Subject: Support for Brisbane Baylands

Dear Planning Commission,

I am a resident and love living in Brisbane just as many of our neighbors do. Brisbane needs to keep up with the times and the changing environment around us. That includes the appropriate levels of development to continue to make Brisbane a desired place to live and work. I support working with UPC to create an appropriate development plan for Brisbane Baylands and trust the Planning Commission will arrive at the best plan. That would mean it would need to be feasible for the development firm and yes, even make them money. Overall, development improves quality of life of residents and surrounding communities. We must also consider the alternative to development which is just a large piece of unused, toxic land. Thank you.

R. Bassford
