Subject: Development in the Bay lands

Dear City of Brisbane Council Members;

I support the position of the Planning Commission with regards to housing on the Bay Lands. I served on the Open Space and Ecology Commission for the City of Brisbane and participated in the study of the EIR. Brisbane should not be bullied in putting housing on a Brown Site that is also seismically unsound. I did the report on Seismicity of the site which is composed of unstable Bay mud cut through with sand banks. In the event of an earth quake, these unconsolidated soils will not stand up to considerable movement. I do not feel San Francisco has any say in the development of Brisbane lands, past dealings with the City & County of San Francisco have not had the best interests of Brisbane in mind, the idea of a giant garbage burner in Brisbane was one such development proposed by SF which would have been a disaster for our city.

I trust that the City Council will listen to their own Commissions and take the correct stand and not be bullied by San Francisco to develop housing in an unsafe environment.

Thank you,
Sean K. Sweeney
City of Brisbane resident since 1975
