**Subject:** Baylands Housing

Dear Council members

You have the task to determine the guidelines of one of the largest open land issues in the Bay Area.

I am concerned about the toxic remediation of this land and I truly feel we will need federal guidance and support to make sure it is safe.

However, I strongly believe it can be addressed and made safe to allow for some housing.

A sustainable project should include affordable housing, improved transit options and best efforts to minimize our precious resources.

Compromises should be made to make this a viable project.

I am one of the 68% who agreed that housing should be considered.

This is not just for Brisbane -- This is a project that will effect the entire county.

Please explore this - And I will respect your decision after all things are considered.
