Marina News

DREDGING—season over until June, 2016

Our first season of dredging is projected to be over by 9-6-2015, with our entrance channel, fairways to dock 2 (south finger) and all slips on dock one and dock 2, (south finger-south side) dredged to 8 foot depth at mean low water. This is a huge improvement over previous conditions, and the dredgers have done an awesome job at a very challenging task.

Next season, dredging begins in June, 2016 and will go through November. We are moving North from dock 2, south finger (inside fairway) to the very "top" of the docks on dock 6. Going forward, I will be **walking each dock** and looking for boats that are obviously not running. These owners (and *all others*) will be contacted to check if their boat runs, and if not– we will need to know when the boat will be operable and seaworthy. This is VERY important, as this is already a requirement of the City of Brisbane and berth license, but more importantly- when it is time that your boat be moved so we can dredge under the vessel, it is expected that you will be able to accomplish this simple task.

Unfortunately, I discovered during the dredge movement that many vessels are in poor repair and are currently not running. These owners will be required to repair their boats, or their stay at the Marina will be terminated.

WiFi– the installers are proceeding with our electrician to provide 110v power and poles mounted at selected transformers to achieve optimal wireless signal propagation. We are close to operational status. *Thanks for your patience.*

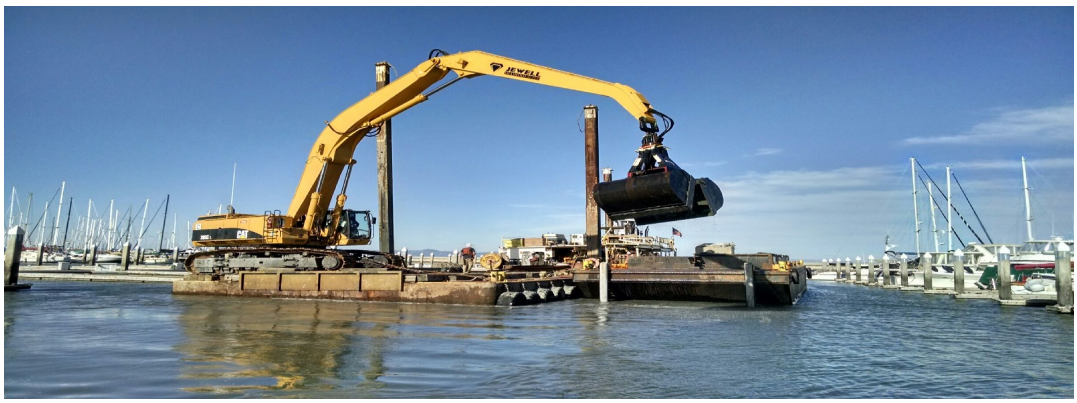

Harbormaster HQ painting is completed, and the building looks awesome. Thanks to our local Brisbane painter, Carmel Kabash and her crew! We will be painting the railings and announcement board outside the office as well.

Thefts and vandalism continue to be an issue. Please remain vigilant of your surroundings when you visit the Marina, immediately report any suspicious people or activity to Brisbane Police and **PLEASE do not let folks onto the docks** when you are passing through the dock gate doors. Although this may feel awkward, you are protecting your boat and the boats of your dock neighbors. Our Public Service Aides continue their patrols of the docks and parking lots, and are here onsite from 7 p.m. to 5 a.m., daily.

Thanks to all who provided us fresh copies of insurance, registration and/or signed a berth license agreement. If you received a letter asking for these items, please respond. Thanks for your help providing us these required items!

Michael Hahn
Harbormaster

Last of the season dredging!

We received a grant for an Oil Spill response boom/trailer– and trained Brisbane Public Works and Marina staff in deploying the important resource with our Marina work boat.

Sierra Point Yacht Club
