of the site which conforms to the approved plan.
- (28) **Grading** means any land disturbance or excavation or fill or any combination thereof and shall include the conditions resulting from any land disturbance, excavation or fill. Grading shall include trenching on public or private property including within public streets.
  - (29) **Grading permit** means the formal approval required by this Chapter for any grading, filling, excavating, storage or disposal of soil or earth materials or any other excavation or land filling activity. Application to the City Engineer and the City Engineer's approval is required under the process of this Chapter.
  - (30) **HCP** means the San Bruno Mountain Area Habitat Conservation Plan, as approved and adopted by the U.S. Fish and Wildlife Service in 1983, including subsequent amendments.
  - (31). **Interim erosion and sediment control plan (interim plan)** means a set of best management practices or equivalent measures designed to control surface runoff and erosion and to retain sediment on a particular site during the period in which construction-related excavations, fills and soil storage occur, and before the final plan is completed.
  - (32) **Key** means a designed compacted fill placed in a trench excavated in earth material beneath the toe of a proposed fill slope.
  - (33) **Permittee** means the applicant in whose name a valid permit is duly issued pursuant to this Chapter and his/her agents, employees and others acting under his/her direction.
  - (34) **Plan Operator** is the Habitat Conservation Plan Manager, presently the San Mateo County Department of Parks, and also means any successor agency.
  - (35) **Revegetation** means the replanting of disturbed natural ground surfaces on properties within the HCP and on properties that the Community Development Director has determined requires mitigation to restore habitat value.
  - (36) **Sediment** means earth material deposited by water or wind.

- (37) **Site** means a parcel or parcels of real property owned by one or more than one person that is being or is capable of being developed as a single project, including phased construction. Site also includes any public or private property or rights-of-way on which excavation, fill or land disturbance occurs.
- (38) **Slope** means an inclined ground surface the inclination of which is expressed as a ratio of horizontal distance to vertical distance.
- (39) **Soil** means naturally occurring superficial deposits overlying bedrock.
- (40) **Soils engineer** means a civil engineer experienced and knowledgeable in the practice of soils engineering. Soils engineer and geotechnical engineer are synonymous.
- (41) **Soils engineering** means the application of the principles of soil mechanics in the investigation, evaluation and design of improvements involving the use of earth materials and the inspection and testing of the construction thereof. Soils engineering and geotechnical engineering are synonymous.
- (42) **Structure** means anything built or constructed including pavement and pipelines.
- (43) **Temporary erosion control** consists of, but is not limited to, constructing such facilities and taking such measures as are necessary to prevent, control, and abate water, mud and wind erosion damage to public and private property during grading operations.
- (44) **Terrace** means a relatively level step constructed in the face of a graded slope surface for drainage and maintenance purposes. Terrace also includes benches.
- (45) **Truck haul** means the movement over public streets of any excavated material.
- (45) **Vertical slope rounding** means the rounding of the top and toes of cut and fill slopes.
- (47) **Weeding** means the removal of noxious, dangerous, or invasive plants. This activity also includes the removal of vegetation which attains such a large growth as to become a fire menace when dry, and further includes the removal of dry grass, grass cuttings, tree trimmings, vines, stubble or other growth material which endangers the public by creating a fire hazard, including any such hazard determination made by the fire department pursuant to the City's weed abatement ordinance. Any activity that disturbs more than 15% of the natural ground surface shall be classified as "clearing and grubbing."
- (48) **Wet season** means the period from October 15th to April 15th.

**§15.01.050 Precautions imposed by City Engineer**

A. If, at any stage of grading, the City Engineer determines by inspection that conditions are such that further work as authorized by an existing grading permit is likely to endanger any property or public way, the City Engineer may require, as a condition to allowing the work to be continued, that reasonable safety precautions be formulated by the permittee and submitted to the City Engineer for his/her consideration and the grading permit be amended to avoid such danger. "Safety precautions" may include but shall not be limited to specifying a flatter exposed slope, construction of additional drainage facilities, berms, terracing, compaction, cribbing, or retaining walls, or planting of slopes.

B. The sole and primary responsibility for meeting the requirements of this Section and of this Chapter for any civil or criminal liability as a result of the performance of grading work pursuant to a grading permit shall be upon the permittee. Neither the City, the City Engineer, or any employees or agents of the City shall be responsible for any liability for issuance of a grading permit or the conduct of any inspections thereunder.

**§15.01.060 Discovery of prehistoric, historic, or unique archaeological resources, or human remains.**

A. In the event of the accidental discovery of prehistoric, historic, or unique archaeological resources, the permittee shall immediately cease work and follow the protocol established in the Guidelines for Implementation of the California Environmental Quality Act, as contained in California Code of Regulations, Title 14, Division 6, Chapter 3 ("CEQA Guidelines"), specifically, Section 15064.5(f) and any amendments thereto. This includes obtaining an evaluation from a qualified archaeologist to be forwarded to the Community Development Director for review/approval, and will include a finding as to the categorization of the discovery, any recommended avoidance measures or appropriate mitigation, and a statement as to what portions of the site, if any, are cleared for resumption of work while the recommended mitigation is being performed. If the find is determined to be significant, contingency funding and a time allotment sufficient to allow for implementation of appropriate mitigation or avoidance measures shall be provided.

B. In the event of the accidental discovery or recognition of any human remains, the permittee shall immediately cease work and implement the protocol established in the CEQA Guidelines, specifically, Section 15064.5(e)(1) et. seq. and any amendment thereto.

**§15.01.070 Other laws**

Neither this Chapter nor any administrative decision made under it:

A. Exempts the permittee from complying with other applicable laws or from procuring other required permits or complying with the requirements and conditions of such a permit; or

B. Limits the right of any person to maintain, at any time, any appropriate action, at law or in equity, for relief or damages against the permittee arising from the permitted activity; or

C. Exempts any person from complying with any applicable laws or allows any person to perform any grading without complying with such other applicable laws.

**§15.01.080 Severability and validity**

If any part of this Chapter is found not valid, the remainder shall remain in effect.

**§15.01.090 Permit required**

Except as exempted under Section 15.01.140, it shall be unlawful for any person to clear and grub, grade, fill, excavate, store or dispose of soil and earth materials or perform any other excavation or land-filling activity without first obtaining a grading permit as set forth in this Chapter. A separate grading permit shall be required for each site. With respect to subdivisions, a separate permit will be required for each phase of development. The grading permit issued for each site may also cover the utility construction associated with the site provided the required information for the utilities is included with the application. A building permit shall not be issued prior to the issuance of a grading permit, when required.

**§15.01.100 HCP Permission required**

No owner of property within the boundaries of the HCP shall weed, clear and grub, grade, fill, excavate, store, or dispose of soil and earth materials or perform any other excavation or land filling activity without first obtaining permission from the Plan Operator. Permission for the listed activities is presently obtained through submittal of a Site Activity Review Application; no grading permit will be issued by the City for any property within the HCP until the property owner has first complied with the requirements of the Plan Operator.

**§15.01.110 Planning Commission review of application for grading permit**

A. Where a grading permit is required by the provisions of this Chapter, it shall be issued by the City Engineer following his/her approval of the permit application. The permit application shall also be reviewed by the Planning Commission where:

- (1) All of the following circumstances are applicable:
  - (a) More than two hundred fifty (250) cubic yards of material is to be moved or planned to be moved in any single grading or excavation operation; and

- (b) The parcel or parcels of land on which the grading will be performed is located within any of the following zoning districts as defined by the City's most current Zoning Map: Brisbane Acres, Southwest Bayshore, Central Brisbane, Northeast Ridge, Northwest Bayshore or the Quarry; and
  - (c) The grading is being performed as part of a project for which an application for a permit, approval, or other land use entitlement is being considered by the Planning Commission as the approving authority for such application.
- (2) Grading is to be performed on any parcel of land within the boundaries of the HCP; *provided, however*, review by the Planning Commission shall not be required if the only grading operation to be conducted is weeding, or clearing and grubbing, where such work is performed pursuant to an HCP site activity approval issued by the Plan Operator.

B. Where Planning Commission review of an application for a grading permit is required by Subsection 15.01.110.A above, the review shall be based upon a consideration of the following potential impacts of the proposed grading:

- (1) Will the proposed grading be minimized and designed to reflect or fit comfortably with the natural topography?
- (2) Will the proposed grading be designed to avoid large exposed retaining walls?
- (3) Will the proposed grading be designed to minimize removal of:
  - (i) existing street trees, (see Section 12.12.020);
  - (ii) any California Bay Laurel, Coast live Oak or California Buckeye trees;
  - (iii) three or more trees of any species on the same site having a circumference of at least 30 inches measured 24 inches above grade?

Where removal of existing trees is necessary, do the landscape plans for the project include the planting of appropriate replacement trees?

C. The Planning Commission may provide comments and recommendations to the City Engineer concerning mitigation or avoidance of any potential adverse impacts of the proposed grading considered by the Commission pursuant to this Section.

**§15.01.120 Quarry operations**

No grading permit for an excavation shall be issued if the excavation for which a grading permit is required shall involve the operation of a quarry, which quarry is otherwise prohibited by the provisions of the Zoning Ordinance of the City.

**§15.01.130 Application to annexed territory**

Activities regulated by this Chapter, whether operative or nonoperative, which are located in territory hereafter annexed to the City shall not operate from and after thirty (30) days following annexation to the City, unless, in the case of operative activities, or before recommencement of operations in the case of inoperative activities, a grading permit shall have been granted as provided herein.

**§15.01.140 Exemptions**

A grading permit shall not be required in the following instances:

A. Exploratory excavations and trenches under the direction of a soils engineer or engineering geologist, provided that these excavations and trenches comply with all of the following:

- (1) All earth material removed from the trenches or excavations that is not completely removed from the project site must be stored in a manner that prevents erosion, sedimentation, off-site migration, and smothering of natural vegetative ground cover;
- (2) All trenches and excavations are properly backfilled;
- (3) All excavations and trenches are subject to the applicable sections of Title 8 of the State Safety Order, Division of Industrial Safety.

B. An excavation which does not exceed five (5) cubic yards on any one site and is less than two (2) feet in vertical depth and which does not create a cut slope steeper than two feet horizontal to one vertical (2:1). Such excavation, however, is not exempt from the requirements of Sections 15.01.340 and 15.01.350.

C. A fill less than one foot in depth placed on natural grade with a slope flatter than five horizontal to one vertical (5:1), which does not exceed five (5) cubic yards on any one site and does not obstruct a drainageway. Such fill, however, is not exempt from the requirements of Section 15.01.340.

D. Grading in connection with dredging operations in San Francisco Bay for which approval for such grading has been granted by the City under other permits or agreements.

E. Grading in connection with the operation of salvage, garbage and disposal dumps for which approval for such grading has been granted by the City under other permits or agreements.

F. Emergencies posing an immediate danger to life or property, or substantial flood or fire hazards, or interruption of utility services to the public, in which case a permit shall be obtained as soon as possible.

G. Excavation by public utilities in connection with the placement of facilities, including repair and maintenance of local utility distribution and service utilities, if such excavation is authorized by a valid street encroachment permit.

**§15.01.150 Application for grading permit**

The application for a grading permit shall be in writing and filed with the City Engineer in duplicate and must include all of the following items, unless otherwise waived by the City Engineer:

- A. Application form;
- B. Site map and grading plan;
- C. Interim erosion and sediment control plan;
- D. Final erosion and sediment control plan;
- E. Revegetation plan;
- F. Soils engineering report;
- G. Engineering geology report;
- H. Work schedule and transportation routes;
- I. Security;
- J. Fees;

K. Confirmation of the proposed recycling or reuse of all rocks, soils, tree remains, trees and other vegetative matter resulting from the grading operations, which shall be satisfied by providing a copy of the Recycling and Diversion of Debris permit issued by the Building Department pursuant to Chapter 15.75 of this Code.

- L. Any other material required by the City Engineer.

**§15.01.160 Application form**

The following information is required on the application form unless waived or modified by the City Engineer:

- A. Name, address and telephone number of the applicant;
- B. Names, addresses and telephone numbers of any and all contractors, subcontractors or persons actually doing the excavating and land-filling activities and their respective tasks;

C. Name(s), address(es) and telephone number(s) of the person(s) responsible for the preparation of the site map and grading plan;

D. Names(s), address(es) and telephone number(s) of the person(s) responsible for the preparation of the interim and/or final erosion and sediment control plan, and the revegetation plan;

E. Name, address and telephone number of the soils engineer and/or the engineering geologist responsible for the preparation of the soils and engineering geology reports;

F. A vicinity map showing the location of the site in relationship to the surrounding area's watercourses, water bodies and other significant geographic features, and roads and other significant structures;

G. Date of the application;

H. Title report confirming ownership;

I. Signature(s) of the owner(s) of the site or of an authorized representative.

#### **§15.01.170 Site map and grading plan**

The site map and grading plan shall contain all the following information unless waived or modified by the City Engineer:

A. Plan views and cross sections showing the existing and proposed topography of the site. The plan view shall show contours at an interval sufficiently detailed to define the topography over the entire site. The minimum contour interval shall be two feet where ground slope is less than fifteen (15) percent and five (5) feet where ground slope exceeds fifteen (15) percent;

B. Two contour intervals off-site and extension of the on-site contours a minimum of one hundred (100) feet off-site, and sufficient to show on and off-site drainage;

C. An accurate plat plan drawn by a registered civil engineer or licensed land surveyor showing the site's exterior boundaries in true location with respect to the plan's topographic information, all easements, boundaries of the "Habitat Conservation Plan" area, special districts, and any other pertinent information;

D. Location and graphic representation of all existing and proposed natural and manmade drainage facilities;

E. Detailed plans of all surface and subsurface drainage devices, walls, cribbing, dams and other protective devices to be constructed with, or as a part of the proposed work, together with a map showing the drainage area and the estimated runoff of the area served by any drain;

F. Location and graphic representation of proposed excavation and fills, of on-site storage of soil and other earthen material, and of on-site disposal of soil and other earthen material;

G. Location of existing vegetation types and the location and type of vegetation to be left undisturbed;

H. Location of proposed final surface runoff, and of erosion and sediment control measures;

I. Quantity of soil or earthen materials in cubic yards to be excavated, filled, stored or otherwise removed from or utilized on-site;

J. Location of any buildings or structures on the property where the work is to be performed and the location of any buildings or structures on land of adjacent owners which are within fifteen (15) feet of the property or which may be affected by the proposed grading operations;

K. Location and slope of proposed streets and driveways. Driveways shall not exceed a centerline slope of twenty (20) percent and, unless specifically approved by the City Engineer, streets shall not exceed a centerline slope of fifteen (15) percent.

**§15.01.180 Interim erosion and sediment control plan (interim plan)**

A. An interim plan containing all of the following information shall be provided with respect to conditions existing on the site during excavation or filling activities or soil storage and before the final plan is completed; furthermore, the plan submitted shall demonstrate compliance with the requirements of the Municipal Regional Permit, as defined in Section 13.06.040:

- (1) The location and amount of runoff discharging from the site, calculated using a method approved by the City Engineer;
- (2) A delineation and brief description of the measures to be undertaken to control erosion caused by surface runoff and by wind and to retain sediment on the site including, but not limited to, the design and specifications for berms and sediment detention basins, types and method of applying mulches, the design and specifications for diverters, dikes and drains, seeding methods, the type, location and extent of pre-existing and undisturbed vegetation types, and a schedule for maintenance and upkeep.

B. The location of all the measures listed by the applicant under subsection A(2) above shall be depicted on the site map and grading plan, or on a separate plan, at the discretion of the City Engineer.

C. An estimate of the cost of implementing and maintaining all interim erosion and sediment control measures shall be submitted in a form acceptable to the City Engineer.

D. The applicant may propose the use of any erosion and sediment control techniques in the interim plan provided such techniques are proven to be as or more effective than the equivalent best management practices contained in the manual of standards.

**§15.01.190 Final erosion and sediment control plan (final plan)**

A. A final plan containing all of the following information shall be provided with respect to conditions existing on the site after final structures and improvements (except those required under this section) have been completed; furthermore, the plan submitted shall demonstrate compliance with the requirements of the Municipal Regional Permit, as defined in Section 13.06.040:

- (1) The location and amount of runoff discharging from the site, calculated using a method approved by the City Engineer;
- (2) A description of and specifications for sediment retention devices;
- (3) A description of and specifications for surface runoff and wind erosion control devices;
- (4) A description of vegetative measures;
- (5) A graphic representation of the location of all items in subsections B through D above, and items A through K in 15.01.170 above.

B. An estimate of the costs of implementing all final erosion and sediment control measures must be submitted in a form acceptable to the City Engineer.

C. The applicant may propose the use of any erosion and sediment control techniques in the final plan provided such techniques are proven to be as or more effective than the equivalent best management practices contained in the manual of standards.

**§15.01.200 Revegetation plan**

A revegetation plan is designed to effectively mitigate impacts to the site's habitat values by restoring or replacing native vegetation to the maximum extent practical and reasonable to achieve. Sites subject to revegetation requirements shall submit a plan to replant and maintain disturbed surfaces for review and approval by the City Engineer and Community Development Director in accordance with the following:

A. Topsoil removed from the surface shall be stored on or near the site and protected from soil loss while the work is underway. Such storage shall not cause damage to root systems of onsite trees intended to be preserved.

B. Mulching, seeding, planting of groundcover, shrubs or trees, or other suitable stabilization measures shall be used to protect exposed soil, to minimize soil loss, and to maximize slope stability. Use of drought tolerant native plant species that are fire resistant is encouraged. Use of plant species identified as invasive in the most current HCP Vegetation Management Activities Report is prohibited, whether or not the project site is within the boundaries of the HCP.

C. The City Engineer may require the permittee to monitor revegetation for a period up to five years, to provide reports of such monitoring to the City Planning Department, to allow for third-party assessment of the success of the revegetation at the applicant's expense, and to provide security to correct, complete, or remediate the approved revegetation plan. The City Engineer and the Community Development Director shall each retain discretion as to whether the approved revegetation plan has been successfully implemented.

D. Onsite mitigation is preferred. In the event that the Community Development Director determines that adequate mitigation can not be reasonably achieved onsite, the City may approve an offsite revegetation plan to achieve the goals of restoring habitat value. Such offsite mitigation shall comply with the provisions of this Chapter that govern onsite mitigation.

E. For sites located within the HCP, the City may impose restoration/revegetation requirements in addition to those required by the Plan Operator, so long as a reasonable rationale is provided for the additional requirements. A decision to require more stringent measures may be based upon the biological features of the site, for example, if the site is an existing or potential wildlife corridor or part of a buffer zone between developed areas and existing habitat, or if the site has particular geological features, such as potential for erosion or susceptibility to seismic hazards.

#### **§15.01.210 Soils engineering report (soils report)**

A. A soils report, when required by the City Engineer, is to be prepared by an approved soils engineer and shall be based on adequate and necessary test borings, and shall contain all the following information, in addition to the minimum applicable requirements of the latest edition of the California Building Code adopted by the City:

- (1) Data regarding the nature, distribution, strength, and erodibility of existing soils;
- (2) Data regarding the nature, distribution, strength and erodibility of soil to be placed on the site, if any;
- (3) Conclusions and recommendations for grading procedures;

- (4) Conclusions and recommended designs for soil stabilization for interim conditions and after construction is completed;
- (5) Design criteria for corrective measures when necessary;
- (6) Foundation and pavement design criteria when necessary;
- (7) Opinions and recommendations covering suitability of the site for the proposed uses;
- (8) Other recommendations, as necessary, commensurate with the project grading and development.

B. Recommendations included in the report and approved by the City Engineer shall be incorporated in the grading plan.

C. Whenever a soils engineering report is required, the final submitted grading plans shall include a review letter from the soils engineer confirming that his/her recommendations have been incorporated into the plans.

#### **§15.01.220 Engineering geology report**

A. An engineering geology report, when required by the City Engineer, is to be prepared by a qualified engineering geologist and shall be based on adequate and necessary test borings and shall contain the following information, in addition to the minimum applicable requirements of the latest edition of the California Building Code adopted by the City:

- (1) An adequate description of the geology of the site, including identification of actual and potential geologic hazards;
- (2) Conclusions and recommendations regarding the effect of geologic conditions on the proposed development;
- (3) Recommendations for mitigation of identified hazards wherever appropriate;
- (4) An opinion as to the extent that instability on adjacent properties may adversely affect the project;
- (5) Opinions and recommendations covering suitability of the site for the proposed uses;
- (6) Other recommendations, as necessary, commensurate with the project grading and development.

B. Recommendations included in the report and approved by the City Engineer shall be incorporated in the grading plan.

C. Whenever an engineering geology report is required, the final submitted grading plans shall include a review letter from the engineering geologist confirming that his/her recommendations have been incorporated into the plans.

**§15.01.230 Work schedule and transport routes**

A. The applicant shall submit a master work schedule showing the following information:

- (1) Proposed grading schedule;
- (2) Proposed conditions of the site on each July 15th, August 15th, September 15th, October 1<sup>st</sup>, and October 15<sup>th</sup> during which the permit is in effect;
- (3) Proposed schedule for installation of all interim erosion and sediment control measures including, but not limited to, the stage of completion of erosion and sediment control devices and vegetative measures on each of the dates set forth in subsection A(2);
- (4) Schedule for construction of the proposed improvements on the site;
- (5) Schedule for installation of permanent erosion and sediment control devices where required.

B. The applicant shall also submit a description of the routes of travel to be used for access to and from the site for removing excavated material and bringing in fill or other materials.

**§15.01.240 Security**

A. The applicant shall provide a performance bond or other acceptable security for the performance of the work described and delineated on the approved grading plan and the approved revegetation plan prior to the issuance of the grading permit, in an amount to be set by the City Engineer but not less than one hundred (100) percent of the approved estimated cost of performing said work. The form of security shall be one or a combination of the following to be determined and approved by the City Engineer:

- (1) Bond or bonds issued by one or more duly authorized corporate sureties. The form of the bond or bonds shall be subject to the approval of the City Attorney;
- (2) Deposit, either with the City or a responsible escrow agent or trust company at the option of the City, of money, negotiable bonds of the kind approved for securing deposits of public moneys, or an unconditional irrevocable letter of credit other instrument of credit from one or more financial institutions subject to regulation by the state or federal government wherein said

financial institution pledges funds are on deposit and guaranteed for payment;

(3) Cash in U.S. currency.

B. The applicant shall provide security for the performance of the work described and delineated in the interim plan in an amount to be determined by the City Engineer, but not less than one hundred (100) percent of the approved estimated cost of performing said work. The form of the security shall be as set forth in subsection A of this section.

C. The applicant shall provide security for the performance of the work described and delineated in the final plan in an amount to be determined by the City Engineer but not less than one hundred percent (100%) of the approved estimated cost of performing said work. The form of the security shall be as set forth in subsection A of this section.

D. The applicant shall provide a cash deposit in an amount established by resolution of the City Council to insure the repair of damage to public property or cleaning of public streets. In the event of failure by the applicant, after written notification if time permits, to maintain public property or right-of-way in a manner satisfactory to the City Engineer, the City Engineer may order repairs made or cleaning performed and deduct the cost from the deposit. Any unused balance shall be returned to the applicant upon completion of the grading.

#### **§15.01.250 Fees**

A. Before accepting a grading permit application and plans for checking, the City Engineer shall collect all applicable plan checking fees as established by resolution of the City Council and as provided in this Chapter.

B. Unless exempted under Section 15.01.260 of this Chapter, a fee for each grading permit shall be paid to the City prior to issuance of a grading permit, in such amount as established from time to time by resolution of the City Council.

C. Failure to pay fees and obtain a permit before commencing work shall be deemed a violation of this Chapter, except when it can be proven to the City Engineer's satisfaction that an emergency existed that made it impractical to first obtain the permit. A violation shall result in an assessment of double permit fees for work done prior to permit issuance. Payment of a double fee shall not relieve any person from complying with the requirements of this Chapter nor from any other penalties prescribed herein.

D. Additional fees approved by resolution of the City Council and contained in this Chapter shall be paid as required.

E.. If after written notification (if time allows) the City Engineer performs emergency work on private property, he shall charge the property owner all direct and indirect costs which are necessary to complete the work to his satisfaction. In addition, the

City Engineer may charge a mobilization cost equal to ten percent (10%) of the cost for performing the work. Fees or deposits required for special purposes, e.g., cleanup, dust control, etc., collected but not expended for the purpose for which they are collected, will be refunded.

**§15.01.260 Grading permit fee exemption**

A. A fee for a grading permit shall not be required in the following instances: grading for the foundation, basement, and other features (e.g., walkways, patios, terracing) of a building or structure for which a building permit has been issued, provided that all grading, drainage, retaining wall, and ground cover work will be started and completed within a single dry season. A soils report and other information relating to such grading, and a performance bond or other acceptable security for the performance of the work, and a cash deposit to insure the repair of damage to public property or cleaning of public streets, may be required in connection with the issuance of the grading permit. The amount and form of such security and cash deposit shall be as set forth in Section 15.01.240.

B. Notwithstanding the provisions of paragraph A above, a grading permit fee will be required where the grading to be performed, other than that solely for the building and its foundation and driveway, is such as to require grading permit approval by the Planning Commission under Section 15.01.110.

**§15.01.270 Action on application**

A. No grading permit shall be issued by the City Engineer unless the applicant provides sufficient information for the City Engineer to find that the work, as proposed by the applicant, is likely not to endanger any property or public way or detrimentally affect water quality. Factors to be considered by the City Engineer in making his finding shall include, but shall not be limited to, the soils engineering report, the engineering geology report, possible saturation by rains, earth movements, run-off of surface waters, and subsurface conditions such as the stratification and faulting of rock, and the nature and type of soil or rock.

B. Applications shall be reviewed by the City Engineer in the order that they are received.

**§15.01.280 Permit duration**

Permits issued under this Chapter shall be valid for the period during which the proposed excavation or filling activities and soil storage take place or are scheduled to take place per Section 15.01.230. Permittee shall commence permitted activities within sixty (60) days of the scheduled commencement date for grading or the permittee shall resubmit all required application forms, fees, maps, plans, schedules and security to the City Engineer, except where an item to be resubmitted is waived by the City Engineer.

**§15.01.290 Appeals**

A. Any person may appeal to the City Manager the issuance, denial, or conditions of a grading permit, the suspension after a hearing by the City Engineer, or the revocation of a grading permit, or the failure to suspend or revoke a grading permit. Any such appeal shall be in writing and shall be filed with the City Clerk within fifteen (15) days after the action complained of.

B. The City Manager shall consider the appeal and may conduct an informal hearing to receive oral and documentary evidence from the appellant and the City Engineer. The City Manager may affirm, reverse or modify the action of the City Engineer and shall provide a written decision on the appeal to the appellant, with a copy to the City Engineer and to the applicant if a different party has appealed.

C. The City Manager's decision may be appealed to the City Council in the same manner as an appeal from a decision of the Planning Commission, as set forth in Sections 17.52.020 and 17.52.040 of this Code.

**§15.01.300 Revised plans**

If the City Engineer finds the soil or other conditions to be different from those stated in the application for a grading permit, he or she may immediately suspend the grading permit, and permittee shall cease all work on the work site, excepting work to make the site safe, until approval is obtained from the City Engineer for revised plans which conform to the existing conditions.

**§15.01.310 Cessation of operations**

If the operation of any activity regulated by this Chapter is voluntarily ceased for a continuous period of more than ninety (90) days (which period is not stated in the approved work schedule per Section 15.01.230) then the grading permit shall be null and void and the operation of said activity shall not be recommenced until a new grading permit is obtained as provided herein.

**§15.01.320 Assignment of permit**

A permit issued pursuant to this Chapter may be assigned, provided all of the following conditions are satisfied:

- A. The permittee notifies the City Engineer of the proposed assignment;
- B. The proposed assignee:
  - (1) Submits an application form pursuant to Section 15.01.160; and
  - (2) Agrees in writing to all the conditions and duties imposed by the permit; and

- (3) Agrees in writing to assume responsibility for all work performed prior to the assignment; and
- (4) Provides security pursuant to Section 15.01.240; and
- (5) Agrees to pay all applicable fees.

C. The City Engineer approves the assignment. The City Engineer may disapprove an assignment for cause and shall not unreasonably withhold approval.

#### **§15.01.330 No improvements planned**

Where an applicant does not plan to construct permanent improvements on the site, or plans to leave portions of the site graded but unimproved, applicant must meet all the requirements of this Chapter.

#### **15.01.340 Grading permit, paving**

No person shall construct pavement surfacing on natural or existing grade for the purpose of a private road, parking lot or travelway without a valid grading permit, unless waived by the City Engineer. Resurfacing or maintenance of existing paved surfaces shall be exempt from this requirement.

#### **§15.01.350 Grading permit, drainageway alteration**

No person shall alter an existing watercourse, channel, or revetment by excavating, or placing fill, rock protection or structural improvements without a valid grading permit, unless waived by the City Engineer, or unless the work is performed as interim protection under an emergency situation (Section 15.01.140.F).

#### **§15.01.360 Excavation blasting permit**

No person shall possess, store, sell, transport or use explosives and/or blasting agents in violation of any existing laws or ordinances or do any excavation by explosives or blasting without a grading permit and without a separate blasting permit issued by the City Fire Department.

#### **§15.01.370 Truck haul permit**

A truck haul permit shall be obtained from the City Engineer for the movement over a City street of any excavated or fill material to or from any property in the City or to or from any property outside the City which has direct access to a City street. This requirement shall not be applicable, however, to any quarrying operations nor to any

transportation of materials not exceeding fifty (50) cubic yards from any one site. Before issuing a truck haul permit for moving excavated material over a City street, the City Engineer shall collect a fee as approved by resolution of the City Council.

**§15.01.380 Issuance of grading permits**

The City Engineer may issue a grading permit upon receipt and approval of the items listed in Section 15.01.150. Permits shall be issued subject to the following conditions:

A. The permittee shall maintain a copy of the permit and all approved plans and reports required under Sections 15.01.150 and 15.01.400.B, on the work site, and the permit, plans and reports shall be available for public inspection during all working hours;

B. The permittee shall, at all times, conduct operations in conformity with approved site map, grading plan, and other required plans and reports.

C. The permittee shall comply with other conditions imposed by the City Engineer as are reasonably necessary to prevent the proposed operations from being conducted in such a manner as to constitute or create a nuisance or a hazard to life, property, or the environment. Such conditions may include but are not limited to:

- (1) The route and time of travel over public streets so as to cause the least interference with general traffic and to cause the least damage to public streets;
- (2) The removal of rock, earth or other material that may be deposited on public streets by reason of said grading operations;
- (3) The payment to City of the cost of repairing damage to public streets caused by trucking operations in connection with said grading operations;
- (4) The installation of suitable fencing, barricades, signage, and lighting surrounding the grading operations.

D. The permittee shall implement temporary erosion control as necessary to protect public and private property, and as required in Section 15.01.180. Temporary erosion control shall be continuous throughout the work.

E. Permittee shall be knowledgeable of the conditions and/ or restrictions of the grading permit as outlined in applicable sections of this Chapter, and as contained on the approved site map, grading plan, and other required plans and reports.

**§15.01.390 Time and noise limitations on grading operations**

A. The time and noise limitations on all grading operations shall be those set forth for construction activities in Chapter 8.28, Noise Control, of this Code.

B. No grading work shall be performed during hours other than the normal working hours of the City Public Works Department's inspection and maintenance personnel without approval of the City Engineer and without first obtaining a special permit for such work from the City Engineer. Before issuing a special permit for such work, the City Engineer shall collect a fee as approved by resolution of the City Council. Permitted hours of operation may be shortened by the City Engineer's finding of a previously unforeseen effect on the health, safety or welfare of the surrounding community.

**§15.01.400 Implementation of permits; permittee's duties**

In addition to performing as required under Section 15.01.380:

A. The permittee shall request an inspection of the site by the City Engineer at each of the stages of the grading operation listed below. The City Engineer shall approve the work inspected or notify, in writing, the permittee or owner wherein it fails to comply with the approved grading plans or any other applicable requirement. Any portion of the work that does not comply with the grading plans or other applicable requirement shall be corrected. The stages of work at which inspections shall be requested are:

- (1) Initial: when the permittee is ready to begin grading work;
- (2) Rough grading: when all rough grading has been completed;
- (3) Interim erosion control: the installation of all interim erosion control devices and the completion of planting revegetation requirements;
- (4) Final: readiness of the site for final inspection, including, but not limited to, finished grading, installation of drainage devices and final erosion control measures.

B. Permittee shall submit status reports to the City Engineer with revised work schedules required by Section 15.01.230, or other reports as required by City Engineer, for the City Engineer's approval if:

- (1) There are delays in obtaining materials, machinery, services, or manpower necessary to the implementation of the grading, interim, or final plans as scheduled;
- (2) There are any delays in excavation, land-disturbing, filling activities, or soil storage;
- (3) The work is not being done in conformance with any approved grading plans;
- (4) There are any delays in the implementation of the interim or final plans.

C. Permittee shall submit recommendations for corrective measures, if necessary and appropriate, with the reports made under Subsection B of this Section, unless the City Engineer waives the requirement.

**§15.01.410 Implementation of permits – requirements of City Engineer**

A. The permittee shall submit all reports as may be required in this Section and in Sections 15.01.380 and 15.01.400 to the City Engineer for review. The City Engineer may require permittee to modify the site map and grading plan, interim or final plans, and maintenance methods and schedules. The City Engineer shall notify the permittee in writing of the requirement to modify and may specify a specific period of time within which permittee must comply. All modifications are subject to the City Engineer's approval.

B. The City Engineer may inspect the site:

- (1) Upon receipt of any report by permittee under provisions of Section 15.01.400.B;
- (2) To verify completion of modifications required under Subsection A of this Section;
- (3) During and following any rainfall;
- (4) At any other time, at the City Engineer's discretion.

C. Upon completion of the rough grading work and at the final completion of the work, the City Engineer may require the following reports and drawings and supplements thereto:

- (1) An as-graded grading plan prepared by the civil engineer who prepared the approved grading plan, including original ground surface elevations, as-graded ground surface elevations, lot drainage patterns and locations and elevations of all surface and subsurface drainage facilities. The civil engineer shall provide a statement that the work was done in general conformance with the final approved grading plan;
- (2) A soil grading report prepared by the soils engineer including locations and elevations of field density tests, summaries of field and laboratory tests, and other substantiating data and comments on any changes made during grading and their effect on the recommendations made in the soil engineering investigation report. The soils engineer shall provide a statement as to compliance of the work with his/her recommendations and as to the adequacy of the site for the intended use;
- (3) An engineering geology report prepared by the geologist containing a final description of the geology of the site including any new information disclosed during the grading and the effect of same on recommendations incorporated in the approved grading plan. The geologist shall provide a statement as to

compliance of the work with his/her recommendations and as to the adequacy of the site for the intended use as affected by geologic factors.

D. No person shall in any way hinder or prevent the City Engineer or any of his/her authorized representatives from entering and inspecting any property on which grading has been or is being done.

#### **§15.01.420 Grading inspection**

A. All grading operations for which a permit is required shall be subject to inspection by the City Engineer. When required by the City Engineer, special inspection of grading operations and special testing shall be performed according to the provisions of Subsection B of this Section.

B. In addition to complying with all requirements of the California Building Code, as amended by this Chapter, "regular grading" and "engineered grading" applicants/permittees shall be subject to and comply with the following:

- (1) Engineered and Regular Grading Designation. Grading in excess of one thousand (1000) cubic yards and/or ten (10) feet vertical depth of cut and/or fill shall be performed according to approved grading plan prepared by a civil engineer, and shall be designated as "engineered grading." Grading involving less than one thousand (1000) cubic yards and/or less than ten (10) feet vertical depth of cut and/or fill shall be designated "regular grading" unless the applicant/permittee, with the City Engineer's approval, or the City Engineer, independently, chooses to have the grading performed as "engineered grading."
- (2) Engineered Grading Requirements. For engineered grading, it shall be the responsibility of the civil engineer who prepares the approved grading plan to incorporate all recommendations from the soil engineering and engineering geology reports into the grading plan. He/she shall also be responsible for the professional inspection and approval of the grading within his area of technical specialty. This responsibility shall include, but need not be limited to, inspection and approval as to the establishment of line, grade, and drainage of the development area. The civil engineer shall act as the coordinating agent if the need arises for liaison between the other professionals, the contractor and the City Engineer. The civil engineer shall also be responsible for the preparation of revised plans and the submission of as-graded grading plans and compliance statements upon completion of the work.
- (3) Soils Engineering and Engineering Geology Requirements. Soils engineering and engineering geology reports shall be required at the discretion of the City Engineer. During grading, all necessary reports, compaction data, soils engineering and engineering geology recommendations shall be submitted to the owner, the geologist, the civil engineer, and the City Engineer by the soils

engineer and the engineering geologist. Areas of responsibility shall be as follows:

- (a) The soils engineer's area of responsibility shall include, but need not be limited to, the professional inspection and approval concerning the preparation of ground to receive fills, testing for required compaction, stability of all finish slopes, and the design of buttress fills, where required, incorporating data supplied by the engineering geologist.
  - (b) The engineering geologist's area of responsibility shall include, but need not be limited to, professional inspection and approval of the adequacy of natural ground for receiving fills and the stability of cut slopes with respect to geological matters and the need for subdrains or other groundwater drainage devices. He/she shall report the findings to the owner, the soils engineer, the City Engineer and the civil engineer.
  - (c) The City Engineer shall inspect the project as required under Section 15.01.410 and at any more frequent interval necessary to determine that the professional consultants are exercising adequate control.
- (4) Regular Grading Requirements. The City Engineer may require the permittee to provide inspection and testing by a professional testing company acceptable to the City Engineer. The testing agency's responsibility shall include, but need not be limited to, approval concerning the inspection of cleared areas and benches to receive fill, and the compaction of fills. When the City Engineer has reasonable cause to believe that geologic factors may be involved, the grading operation will be required to conform to "engineered grading" requirements.
- (5) Notification of Noncompliance. If, in the course of fulfilling their responsibility under this Section, the civil engineer, the soils engineer, the engineering geologist, or the testing agency finds that the work is not being done in conformance with this Section or the approved grading plans, the discrepancies shall be reported immediately in writing to the person in charge of the grading work and to the City Engineer (see Section 15.01.400). Recommendations for corrective action measures, if necessary, shall be submitted.
- (6) Transfer of Responsibility for Approval. If the civil engineer, the soils engineer, the engineering geologist, or the testing agency of record is changed during the course of the work, the work shall be stopped until the replacement has agreed to accept the responsibility within the area of their technical competence for approval upon completion of the work.

**§15.01.430 Completion of work**

A. Final Reports. Upon the completion of the rough grading work and at the final completion of the work, the City Engineer may require the following reports and drawings and supplements thereto:

- (1) An as-graded grading plan prepared by the civil engineer who prepared the approved grading plan, including original ground surface elevations, as-graded ground surface elevations, lot drainage patterns and locations and elevations of all surface drainage facilities. The civil engineer shall state that to the best of his/her knowledge the work was done according to the final approved grading plan;
- (2) A soil grading report prepared by the soils engineer, including locations and elevations of field density tests, summaries of field and laboratory tests, and other substantiating data and comments on any changes made during grading and their effect on the recommendations made in the soils engineering investigation report. The civil engineer shall render a finding as to the adequacy of the site for the intended use as affected by geologic factors;
- (3) A geologic grading report prepared by the engineering geologist, including a final description of the geology of the site and any new information disclosed during the grading and the effect of same on recommendations incorporated in the approved grading plan. The engineering geologist shall render a finding as to the adequacy of the site for the intended use as affected by geologic factors.

B. Notification of Completion. The permittee or his/her agent shall notify the City Engineer when the grading operation is ready for final inspection. Final approval shall not be given until all work, including installation of drainage facilities and their protective devices and all erosion control measures have been completed according to the final approved grading plan and the required reports have been submitted.

**§15.01.440 Removal of ground cover**

A. All debris from clearing and grubbing shall be removed from the site within three (3) months from the completion of that activity.

B. During the dry season, the natural vegetative ground cover of any watershed shall not be destroyed or removed more than thirty (30) days prior to grading. During the wet season, such ground cover shall not be destroyed or removed more than five (5) days prior to such grading. The City Engineer may grant an extension of time when justified by the circumstances.

**§15.01.450 Wet season grading**

A. Commencement or continuation of any grading during the wet season is prohibited unless the City Engineer grants permission as provided in this Section.

B. The City Engineer may, at his or her discretion, grant permission to commence or continue grading during the wet season, on the basis of the information submitted by the applicant or permittee, weather forecasts, experience or any other factors which he or she may consider pertinent, so long as such grading will not cause a hazardous condition, erosion, or sedimentation to occur or continue.

C. For continuance of wet season grading activities other than installation, maintenance or repair of measures in the interim or final erosion control plan, applicant/permittee shall submit evidence to the City Engineer, as often as the City Engineer requires, demonstrating that erosion and sedimentation are being effectively controlled.

D. Applicant/permittee's failure to submit the required information to obtain permission for wet season grading activity shall result in suspension or revocation of the grading permit, action against the security, filing a lien on the property to recover City's costs, and/or prosecution as provided in Sections 15.01.550 through 15.01.580 of this Chapter.

#### **§15.01.460 Cuts**

A. General. Unless otherwise recommended in the approved soil engineering and/or engineering geology report, and specifically waived by the City Engineer, cuts shall conform to the provisions of this Section and in accordance with Figures 1 and Figure 2 of this Chapter.

B. Cut slopes. Cut slopes shall be no steeper than two to one (2:1 - two horizontal to one vertical) unless otherwise justified in the soil engineering or engineering geology report. Justification shall consist of a geotechnical slope stability analysis acceptable to the City Engineer, with factors of safety in proportion to the affected structures and type of loading (e.g. earthquake). The factors of safety to be analyzed shall be those determined at the discretion of the City Engineer.

C. Slope adjustments. The City Engineer may require that the excavation be made with cut face flatter in slope than two (2) horizontal and one (1) vertical if he/she finds the material in which the excavation is to be made is unusually subject to erosion, or if other conditions make such flatter slope necessary for stability and safety.

D. Drainage and Terracing. Drainage and terracing shall be provided as required by Section 15.01.490.

#### **§15.01.470 Fills**

A. General. Unless otherwise recommended in the approved soil engineering report and/or engineering geology report, and specifically waived by the City Engineer, fills shall conform to the provisions of this Section and Figure 1 and Figure 2 of this Chapter. In the absence of an approved soils engineering report, these provisions may be waived for minor fills not intended to support structures.

B. Fill Location. Fill slopes shall not be constructed on natural slopes steeper than two to one (2:1), or where the fill slope terminates above a planned or existing cut slope, within a horizontal distance equal to one-third (1/3) of the vertical height of the fill, unless specifically addressed in the soils engineering report or the engineering geology report and approved by the City Engineer.

C. Preparation of Ground. The ground surface shall be prepared to receive fill by removing vegetation, noncomplying fill, top-soil and other unsuitable materials scarifying to provide a bond with the new fill and, where slopes are steeper than five to one (5:1), and the height is greater than five (5) feet, by benching into sound bedrock or other competent material as determined by the soils engineer. The bench under the toe of a fill on a slope steeper than five to one (5:1) shall be at least ten (10) feet wide. The area beyond the toe of fill shall be sloped for sheet overflow, or a paved drain shall be provided. Where fill is to be placed over a cut, the bench under the toe of fill shall be at least ten (10) feet wide, but the cut must be made before placing fill and shall be approved by the soils engineer and engineering geologist as suitable foundation for fill. Unsuitable soil is soil that, in the opinion of the building official or the civil engineer or the soils engineer or the geologist, is not competent to support other soil or fill, to support structures or to satisfactorily perform the other functions for which the soil is intended.

D. Fill Material. Detrimental amounts of organic material shall not be permitted in fills. Except as permitted by the City Engineer, no rock or similar irreducible material with a maximum dimension greater than eight (8) inches shall be buried or placed in fills.

Exception: the City Engineer may permit placement of larger rock when the soils engineer properly devises a method of placement, continuously inspects its placement, and approves the fill stability. The following conditions shall also apply:

- (1) Prior to issuance of the grading permit, potential rock disposal areas shall be delineated on the grading plan.
- (2) Rock sizes greater than eight (8) inches in maximum dimension shall be ten (10) feet or more below grade, measured vertically.
- (3) Rocks shall be placed so as to assure filling of all voids with fines.

E. Compaction. All fills shall be compacted to a minimum of ninety (90) percent of maximum density as determined by Appendix J of the 2010 California Building Standards Code or equivalent, as approved by the City Engineer. Field detwo to one (2:1) if he or she finds the material of which the fill is to be made is unusually subject to erosion, or if other conditions make such flatter slope necessary for stability and safety.

G. Drainage and Terracing. Drainage and terracing shall be provided and the area above fill slopes and the surfaces of terraces shall be graded and paved as required by Section 15.01.490.

#### **§15.01.480 Setbacks**

A. General. The setbacks and other restrictions specified by this Section are minimum and may be increased by the City Engineer or by the recommendations of a civil engineer, soils engineer, or engineering geologist, if necessary for safety and stability or to prevent damage of adjacent properties from deposition or erosion or to provide access for slope maintenance and drainage. Retaining walls may be used to reduce the required setbacks when approved by the City Engineer.

B. Setbacks from Property Lines. The tops of cuts and toes of fill slopes shall be set back from the outer boundaries of the permit area, including slope-right areas and easements, in accordance with Figure 2 of this Chapter. The tops and toes of cut and fill slopes shall be set back from property lines and structures as far as necessary to provide for safety of adjacent property, safety of pedestrians and vehicular traffic, required slope rounding, adequate foundation support, required swales, berms, and drainage facilities, and applicable zoning requirements. Except for pier-type foundations or other special foundation design, setbacks shall not be less than as shown on Figure 2 of this Chapter.

#### **§15.01.490 Drainage and terracing**

A. General. Unless otherwise indicated on the approved grading plan, drainage facilities and terracing shall conform to the provisions of this Section.

B. Terrace. Terraces at least six (6) feet in width shall be established at not more than thirty (30) feet vertical intervals on all cut or fill slopes to control surface drainage and debris, except that where only one terrace is required, it shall be at mid-height. For cut or fill slopes greater than sixty (60) feet and up to one hundred twenty (120) feet in vertical height, one terrace at approximately mid-height shall be twelve (12) feet in width. Terrace width and spacing for cut and fill slopes greater than one hundred twenty (120) feet in height shall be designed by the civil engineer who prepares the approved grading plan and approved by the City Engineer. Suitable access shall be provided to permit proper cleaning and maintenance. Swales and ditches shall comply with the following requirements:

- (1) Swales or ditches on terraces shall have a minimum gradient along and towards the ditch of five (5) percent unless approved by the City Engineer and must be paved with reinforced concrete not less than three (3) inches in thickness or an approved equal paving. They shall have a minimum depth at the deepest point of one (1) foot and a minimum, paved width of three (3) feet or as required by the City Engineer.
- (2) A single run of swale or ditch shall not exceed a length of one hundred fifty (150) feet or collect runoff from a tributary area exceeding thirteen thousand five hundred (13,500) square feet (projected) without discharging into a down drain, unless approved by the City Engineer.

C. Subsurface Drainage. Cut and fill slopes shall be provided with subsurface drainage as necessary for stability.

D. Disposal. All drainage facilities shall be designed to carry waters to the nearest practicable drainage way approved by the City Engineer and/or other appropriate jurisdiction as a safe place to deposit such waters. Erosion of ground in the area of discharge shall be prevented by installation of nonerosive down drains or other devices. Building pads shall have a drainage gradient of two (2) percent toward approved drainage facilities, unless waived by the City Engineer.

Exception: the gradient from the building pad may be one (1) percent if all the following conditions exist throughout the permit area:

- (1) No proposed fills are greater than ten (10) feet in maximum depth;
- (2) No proposed finish cut or fill slope faces have a vertical height in excess of ten (10) feet;
- (3) No existing slope faces, which have a slope face steeper than ten (10) horizontally to one (1) vertically, have a vertical height in excess of ten (10) feet;
- (4) A two (2) percent gradient is provided for the first five (5) feet adjacent to the structure.

E. Interceptor Drains. Adequate provision shall be made to prevent any surface waters from damaging the cut face of an excavation or the sloping surface of a fill. At the discretion of the City Engineer, paved interceptor drains shall be installed along the top of all cut slopes where the tributary drainage area above slopes towards the cut and has a drainage path greater than forty (40) feet measured horizontally. Interceptor drains shall be paved with a minimum of three (3) inches of concrete or gunite and reinforced. They shall have a minimum depth of twelve (12) inches and minimum paved width of thirty (30) inches measured horizontally across the drain or as required by the City Engineer. The slope of drain shall be subject to the City Engineer's approval.

#### **§15.01.500 Import and export of earth material**

On project sites where earth materials are moved on public roadways from or to the site, the following requirements shall apply:

A. Dust control shall be implemented as specified in Section 15.01.510 below. The permittee shall be responsible for maintaining public rights-of-way used for hauling purposes in a condition free of dust, earth, or debris attributable to the grading operation.

B. Loading and hauling of earth from or to the site must be accomplished within the limitations established in Section 15.01.390 of this Chapter.

C. Access roads to the premises shall be only at points designated on the approved grading plan. Access roads shall include stabilized construction entrances and/or other BMPs as required by the City Engineer.

D. The last fifty (50) feet of the access road, as it approaches the intersection with the public roadway, shall have a grade not to exceed three (3) percent. There shall be a clear, unobstructed sight distance of three hundred (300) feet to the intersection from both the public roadway and the access road. If the three hundred (300) feet sight distance cannot be obtained, flagmen and/or signs shall be posted.

E. A stop sign conforming to the requirements of the California Vehicle Code shall be posted at the entrance of the access road to the public roadway.

F. An advance warning sign, conforming to the requirements of the current California Manual for Uniform Traffic Control Devices, shall be posted on both sides of the access intersection. The advance warning sign shall be covered or removed when the access intersection is not in use.

#### **§15.01.510 Dust control**

The movement of earth materials either within, to, or from a site shall require the implementation of dust control measures in accordance with the BAAQMD CEQA Guidelines and any additional measures that the City Engineer deems to be necessary and appropriate. As determined by the City Engineer, a water truck shall be continuously present on-site to assure maximum control.

#### **§15.01.520 Protection of adjoining property**

In accordance with California Civil Code Section 832, each adjacent owner is entitled to the lateral and subjacent support that his/her land receives from the adjoining land, subject to the right of the owner of the adjoining land to make proper and usual excavations on the same for purposes of construction or improvement as provided by law.

#### **§15.01.530 Removal of hazards**

Whenever the City Engineer determines that any existing excavation, embankment, or fill on private property has become a hazard to any person, endangers property, or adversely affects the safety, use, or stability of a public way or drainage channel, the owner of the property upon which the excavation or fill is located, or other person or agent in control of such property, upon receipt of notice from the City Engineer, shall immediately repair or eliminate such excavation or embankment so as to remove the hazard and to conform with the requirements of this Chapter. Notice from the City Engineer to remove a hazard may be verbal if the hazard presents an immediate threat of injury or damage, and as soon as reasonably possible thereafter, the verbal notice shall be followed by a written notice from the City Engineer.

#### **§15.01.540 Post-grading procedures**

Upon completion of final grading and permanent improvements, where such permanent improvements are planned at the time grading is performed, permittee shall notify the City Engineer that the grading is completed. The City Engineer shall review the grading performed, and the final reports required in Section 15.01.430, and, if found in substantial conformance to the permit conditions, the City Engineer may release the unexpended and unencumbered amount of the cash deposit and initiate the release of the security bonds posted by the permittee in accordance with Section 15.01.590.

**§15.01.550 Revocation or suspension of permits**

A. The City Engineer may suspend any grading permit for the violation of any condition of the permit, the violation of any provision hereof or any other applicable law or ordinance, or the existence of any condition or the doing of any act constituting or creating a nuisance, threatening water quality, or endangering life, property, or the environment. Upon written notification of suspension of a permit, the permittee shall cease all work on the work site, except work necessary to remedy the cause of the suspension.

B. Following the suspension, the permittee shall be granted a hearing by the City Engineer within five (5) days of the written notice of suspension. The notice shall state, generally, the grounds of complaint and the time and place where such hearing will be held.

C. At the conclusion of said hearing, and within thirty (30) days thereafter, the City Engineer shall make his/her findings and notify, in writing, the permittee of the action taken.

D. If the permittee, after written notice of suspension, fails or refuses to cease work, as required under Subsection A of this Section, the City Engineer may revoke the permit.

E. The City Engineer may reinstate a suspended permit upon the permittee's correction of the cause of the suspension.

F. The City Engineer shall not reinstate a revoked permit.

**§15.01.560 Violation - penalties**

A. The violation of any of the provisions of this Chapter shall constitute a misdemeanor, punishable by the fines, penalties and enforcement provisions set forth in Chapters 1.14, 1.16 and 1.18 of this Code.

B. Where a violation of any of the provisions of this Chapter is determined by the City to have been willful, reckless, or grossly negligent, then in addition to the fines, penalties and enforcement provisions referenced in Paragraph A above or set forth elsewhere in this Code, the City may impose a supplemental fine of up to ten thousand dollars (\$10,000) for each violation.

**§15.01.570 Action against the security**

The City Engineer may retain and/or execute security required by Section 15.01.240 if one of the conditions listed in Subsections A through D below exists. The City Engineer shall use funds from the appropriate security to finance remedial work undertaken by the City or private contractor under contract to the City, and to reimburse the City for all direct costs incurred in the process of the remedial work, including but not limited to the following conditions:

A. The permittee ceases land-disturbing activities and/or filling and abandons the work site prior to the completion of the work shown on the site map, grading plan and revegetation plan (if applicable) ;

B. The permittee fails to conform to the conditions of the grading permit as approved or as modified under Section 15.01.380 and has had his/her permit revoked under Section 15.01.550;

C. The techniques utilized under the interim or final erosion control plan fail within one (1) year of installation, or before a final erosion control plan is implemented for the site or portions of the site, whichever is later;

D. The City Engineer determines that action by the City is necessary to prevent excessive erosion from occurring on the site.

**§15.01.580 Public nuisance abatement**

A. The City Council finds and declares that any work site on which grading has been started and has been abandoned or is not completed according to the site plan, grading plan, and grading permit, or on which the interim or final erosion control facilities have failed, or where on-site grading and erosion control facilities either are not working properly or are inadequate or incomplete, creates a danger to public health, safety and welfare, and constitutes a public nuisance. All duties of the City Manager under this Chapter may be delegated to other officers, agents or employees of the City.

B. The public nuisance abatement procedures provided in this Section are, at the City's option, alternative or additional to the procedures provided in Sections 15.01.570 and 15.01.530 of this Chapter, or to any applicable procedures provided by this Code, including Chapters 1.14, 1.16, 1.18, 8.38, or any other City ordinance, or provided by state law.

C. The City Manager is authorized to abate each and every such nuisance or cause the same to be abated in the manner provided by the provisions of this Section.

D. Before abating any condition which is declared to be a public nuisance, the City Manager shall post upon or in front of the property on which such nuisance exists, a notice which shall be substantially in the following form:

NOTICE TO ABATE NUISANCE OR REMOVE HAZARD

Notice is hereby given that the following activity/condition on the property located at \_\_\_\_\_, in the City of Brisbane, County of San Mateo, State of California, identified as Assessors Parcel Number \_\_\_\_\_ constitutes a violation of the City of Brisbane Grading Ordinance or a violation of a permit or approval issued pursuant to such Ordinance:

\_\_\_\_\_  
\_\_\_\_\_

Such condition creates a danger to the public health, safety, and welfare and is a public nuisance which must be abated by immediately by taking the following corrective action:

\_\_\_\_\_  
\_\_\_\_\_

If said nuisance is not abated or said hazard is not removed within \_\_\_\_\_ days from and after the date of posting of this notice, or if good cause is not shown to the undersigned within said time why such corrective action should not be taken, the City will abate such nuisance by removing or causing to be removed said hazard and completing or causing to be completed the corrective action described above, and in such event, the cost and expense of such removal and abatement will be specifically assessed upon or against the parcel of land from which the hazard is removed and on which the corrective action is completed, and such assessment will constitute a lien upon the property until paid.

All interested persons having any objection to the above shall present such objections to the undersigned City Manager at City Hall, 50 Park Place, Brisbane, California 94005, within \_\_\_\_\_ days from and after the posting, herein specified, of this notice.

Posted/Mailed this \_\_\_\_\_ day of \_\_\_\_\_, 20\_\_

CITY MANAGER OF THE  
CITY OF BRISBANE

By: \_\_\_\_\_

E. Before abating any condition which is declared to be a public nuisance in this Section, the City Manager, in addition to posting of notice or notices as provided by Subsection (D) of this Section, may mail, or cause to be mailed, to the person or persons who are designated on the last equalized assessment roll of the county of San Mateo, as owner or owners of the parcel of land on which such nuisance exists, at their address or addresses as shown on the last equalized assessment roll, a written notice or notices which shall be substantially in the same form shown in Subsection (D) above.

F. The owner or owners of any private parcel of land within or upon which a public nuisance, as described in this Section, exists, have a duty to abate such nuisance at his, her or their own cost and expense by removing any hazard and completing any planned

permitted grading within the time prescribed in the notice which is posted upon such property, or if notice is given by mail within the time prescribed in the mailed notice. If such owner or owners fail to abate such nuisance within said time, and if, in addition, they fail to show cause to the satisfaction of the City Manager why said nuisance should not be abated, then in that event the City may abate said nuisance or cause same to be abated.

G. In order to abate said nuisance, the City may cause the removal of said nuisance and complete the planned permitted work, or perform such other work as may be necessary or appropriate to abate the nuisance or may cause a licensed contractor to abate the nuisance in such manner for reasonable rates not in excess of prevailing rates for similar work within the City.

H. In the event the City Manager finds that any public nuisance, above described in this Section, within or upon any parcel of land is so serious and presents such an immediate menace or danger to the public health, safety and welfare that such nuisance should be immediately abated without first posting or mailing notices, as above provided, and without first giving the owner or owners of said parcel further time to abate the same, then in that event the City Manager may immediately abate said nuisance or cause the same to be abated in the manner provided in subsection (G) of this Section without first posting or mailing any notices and without giving the owner or owners of the parcel further time to abate the same. However, the City Manager, if he or she abates such nuisance, shall prepare and file in his or her office a written report describing the location, nature and extent of the public nuisance and setting forth the reasons why he or she had to abate it immediately, as aforesaid, and he or she shall cause a copy of said report to be mailed within ten (10) days from and after completion of such abatement, to the owner or owners of the parcel within or upon which nuisance existed, as such owner or owners are shown on the last equalized assessment roll of the county of San Mateo, at their addresses as shown on said roll.

I. The City Manager shall keep a record of the cost and expense incurred by him or her in abating or causing to be abated, pursuant to this Section, each public nuisance within or upon each separate parcel of land. To said costs and expenses, the City Manager shall add an amount for overhead and administration and incidental expenses and shall submit them to the City Council for confirmation of an itemized written report showing all costs and expenses incurred by the City in abating each public nuisance.

J. A copy of City Manager's report to the City Council shall be posted for at least ten (10) days prior to its submission to the City Council at the usual place where City notices are posted, together with a notice of the time and place when and where it will be submitted to the City Council for a hearing. The notice shall state a time and place when and where property owners may appear and object to any matter contained in the report.

K. At the time fixed for receiving and considering the report, the City Council shall hear it with any objections of the property owners liable to be assessed for the abatement. It may modify the report if it is deemed necessary. If the City Council finds the report to be acceptable, it shall confirm the report by resolution.

L. After confirmation of the report, a certified copy of the same shall be filed with the County of San Mateo. The description of the parcels reported shall be those used for the same parcels on the county's assessor's map books for the current year.

M. The cost of abatement within or upon each parcel of land, as confirmed, constitutes a special assessment against that parcel, and upon such confirmation it is a lien on the parcel. Laws relating to the levy, collection and enforcement of county taxes apply to such special assessment taxes. The appropriate county official shall enter each assessment on the county tax roll opposite the parcel of land. The amount of the assessment shall be collected at the time and in the manner of ordinary municipal taxes. If delinquent, the amount is subject to the same penalties and procedures of foreclosure and sale provided for ordinary municipal taxes.

N. As an alternate method, the county tax collector, in his or her discretion, may collect the assessments without reference to the general taxes by issuing separate bills and receipts for the assessments.

O. The City Finance Director may receive the amount due on the abatement cost and issue receipts at any time after confirmation of the report and until July 1st of the calendar year in which the report is confirmed. If the cost is paid in full, no report shall be filed with the County of San Mateo to levy a special assessment for such cost.

P. The City Council may order refunded all or part of a special assessment paid pursuant to this Section if it finds that all or part of the special assessment has been erroneously levied. A special assessment or part shall not be refunded unless a claim is filed on or before March 1st next following the date the tax became due and payable. The claim shall be verified by the person who paid the tax, or his or her duly authorized representative.

**§15.01.590 Release of security**

Security deposited with the City for faithful performance of the grading, revegetation (if applicable), and erosion control work, and to finance necessary remedial work shall be released according to the following schedule:

A. Securities held against the successful completion of the work shown on the site map, grading plan and the interim plan, shall be released to the permittee at the termination of the permit, or the satisfactory completion of the grading operations, provided no action against such security is filed prior to that date;

B. Securities held against the successful completion of the work shown on the final plan shall be released to the permittee either one (1) year after termination of the permit or when the final plan is approved as completed, or when the City Planning Department approves a final revegetation monitoring report, whichever is later, provided no action against such security has been filed prior to that date.

**§15.01.600 Cumulative enforcement procedures**

The procedures for enforcement of a permit, as set forth in this Chapter, are cumulative and not exclusive.

FIGURE 1

NOTE. No rounding at ledges.

FIGURE 2

Table A

Min. Setback From Adjacent Slope					
H (hgt) Feet	a	b	c	d	e
0 < 5	3'	7'	3'	5'	1'

14-30	5'	H/2 10' Max	H/2	H/2 10' Max	H/5
+30	5'	10'	15'	10'	6'

Table B

H (hgt) Feet	Max. Hw.	Min. Setback
0-5	3'	3' Min.
6-12	H/2	H/2
12-30	6'	H/2
+30	6'	15'

Fig. A

Fig. B

NOTES:

PA means permit area boundary and/or property line; 1. MFD means manufactured surface.

Setbacks shall also comply with applicable zoning 2. regulations.

Table A applies to manufactured slopes and 2:1 or 3:1 steeper natural slopes. Setbacks from natural slopes flatter than 2:1 shall meet the approval of the City Engineer.

"b" may be reduced to 5' minimum if an approved 4. drainage device is used; roof gutters and downspouts may be required.

"b" may be reduced to less than 5' if no drainage is 5. carried on this side and if roof gutters are included.

If the slope between "a" and "b" levels is replaced 6. by a retaining wall, "a" may be reduced to zero and "b" remains as shown in Table A. The height of the retaining wall shall be controlled by zoning regulations.

"b" is measured from the face of the structure to the 7. top of the slope.

"d" is measured from the lower outside edge of the 8. footing along a horizontal line to the face of the slope. Under special circumstances "d" may be reduced or recommended in the approved soil report and approved by the City Engineer.

The use of retaining walls to reduce setbacks (Fig. 9. B) must be approved by the City Engineer.

"f" may be reduced if the slope is composed of sound 10. rock that is not likely to produce detritus and is recommended by the soil engineer or engineering geologist and approved by the City Engineer.

"a" and "e" shall be 2' when PA coincides with 11. Arterial or local street right-of-way and when improved sidewalk is adjacent to right-of-way.

"e" shall be increased as necessary for interceptor 12. drains.

**SECTION 2**            Section 17.32.220 in Chapter 17.32 of the Municipal Code is amended to read as follows:

**§17.32.220    Grading permit; when review by Planning Commission is required.**

A.     Grading permits to be issued by the Director of Public Works/City Engineer pursuant to Chapter 15.01 of this Code shall be subject to review by the Planning Commission when required by the provisions of Subsection 15.01.110.A of this Code. The review shall be based upon a consideration of the following potential impacts of the proposed grading:

- (1)    Will the proposed grading be minimized and designed to reflect or fit comfortably with the natural topography?
- (2)    Will the proposed grading be designed to avoid large exposed retaining walls?
- (3)    Will the proposed grading be designed to minimize removal of:
  - (i)     existing street trees, (see Section 12.12.020);
  - (ii)    any California Bay Laurel, Coast live Oak or California Buckeye trees;
  - (iii)   three or more trees of any species on the same site having a circumference of at least 30 inches measured 24 inches above grade?

Where removal of existing trees is necessary, do the landscape plans for the project include the planting of appropriate replacement trees?

B.     The Planning Commission may provide comments and recommendations to the City Engineer concerning mitigation or avoidance of any potential adverse impacts of the proposed grading considered by the Commission pursuant to this Section.

**SECTION 3:**            If any section, subsection, sentence, clause or phrase of this Ordinance is for any reason held by a court of competent jurisdiction to be invalid or unconstitutional, such decision shall not affect the validity of the remaining portions of this Ordinance. The City Council of the City of Brisbane hereby declares that it would have passed this Ordinance and each section, subsection, sentence, clause and phrase thereof, irrespective of the fact that one or more sections, subsections, sentences, clauses or phrases may be held invalid or unconstitutional.

**SECTION 4:** This Ordinance shall be in full force and effect thirty days after its passage and adoption.

\* \* \* \*
