Subject:

New Skateboard Park Design Request for Proposals

Date:

March 17, 2014

## Purpose:

Provide the Community with a concrete skateboard park geared towards beginner to intermediate skaters.

## **Recommendation:**

City Council direct staff to begin the Request for Proposal Process for the design of a new skateboard park.

#### Background:

At the budget hearings for FY 2013/14 City Council directed the Parks and Recreation Commission to put together a plan of action for the skateboard park including information related to the current users of the park, park location, options to improve the park, best use of the current space, target user group for the park, and alternative funding solutions.

On November 19, 2013 the Parks and Recreation Commission's Teen Services met with the City Council's Facility Committee. There were a number of interested residents and skate park users also at the meeting. The skate park users spoke to the need for a smoother riding surface and a half pipe which did not have nails and screws coming out of it. They also spoke to the benefits it provides the younger children and pre-teens in Brisbane which include exercise, socialization, and safety.

Staff provided information related to the potential cost of developing a design concept of the park and a potential process to move forward. The subcommittee decided to recommend to the City Council to move forward with developing a design for the park. The process that the subcommittee discussed was to have an RFP brought back to the two subcommittees for approval. Then have the results of the RFP brought back to the subcommittees for discussion and potential interviews with the finalists. Have the two subcommittees work with the design firm and the public in developing the proposed design plus alternatives, and then have the City Council choose a proposed design which would have construction documents developed and costed out. The Facilities subcommittee would then recommend a financing plan for the City Council's approval. After the financing was in place the City would then bid out the project to be built. This is a similar process which took place for the construction of the new playground in the Community Park.

On December 16, 2013 City Council approved a process for the rehabilitation of the existing skateboard park (attached). The Council also directed staff to work with a joint subcommittee of the City Council and the Parks and Recreation Commission to develop the Request for Proposal and bring the document back to City Council for approval prior to its release.

# Discussion:

A joint subcommittee of the Parks and Recreation Commission (Teen Services) and the City Council (Facilities) met on March 11, 2014 to review the request for proposal. The proposal as presented to the joint subcommittee requested that the selected design firm develop three different size skateboard parks. The three sizes reflected the size of the current park, a slightly larger park which would incorporate the space around the park to the sidewalks and our property line to the east, and finally the second option, expanded to include about 22 feet of the current basketball court, which would require the City to move the current basketball court to take up the open space between the basketball court and the sidewalk on Park Place. At the meeting a member of the public suggested adding a fourth option which would, instead of expanding the current skatepark into the basketball court, create what is called a skate spot between the basketball court and the sidewalk on Park Place.

Creating a skate spot would allow more users to use the skateboard facilities at the same time. A skateboard park usally has just a few skaters actually skating at a given time and others waiting their turn to use the ramps and elements. If the proposed additional skate spot was opened with just a few elements, it could increase the number of users who could be skating at one time. This could also assist in evening the flow between more experienced skaters and novices at the two locations.

The joint subcommittee agreed with this idea, so the Request for Proposal reflects the four size options.

If approved tonight, it is anticipated the Request for Proposal will be distributed on the 18<sup>th</sup> of March. Staff anticipates setting a due date of April 18<sup>th</sup> for the proposals. After that date, staff and the joint subcommittee will review the proposals and determine which one is best suited for our community. A contract with the recommended design firm will be brought to Council at a future meeting for approval.

## **Fiscal Impact:**

There is no fiscal impact of requesting proposals. If a design firm is chosen there will be a fiscal impact at that time. There is some money available which has been donated for the skatepark, and there are budgetary savings within the Teen Services budget which the Commission recommended be used for the purpose of designing a skatepark.

# **Measure of Success:**

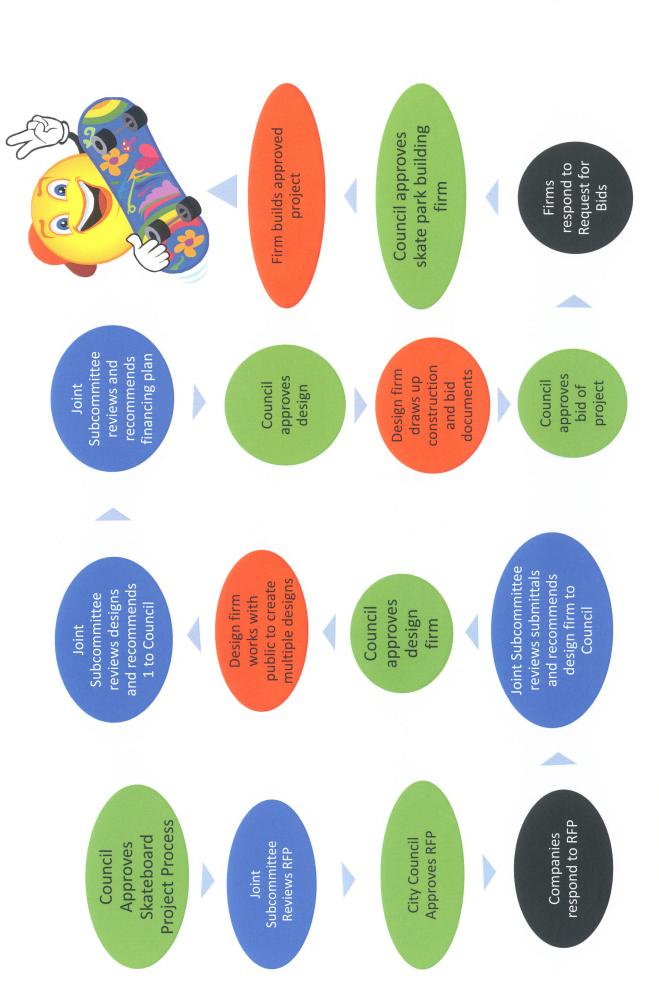

A new, smoother, and longer lasting skateboard park is built which has an increased activity level at all ages.

# REQUEST FOR PROPOSALS DESIGN OF COMMUNITY SKATEPARK

# 1. INTRODUCTION

City of Brisbane is seeking proposals in response to this Request for Proposals (RFP) from a qualified skateboard park design firm or team (Consultant) to produce a conceptual design, final design, and construction documents for a non-supervised public concrete skate park.

The proposed skatepark will provide a safe, designated place for skateboarders to develop their skills and enjoy the company of their peers. The skate park will be state-of-the-art; based on the latest skate park design principles and fit with the character of the Brisbane community. It will feature a mix of street and transition-style terrain, with elements designed for a range of age groups and ability levels as determined by meetings with the stakeholders and approved by City Council.

The City is looking for a company to provide conceptual designs for three potential skate board park sizes. The three sizes are approximately 1) 55' x 75', 2) approximately 70'x80', 3) approximately 70'x90'. A design of an additional skate spot of approximately 22'x70' will also be requested. The concept plans will be developed through a public process of meetings with stake holders and a joint Parks and Recreation Commission and City Council Subcommittee. The proposer should explain their design process including their proposed strategy for public participation, such as the number and types of meetings they will hold with the stakeholders. The design for all three should include concrete surface material, proposed elements (one of which needs to be a half-pipe), construction material for the elements, and budget level estimated cost of construction of the three designs.

After the Subcommittee selects a design to recommend to the City Council, City Council will review and approve the design. If approved, the chosen firm will be asked to provide to the City construction documents, (including plans, base specifications and special provisions) for the skate park with a final detailed estimate of the cost to build.
