

W. Clarke Conway
Cliff Lentz
Baylands Subcommittee
Brisbane City Council
50 Park Place
Brisbane, CA 94005

July 11, 2017

Dear Councilmembers Conway and Lentz

I am unable to attend your Baylands Subcommittee meeting on July 12th instead I'm sending you this message about Dr. Lee. I am very pleased that you are considering his proposal. In the proposal, he mentions that City representatives asked him to submit a proposal for the Landfill and OU1. It is essential that OU2 and Industrial Way be reviewed, as well. The Industrial Way area is in grave need of more information to understand the nature and the scope of the contamination there. OU2 has not been adequately investigated and the groundwater direction is not as well understood in OU2 as it is in OU1.

Since the entire site is integrated by: roadways, utility infrastructure, groundwater pathways, surface water ditches and grading, it is both practical and prudent to understand fully the threat that the contamination in all areas represents sooner rather than later.

I am confident that your goals are: to protect all the people who work on the project, spend time on the land or pass through it and to protect our environment. Those are my goals in advocating that you engage D. Lee and Dr. Jones-Lee to review the entire site and to advise you about what is safe.

I thank-you: for your consideration of my opinion and for your careful deliberation on this proposal.

Sincerely

Clara Johnson
