

City of Brisbane

Agenda Report

To: City Council via City Manager
From: Administrative Services Director
Subject: Result of Community Survey
Date: October 4, 2010

Purpose:

Provide the City Council the results of the community survey completed this year. Build off of the results of the last survey to determine method for developing and sending out another survey towards the end of this year.

Recommendation:

Receive the report and discuss as appropriate.
Direct staff regarding the next Community Survey.

Background:

Council adopted the 2007-2009 budgets with departmental specific performance measures. Staff has since been attended Governmental Finance Officers Association (GFOA) classes and has done additional readings and research on the topic of performance measurement.

On January 13, 2009 – Council Subcommittee directed staff to develop proposed Community Level Performance Measures.

On February 23, 2009 the Council subcommittee reviewed draft Community Level Performance Measures and made some changes.

On April 6, 2009 Council reviewed the new performance measurement system and provided staff direction to survey the community as part of the upcoming budget process.

The City included a survey in the February Star. Staff has processed the survey results which are attached as part of this staff report.

Discussion:

The City received 189 responses to our survey. 147 were received from the Central Brisbane Area and 42 were received from the Northeast Ridge Area. 9.4% of households within Central Brisbane responded and 9.8% of households on the Northeast Ridge responded. I have attached a summary of the results. The purpose of the survey was to determine how well the community felt the City was doing in meeting its values. The six values which the City Council has set for the City and the community are:

- *Informed - The City will proactively communicate information about services and policies to all in Brisbane. Citizens will receive accurate, timely, and courteous responses to their requests for information and services*
- *Environmentally Progressive - Brisbane will be a leader in setting policies and practicing service delivery innovations that promote environmental sustainability.*
- *Interconnected - Public spaces and facilities are available for community interaction. Cultural and social events bring community members together.*
- *Public Safety - Residents and visitors will experience a sense of safety in all neighborhoods and in all activities*
- *Involved - Brisbane will celebrate the rich diversity of our community by welcoming residents of all ages and cultures and encouraging their civic involvement.*
- *Caring - People receive assistance when needed. Individuals are treated with respect during public forums, opinions and beliefs are freely shared and openly received.*

There were many areas where the City seems to be meeting the values of the community. First and foremost is Public Safety. 90.4% of the respondents do not limit what they do due to safety concerns and 95.7% of the people in Central Brisbane think the wild land fire drills assist the City in being prepared for emergencies. Also the survey results show there is a culture within the City concerning Public Safety as well. A minimal number of people believe any of our departments have a low concern for public safety and the vast majority believe all of departments (Police, Fire, Public Works, and Parks and Recreation) have a high concern for public safety.

Whereas, the City does a good job in providing information about community events (73.9% felt informed and only 3.2% feel uninformed) there is a bigger drop off when it relates to the issues discussed by the City Council. For key issues like Sierra Point Guidelines, the Housing Element, and the General Plan more people felt uninformed compared to informed.

A majority of people do believe the City is Environmentally Progressive as it relates to Preservation of Natural Areas and close to a majority as it relates to Planning of Open Space.

More people have contact with the Police and Parks and Recreation departments than any other departments.

As it relates to the quality of the job performed by staff 91.7% of the people who had contact with staff thought the interaction was professional. Also, 92.4% of the people felt comfortable with sharing their opinion with the staff.

Staff is beginning to develop the survey for the upcoming year. Staff would recommend doing the survey in-house again. The last time the City hired a professional surveying firm the cost was \$18,000. The benefit of a professional firm is people may be willing to provide more "honest" opinions to an outside agency than the City. Also, an outside firm would conduct a more statistically valid survey than was done by the City this last time.

If the Council would like the City to conduct the survey again staff would make a few suggestions to make it more statistically valid. Instead of sending out a survey to all of the households and have response bias I would recommend we conduct a mail survey of randomly selected households to remove the response bias and therefore be able to determine what the margin of error is. We may also want to reduce the number of questions in the survey to reduce the survey fatigue reported by some of the people who responded.

Fiscal Impact:

The cost of the survey was included in the cost of mailing the Star so there was no additional cost for this part of the survey. Since 189 people responded the City did pay about \$1,900 in water credits.
