Subject:

Honorable Mayor and City council,

I am a long-time resident and voter in Brisbane. I'd like to add my voice to the many others concerned Brisbane citizens who care about our future and want only limited development on the Baylands.

I support the Planning Commission's recommendation. The Renewable Energy Alternative is the only energy-positive plan proposed by citizens-- the so-called "Community Proposed" scenario is not. All of Brisbane will benefit from a solar farm and windmills.

The plan is the only one that will implement our General Plan and our basic community values.

It will help cut down greenhouse gases and slow down climate change.

In few days we will get our electricity from Peninsula Clean Energy and the contaminated Baylands can well be developed as a resource for that clean energy.

Please select the Renewable Energy plan as the best way to protect our future.

Respectfully submitted,

Marja-Leena Nieminen
