Scheduled Water Shutdown

The City of Brisbane Public Works Department will be turning off the water to the following areas on **Tuesday, October 18, 2011 from 6:00 PM to 8:00 PM** in order to make necessary improvements to the local water mains:

100 North Hill Drive Business Park
150 North Hill Drive Business Park
99 North Hill Drive
3240-3280 Bayshore Blvd.

Notices have been hand delivered to all the addresses affected by the temporary water shut down.

This upcoming shutdown will soon be followed by a longer shutdown as the City completes the critical upgrades to the water system infrastructure. The impacted customers will be notified again prior to the second shutdown.

If you have to leave your business after the water has been turned off, please ensure that all your faucets and fixtures are off to prevent the possibility of flooding when the water main is turned back on.

After the water is turned on, you may initially notice some discoloration in your water. This is normal and not a water quality problem. Turn your cold water on for several minutes until it runs clear, and then resume normal use.

If you have any other questions regarding this shutdown, please call Jerry Flanagan in the Public Works Department at 415.508.2130. We apologize ahead for any inconvenience this may cause you.
