Comm. Dev. Dept. Brisbane

July 27, 2016

Dear Chair Do and fellow Commissioners,

I support the principles and recommendations outlined in sections 1-3 of Draft Resolution GP-01-06/GP-02-10/SP-01-06. Pending further revisions that strengthen and clarify the points describe in these sections, and based on your measure of public response, my hope is that you will approve and forward this resolution to the City Council.

Thank you for your thoughtful work and your dedication to a thorough examination of the EIR, and to providing ample opportunity for all stakeholders to express their views and analyses. The outcome of this long process demonstrates an understanding that while development of the Baylands may be inevitable, it is possible for it to occur in a way that preserves and enhances open space and habitat, and protects the health and welfare of those who may some day work and recreate in those acres.

Your actions also lay the groundwork for this complicated land to be transformed into a place of positive and sustainable use with the potential to be a source of pride for the future residents of Brisbane and surrounding communities.

Yours truly,

Ceci Herrmann
580 Visitacion Avenue
Brisbane
