**Subject:** Baylands Hearing-Bad things about solar farms

Hi-

I want to share these articles with you on the **Negative effects of solar farms.**

1. **Habitat degradation and harm to wildlife.**

<http://sciencing.com/effects-solar-power-farms-environment-13547.html> and  
[www.eesi.org/articles/view/how-harmful-is-renewable-energy-to-birds](http://www.eesi.org/articles/view/how-harmful-is-renewable-energy-to-birds)

2. **Solar Energy Can Be a Health Hazard**

<http://www.eiwellspring.org/SolarEMFHazard.pdf>

3. **Unknown danger-*nuclear fusion* within the sun.** This process operates on the very *same* basic laws of nuclear physics used in nuclear power plants and atomic bombs! <https://www.lhup.edu/~dsimanek/solar.htm>

4. **Solar farms can effect your property value-** Your property values will go down.

5. **Solar Energy Isn't Always as Green as You Think.** <http://spectrum.ieee.org/green-tech/solar/solar-energy-isnt-always-as-green-as-you-think>

[Do solar panels give off radiation?](#)

Modern solar systems use components that radiate radio frequency electromagnetic radiation, which can cause the symptoms. The main problem is the inverter, which is a device that takes the electricity from the solar panels and turns it into alternating current (AC) and puts it out on the electrical grid.

After reading the articles, ask yourself if you still support the construction of solar farms.

1. Do you want Brisbane Baylands potentially wasted (on solar farm) and "its appearance blighted by solar farm. **I recommend in place of the solar farm to designate as a city park.**
2. Do you want to live near the 100 acre large ground mounted solar site? Please look at below pictures.
3. Do you like the view of solar farm? It will be there permanently if this is approved.
4. How will the Brisbane residents benefit from the solar farm? Nothing
5. Solar panels (glare) may have negative effective on your eyes.

I think Solar farm should be hidden from residential areas.
