Subject: Re: Sustainability Framework- comments for Commission?

Julia,

Thank you for the note. I would first like to reiterate what was in the Framework transmittal document May 8th: this is an aspirational document but also a guide to both inform the City for any future development and provide an implementation approach for each principle.

I encourage each Commissioner to pay special attention to the implementation approach for each as they provide a bridge between wishes and realizing them. I also encourage each Commissioner to choose his/her "Passion Principle" (e.g. Transportation, Health and Happiness) and add some thoughtful commentary on it for the workshop. Finally, each principle has been thoughtfully crafted so we should do our best to avoid getting caught up in the minutia.

Thank you!

Cheers,
Dave

PS: I will be attending the workshop.
