

November 18, 2008

Mr. Clay Holstine  
City Manager  
City of Brisbane  
50 Park Place  
Brisbane CA, 94005

Dear Mr. Holstine,

My name is Elizabeth Wilson and I am a senior at Terra Nova High School in Pacifica, and a San Mateo County Youth Commissioner. I am writing today because I have been invited to participate in a once in a lifetime journey. Through a program called Sojourn to the Past, I will be traveling, along with about 100 high school students, to the Deep South retracing the Civil Rights Movement of the 1950's and 1960's. I have had the privilege of attending this 10-day trip last year and I look forward to being able to return again this year to further enrich my education. While this trip does follow the Civil Rights Movement, it is not a field trip or a tour—it is an educational experience and a college level course.

Although this is a wonderfully educational trip, it is a life-changing trip as well. When I first heard of the trip I was attracted to it because of my interest in the Civil Rights Movement; however, after hearing more about and attending it I have found many new reasons to return again this coming year. I no longer want to go just to see the places I've learned about—now it is about experiencing history and applying its lessons to my life today. After my experience last year I have quickly come to see that it is one thing to learn about history from a book or a movie, but to actually be in the place where that incredible history occurred, and to be there with the ordinary people that made it happen can do more than teach you about the event, and how it affected history—it can change your life.

This year I'd like to expand my understanding of the Civil Rights Movement and help expand the understanding of other students as well. One of the ways in which I plan to do this is by student teaching on the trip. Through student teaching, I'd like to gain a deeper understanding of the movement—one that I can apply to my life, one I can demonstrate for others in my community when I return, and one that I can apply to my future career in social work. I'm thrilled to have the opportunity to help teach the other students on the trip this year. I hope to inspire them the way I was so greatly inspired by our speakers, and teachers last year.

We will begin the trip in Atlanta, Georgia, and travel through Montgomery, Selma, and Birmingham, Alabama; Hattiesburg, and Jackson, Mississippi; Little Rock, Arkansas; and we will end our trip in Memphis, Tennessee. Each of these cities is a place in which one or more influential events of the Civil Rights Movement have occurred. They are also the sites of memorials and museums. Some of these influential places, memorials, and museums include: the historic King Center, the Civil Rights Memorial, the Edmund Pettus Bridge, 16th Street Baptist Church, Kelly Ingram Park, Central High School, the Lorraine Motel, and the National

Civil Rights Museum. Aside from visiting these influential cities and sites we will also meet noteworthy people from the Civil Rights Movement. John Lewis, Harold and Ellie Dahmer, Vernon Dahmer Jr., Chris McNair, and Minnijean Brown Trickey, and Elizabeth Eckford (two of the “Little Rock Nine”) are a few examples of people we will meet. We are also very privileged to not only have Minnijean as a speaker, but as a guest throughout the trip as well. These speakers are not just there to tell their stories, but also to help teach us about tolerance, forgiveness, courage, civic responsibility and more. These are all things they learned, or were taught, and used throughout their struggles in the Civil Rights Movement.

Of all the people I have learned about from the Civil Rights Movement, the person who inspired me the most was Chris McNair. On September 15, 1963 the 16<sup>th</sup> St. Baptist Church in Birmingham, Alabama was bombed by Klansmen. Over thirty people were injured and four little girls lost their lives. Denise McNair, Chris McNair’s eleven year old daughter, was one of the little girls lost that day. Chris McNair taught me a very valuable lesson. He taught me that no matter how much someone hates and tries to make you hate also, you can never give into it. He taught me that hate, only destroys the hater. His story touched me so much because even though someone took away something so precious to him, he never wanted revenge or retaliation. He only wanted the violence to stop, and prayed for the people who perpetrated the crimes – that they would be free of such hatred. I have taken his message into my life today, and the saying “two wrongs do not make a right” truly has new meaning for me.

The total cost of the trip is \$2,500.00. This fee covers all travel costs, including airfare and charter buses, all food and lodging, entrance to all museums, sites and memorials visited, speaker honorariums, all books and other learning materials, teaching staff, chaperones, security at each hotel, and fees for three college credits.

I hope that you will help me reach my goal of participating in this experience, and would be immensely appreciative of your monetary assistance. Every bit, no matter how small, will help. Should you be able to help, **your contribution is tax deductible (tax identification number #94-3336985)**, and your check should be made out directly to Sojourn to the Past. Please send the check, with my name on a post-it, directly to Elizabeth Wilson, 480 Monterey St, Brisbane, CA 94005, and I will forward it to the Sojourn to the Past office.

Thank you for your consideration. Should you have any questions about the Sojourn to the Past, feel free to visit the official web site at [www.sojournproject.org](http://www.sojournproject.org).

Sincerely,

Elizabeth Wilson

**Ensure that Children/Youth have a voice in matters that affect them by:**

- informing young people at schools about laws that impact them
- creating opportunities for youth to genuinely participate in community-based groups that focus on generating solutions to community issues
- holding frequent youth-lead conferences, fishbowls and discussion groups to solicit youth input
- making opportunities available for youth to interface with those who have decision-making power including elected officials and community leaders
- supporting youth in their efforts to express their political views, from petition writing to meeting with elected officials to political demonstrations

**Ensure Children/Youth have freedom from mistreatment, abuse and neglect by:**

- providing parents/guardians/caregivers adequate financial support so they can care for their children appropriately
- increasing awareness of child abuse, sexual assault and crisis hotlines
- providing competent and accessible school-based counseling and guidance staff that can act as resources and assist in providing appropriate interventions
- holding parents/guardians/caregivers accountable for their own actions in the criminal justice system

**Guarantee that all Children/Youth's needs are met including access to nutritious foods, shelter, clothing, health care and accessible transportation by:**

- encouraging schools to adopt healthy, affordable and enticing lunch menus that include nutritious food options and alternatives to sugary fruit juices
- making public transportation more accessible by providing more bus routes with less frequent stops, more transfers and expanded scheduling routes during the evenings and weekends
- subsidizing healthier foods so children/youth have an incentive to purchase them
- creating opportunities to increase physical activity should be available to school-age children to reduce the number of overweight and obese children\*
- providing financial assistance to help families with healthcare costs

**Provide a safe and healthy environment, including homes, schools, neighborhoods and communities by:**

- offering after-school programs that are engaging and welcoming
- ensuring youth have supportive adults in their lives including parents, mentors, teachers and others in the community
- consistently enforcing school rules so all students feel safe
- developing and implementing youth-run student safety commissions that help school officials enforce rules at school functions such as dances and sporting events.
- providing clean school campuses, especially school bathrooms

**Facilitate the ongoing relationships with caring, trusting and supportive adults by:**

- encouraging agencies that work with volunteer mentors to adequately screen adults to ensure they are genuinely interested
- providing comprehensive training on how to work with young people
- creating opportunities and incentives for adults to mentor young people such as workplace internship programs and more flexible work schedules to allow for employees to mentor during school hours

Youth and Family  
Enrichment Services

## **Youth Commission Policy-Level Recommendations for Peninsula Partnership Leadership Council Bill of Rights for the Children and Youth of San Mateo County**

The San Mateo County Youth Commission\*\* is a group of young people ages 14 to 21 who reside or attend school in San Mateo County. They come together to exchange ideas, work on policy projects, research, advocate youth issues and advise County officials on issues impacting youth. The Youth Commission works to ensure that voices of all youth are represented in San Mateo County. Youth Commissioners attend monthly trainings, Youth Commission public meetings and their County board/commission meetings. The San Mateo County Youth Commission is coordinated through the Youth Development Initiative (YDI), a program of Youth and Family Enrichment Services (YFES). The Youth Commissioners developed the following recommendations to support the articles detailed in the Bill of Rights:

### **Ensure all Children/Youth have a healthy mind, body and spirit that enable them to maximize their potential by:**

- providing youth mental health education and intervention at school sites or adequate access to community resources\*
- directing resources to increase artistic outlets in schools and the community\*
- augmenting mental health services to youth dealing particularly with self harm, sexual abuse and suicidal ideation\*
- providing comprehensive and easily accessible sex education services\*
- instituting annual education on alcohol, tobacco and other drugs, starting in 4th grade\*
- increasing funding for youth who require residential and outpatient substance abuse treatment\*

### **Focus on developing life skills training that will prepare Children/Youth to live independently, be self-sufficient and contribute to their community by:**

- making literacy a community priority
- mandating participation in courses on financial management that include discussions on debt and credit cards
- providing opportunities for the development of leadership skills
- increasing opportunities for the development of youth-adult partnerships so youth can have positive role models and mentors
- making Independent Living Classes (ILP) classes available for all
- providing subsidized Drivers Education classes at all schools
- providing time management classes that discuss balancing school, social and extra curricular activities

### **Ensure all Children/Youth have access to a 21st century education that promotes success in life in future careers and a love of lifelong learning by:**

- creating modern libraries in all communities/neighborhoods
- making vocational training accessible for youth not on a college track
- providing access to up-to-date computers that have necessary tools and software
- creating more after-school programs that expose children/youth to different career possibilities
- encouraging schools to create more elective options that focus on technology and career development
- making scholarships and funding opportunities available for schools to have funding to purchase up-to-date technology
- hiring and retaining qualified teachers

### **Develop employment opportunities for Children/Youth that include protections from unfair labor practices by:**

- providing a consistent standard for youth treatment in the workforce that all companies employing youth must adopt
- retaining a County employee to conduct random inspections to ensure that companies are enforcing child labor laws
- ensuring jobs frequently held by young people pay a living wage, not just minimum wage
- developing and disseminating a best-practice vocational training model to support young people in their efforts to secure employment

## **CALL TO ACTION**

San Mateo County has improved as a community in the way we engage young people. However, enormous opportunities remain to build upon our successes and continue to support youth.

Building assets<sup>1</sup> is not the responsibility of any single segment of our society; individuals, families, organizations, and communities can all take action to embrace a shared responsibility for raising young people. Asset building is a long-term solution that requires long-term commitment.

Specific actions need to be taken by every segment of our society to improve the lives of our young people:

- **Organizations:** Each organization, whether they deal directly with youth or not, has a responsibility to our young people. Policy recommendations, which flow from the data, are included in this report. Adopting 1 or 2 policy changes from these recommendations within your organizational structure and mission would provide enormous forward progress.
- **Individuals:** Each person also has a responsibility to our young people. Table 2 lists a number of simple ways you, in your everyday life, can build assets in youth.

We hope that readers of this report find the information presented here useful as they plan to promote youth development in their communities. A copy of this report can be obtained at the San Mateo County community-wide database residing at this website:

[www.pisinfo.org/healthysmc](http://www.pisinfo.org/healthysmc)

If you have questions about this report, please call Dr. Scott Morrow at (650) 573-2519.

<sup>1</sup>Assets are concrete, common sense, positive experiences and qualities essential to raising successful young people. These assets have the power during critical adolescent years to influence choices young people make and help them become caring, responsible adults. Search Institute's 40 Developmental Assets provide a great framework to discuss and incorporate asset-building into our daily lives. Detailed information can be found at <http://www.search-institute.org/assets.html>.

## INTRODUCTION

This report, an overview on the health status of our youth in San Mateo County, is designed to provide a snapshot of the health of our adolescent population and to make policy recommendations to improve it. It is intended to be used by providers, grant makers, policymakers, young people and their allies to identify areas where improvement can be made and to develop plans for action.

During the 1999-2000 San Mateo County budget hearings, the Board of Supervisors determined the need to develop a strategic plan in support of youth of the county. The Board of Supervisors used data and information from various sources, including the San Mateo County Community Needs Assessment, which suggested that teenage sexuality, drug use, and violence were serious and worsening public health concerns. In addition, the assessment concluded that strategies aimed at reducing these risk factors had not been adequately explored or implemented at the community level. The result of that decision was the first comprehensive look at the status of youth in our county, the San Mateo County Adolescent Report<sup>1</sup>, published in 2001. It utilized data from national and local sources and made three general recommendations:

- 1) Increase the amount and number of sustained adult/child interactions, with the specific goal of having 2 to 3 non-teacher, non-parent adults associated with and regularly in every classroom in San Mateo County.
- 2) Youth should be treated as equals and involved as joint decision-makers in activities and programs that affect them.
- 3) Establish a structure that can help accomplish the first two recommendations.

Since 2001, progress has been made in the above three areas, including enhancement of the Youth Commission and its interaction with other community bodies and organizations; development or strengthening of school-based programs using the asset development model; consolidation of community efforts in support of youth; and the incorporation of youth asset development principles in County initiatives.

---

<sup>1</sup>The 2001 San Mateo County Adolescent report can be found at: <http://www.gisinfo.org/healthysmcs/A-adolescentReport2001.pdf>

## RECENT YOUTH DEVELOPMENT ACTIVITIES IN SAN MATEO COUNTY

Efforts of the Youth Commission were reinforced by training adults to mentor youth placed on boards, as well as through the strategic planning for authentic youth engagement. In addition, the 2005-06 Youth Commission developed and administered a county-wide survey to assess young people's experiences in five areas: alcohol, tobacco and other drugs (ATOD); sex and sexuality; mental health; violence; and discrimination. The results of the survey significantly contributed to the policy recommendations in this report, as well as to the development of special projects for subgroups of youth commissioners. In order to increase community involvement in their efforts, the Youth Commission is holding monthly meetings to elicit additional public feedback beginning in January 2007 (in addition to their regularly-scheduled meetings).

School-based youth development programs and efforts were strengthened by increasing youth leadership in projects that link schools to community in several schools across the county. One such example is the Sequoia Teen Resource Center, where students have developed a Youth Advisory Board and focus their subcommittee work on three issue areas: violence prevention, health and wellness, and ATOD prevention. The Teen Resource Center has also trained peer educators to address specific issues of concern such as health and wellness and reproductive health. The peer educators teach students, as well as, conduct "street outreach" to reach youth in the community. Another example is the STAY Safe Youth Coalition (SSYC) at four high schools in the northern region of the county. The SSYC, sponsored by Asian American Recovery Services, allows youth to actively develop and implement environmental ATOD prevention projects, such as social marketing campaigns and alcohol merchant education.

Community efforts in support of youth were consolidated in many communities across the county. A community that has deliberately brought youth to the forefront of community efforts is East Palo Alto (EPA), where youth are involved in a wide range of community-based organizations in various capacities, such as One EPA's efforts to improve young people's educational outcomes; a community health survey conducted by Youth United for Community Action (YUCA); and a gathering of youth to improve physical fitness through the Get Fit EPA collaborative. Efforts focused on ATOD prevention and school safety through Pacifica's and Half Moon Bay's Friday Night Live Chapters are notable as well.

County initiatives have increasingly incorporated youth asset development principles. Fostering the Future is a collaborative of community-based organizations (Edgewood Center for Youth and YFES), the County Human Services Agency, and San Mateo County Community Colleges, which employs a youth development approach to working with foster and kinship youth. The program's Independent Living Program, housing advocacy and financial literacy courses, focus on helping youth transitioning out of the foster care system in an effort to create stability and support permanence in the county. In April 2006, the Youth Development Initiative, with the collaboration of youth and adults affiliated with County agencies and community organizations, implemented the First Annual Youth Development Week to heighten awareness of the 41 Developmental Assets and youth development efforts.

In an attempt to sustain and build upon the above accomplishments, the 2001 Adolescent Report has also been used by County and community agencies or departments in the development of strategic plans involving issues that affect the lives of young people in San Mateo County, such as: the Blueprint for Prevention of Childhood Obesity; the Roadmap for Alcohol, Tobacco and Other Drug (ATOD) Prevention; the Adolescent Collaborative Action Team's (ACAT) Strategic Plan; AOD Treatment and Prevention Services Strategic Directions 2010; the TANF Council's assessment of youth needs used to influence funding decisions; and the Healthy Community Collaborative.

Notably, in just a few years, we can observe the effects of such improvements in youth asset development. In 2005, San Mateo County was presented with the "100 Best Communities for Youth and Children Award" by America's Promise<sup>2</sup>. This means the County was identified as one that:

- Fosters ongoing relationships with caring adults; parents, mentors, tutors, or coaches;
- Provides safe places with structured activities during non-school hours;
- Facilitates in our youth a healthy start and future;
- Ensures that youth develop marketable skills through effective education;
- Provides youth with opportunities to give back through community service.

All of these successes have not been without their challenges. Unfortunately, our county made the least amount of progress on increasing the amount and number of sustained adult-child interactions (Recommendation 1). This is the most difficult to accomplish and reflects the fundamental shortcomings of our current societal structure.

This report is a prime example of the way in which young people, with adult collaboration, guidance and support, developed a project to make policy recommendations in areas that affect youth in the county. The 2005-06 Youth Commission developed and administered the county-wide survey which assessed young people's experiences. The group also developed the hypotheses (see section on hypothesis development) about the interrelationships between risk behaviors, assets, and life conditions that are supported by data from the survey. The Youth Commission's findings and their resulting policy recommendations are presented here to supplement the latest California Healthy Kids Survey (CHKS) findings for San Mateo County. Methodologies for both the CHKS and the Youth Commission survey are described in the report.

## **ADOLESCENT REPORT 2007 POLICY RECOMMENDATIONS**

Policies intended to increase the health and well-being of adolescents in San Mateo County must be implemented at the individual, school, family and community level. A comprehensive approach is required to change the negative indicators in Mental Health, ATOD, Discrimination, Violence, Sex and Sexuality, and Obesity. These policies are most effective when focused on asset development and when appropriate to the adolescent's gender and racial/ethnic/cultural experience.

### Community Wide Recommendations

#### Replacement of traditional risk reduction models

There is strong evidence that increasing levels of assets reduces all risk behavior. Youth asset development programs, which focus on building assets within young people, need to replace the traditional risk reduction focus in all programs, projects, and educational activities directed at young people.

#### Adult Ally Training

Strengthen knowledge/training of adults dealing with youth on the youth development approach.

#### Policy Making Engagement

Ensure that every board, commission, task force and other public policy-making board have youth representation and an effective youth voice.

#### Law Enforcement Relationships

Law enforcement needs to take extra steps to develop asset-based relationships with youth, especially with minority communities and beginning in elementary school.

#### Mentoring

Support mentoring programs, particularly those involving mentors of color. County departments need to encourage staff to serve as youth mentors and incorporate this activity into their staff members' work schedules.

### The Youth Commission

Support for the Youth Commission needs to be strengthened, especially its ability to intersect with other policy making bodies.

The composition of the Youth Commission needs to reflect the racial, ethnic, geographic and economic diversity of the community.

County departments and city departments need to work closely with the Youth Commission, especially in relation to the Youth Commission's policy priorities.

### Social Marketing

Develop a social marketing campaign, with youth leadership, to educate youth on the critical issues described in this report and what they can do about them in their own communities.

### Age-Appropriate Communication

Increase use of electronic communication (email, text-messaging, listservs, etc.) to educate youth on issues around ATOD, sexual abuse, suicide ideation, self-harm, discrimination, contraception, and nutrition.

### Support Parent Education

Support community/parent education through vehicles such as Family Dinner Night.

### Mental Health Recommendations

Inadequate resources have been directed to youth mental health in general. More specifically:

Inadequate resources have been directed at the issue of self-harm.

Direct more community and school resources to bring attention to, and prevent, self-harm.

The rate of suicidality and self-harm is very high in those who have been sexually abused.

Augment mental health services to youth dealing particularly with self-harm, sexual abuse and suicidal ideation. Additional educational efforts about the lasting harm of sexual abuse must be made. Information about resources for assistance should be widely disseminated.

### Art/Creative Programming, Music or Youth release Stress through artistic outlets

Direct resources to increase artistic outlets in schools and the community.

## Alcohol, Tobacco, and Other Drugs

Alcohol, tobacco, and other drugs play a large part in the lives of our youth.

### *Focus on asset-building strategies to reduce ATOD use*

Promote and increase support for mentoring programs that improve connections between adults and young people.

Support strategies to reduce isolation and increase connected adults in lives of youth, with a particular emphasis on two generations removed.

Support youth-led social marketing campaigns aimed at highlighting positive, healthy norms around not engaging in ATOD use.

Support advocacy against advertising and media promotion of ATOD, especially marketing that targets youth and youth of color.

Improve implementation of evidence-based or results-based prevention programming within school ATOD prevention programs.

### *Reduce access*

Reduce youth access to ATOD from retail sources.

Reduce youth access to ATOD from social sources (home, social events)

Reduce youth access to ATOD from school and other youth-focused settings.

### *Reduce marketing*

Reduce alcohol advertising, sponsorship and sales at major community events.

Develop more activities for youth that are ATOD-free.

Develop a social marketing campaign to counter the image of ATOD use or binge drinking as being fun and making the user feel good.

*For more detailed policy recommendations, priority areas, and objectives on ATOD Prevention, please see San Mateo County's Roadmap for Alcohol, Tobacco and Other Drug Prevention – A Guide for Community Action at: <http://www.smhsa.org/AODplan>*

*For more detailed policy recommendations on AOD Treatment, please see San Mateo County Human Services Agency's Alcohol and Other Drug Services – Strategic Directions 2010 at : <http://www.smhsa.org/AODplan>*

## Sex and Sexuality

Sex is a significant aspect in the lives of youth and must be dealt with realistically.

### Provide accurate education about sex

To reduce adolescent births and STDs, in-depth, age-appropriate education on sexuality (including safer sex, contraception, sexual abuse, rape, and lesbian, gay, bisexual, and transgender issues) should be provided in every school beginning in the 5<sup>th</sup> grade. Although abstinence can be discussed as the only sure method to prevent pregnancy and disease, abstinence-only curricula are ineffective and scientifically disproved. Abstinence-only curricula should not be supported in this community.

### Access to prevention services

For those youth who do not remain abstinent, condoms, counseling and referrals to family planning services need to be available confidentially in all middle and high schools.  
Barriers (physical, financial, scheduling, cultural) to access to family planning services (including contraception, STD and HIV testing, and counseling about sexual abuse and rape) must be eliminated.

### Augment peer counseling

Since youth are more likely to receive information about sex from friends than either parents or schools, resources that enhance peer counseling programs that deal with sexuality issues should be developed and maintained in every middle and high school. These programs should reflect the racial/ethnic diversity of the student body.

## Obesity

Overweight and obesity is a serious and growing threat to the health of our youth.

Opportunities to increase physical activity should be available to school-aged children to reduce the number of overweight and obese children.

All schools and after-school programs need to offer physical activities everyday to every student.

All schools and after-school programs need to offer Physical Education courses to every student (not every day)

Provide training and technical assistance to schools and after-school programs on physical education activities that engage youth.

Support intramural and extramural programs for youth in schools.

### Focus attention on obesity at earlier ages

Guidelines for childcare and pre-school providers about nutrition and physical activity should be developed and implemented.

### Social marketing

Support youth-led social marketing targeting body image, physical activity and healthy eating.

*For more detailed policy recommendations, priority areas, and objectives on obesity prevention in youth, please see Blueprint for Prevention of Childhood Obesity – A Call to Action at: <http://www.SPH.org/blueprint>*

### Discrimination

Racial/ethnic/gender discrimination is prevalent in the lives of youth.

Safety in the home, harassment, and discrimination are primary risk factors for increasing ATOD use, number of sex partners, and self harm.

### Increase understanding of cultural issues and build cultural identity

Support community efforts to build cultural identity among youth of color which address the prevalence of racism, racial discrimination, and positive community approaches to the development of youth in the community.

Support community efforts to increase positive youth-adult interactions.

Support gender-specific and ethnic-specific prevention strategies around building resilience and assets.

### Provide safe forums

Provide safe forums for individual youth to confidentially address these issues (safety in the home, harassment, discrimination, etc.).

### Violence

Violence is prevalent in the lives of youth. Gang involvement is, in a perverse sense, an asset building strategy. Until we understand this completely and develop asset-based interventions, we will not be able to make inroads against gangs.

Firearms are implicated in the majority of injury deaths in the county and represent a large portion of years of potential life lost.

### Provide ample opportunities for young people

Provide adequate mentorship opportunities, safe environments in which to play, and adequate economic hopefulness.

Support community efforts to provide after-school programming for all youth in the community.

Develop an asset-based gang diversion program for youth at risk for gang involvement.

Support youth employment opportunities.

#### **Reduce access to firearms**

Easy access to firearms, especially handguns, must be eliminated.

Each city and county should pass ordinances severely limiting access to firearms by individuals under the age of 25 and other high-risk groups.

## YOUTH COMMISSION POLICY PRIORITIES

The Youth Commission, while presenting the larger set of policy recommendations in this report, has prioritized a subset of these recommendations on which they want to focus their attention. These policy priorities are presented below.

Identified Need	Recommendation	Assets Built
Youth-Police Relationships	More programs for youth and police to interact in a non-threatening, community building capacity.	<ul style="list-style-type: none"> <li>• Other adult relationships</li> <li>• Service to others</li> <li>• Creative activities</li> <li>• Youth Programs</li> <li>• Bonding to school</li> </ul>
Gang Violence Prevention	Opportunities for sports/physical activity More job training programs for youth not on a college course	<ul style="list-style-type: none"> <li>• Other adult relationships</li> <li>• Caring school climate</li> <li>• Youth programs</li> <li>• Achievement and motivation</li> <li>• School engagement</li> <li>• Positive view of personal future</li> </ul>
Self Harm and Suicidal Ideation	Need for mental health education and intervention at school site OR need for access to services	<ul style="list-style-type: none"> <li>• Positive peer relationships</li> <li>• Caring school climate</li> <li>• Creative activities</li> </ul>
Sex education and access to services	Need for comprehensive sex education Services must be accessible: Provide transportation, anonymous, no parental consent.	<ul style="list-style-type: none"> <li>• Positive peer influence</li> <li>• Caring school environment</li> <li>• Restraint</li> <li>• Responsibility</li> <li>• Planning and decision making</li> </ul>
Need for education and better access to ATOD services	Annual education on ATOD, starting in 4 <sup>th</sup> grade. More funding for outreach to inform youth of community services. More funding for youth who need in-patient treatment	<ul style="list-style-type: none"> <li>• Positive peer influence</li> <li>• Community values youth</li> <li>• Restraint</li> </ul>

**Table 2: Five Things You Can Do To Build Assets<sup>3</sup>**

Mobilizing Communities	Organizations <sup>4</sup>	Families	Adults	Youth
1. Talk with leaders, friends, neighbors, and other citizens about the vision and potential for asset building. Share materials that describe the asset-building approach.	1. Present the asset-building concept to employees, constituents, or members in newsletters, workshops, and other forums. Share practical ideas for how they can build assets.	1. Post the list of 40 assets on your refrigerator door. Each day, purposefully nurture at least one asset. Talk to your children about assets and ask them for suggestions of ways to strengthen assets.	1. Look at and greet every child or adolescent you see.	1. Take advantage of interesting and challenging opportunities through youth programs, co-curricular activities, and congregational youth programs.
2. Sponsor community-wide or regional events to talk about asset building and its potential. Invite influential people to the event. Also work hard to include youth, parents, seniors, and other groups.	2. Highlight, develop, expand, or support programs designed to build assets, such as mentoring, peer helping, service-learning, or parent education.	2. Model and talk about-the-values and priorities you wish to pass on to your children.	2. Have a five-minute conversation with a child or adolescent about her or his interests.	2. Post the 40 developmental assets in your room or your locker and discuss them with friends and family.

<sup>4</sup>Various types of organizations can take action – schools, community youth organizations, congregations, businesses, government, healthcare providers, philanthropic foundations, and the media.

## HYPOTHESIS DEVELOPMENT

In developing the survey, the Youth Commission first developed hypotheses that they wanted tested. These hypotheses are presented here. Interestingly, the data supported all the *a priori* hypotheses.

Hypotheses developed by the Youth Commission	What the Youth Commission survey data suggests
Mental Health	
<b>Hypothesis 1:</b> Youth who have been abused or raped are more likely to harm (or think about harming) themselves than those not abused.	The data support the hypothesis.
<b>Hypothesis 2:</b> Youth who have been a target of discrimination are more likely to harm themselves or think about harming themselves than those not experiencing discrimination.	The data support the hypothesis.
<b>Hypothesis 3:</b> Youth who harm themselves are less likely to have emotional support & non-violent ways to deal with conflict than those who do not harm themselves.	The data support the hypothesis.
<b>Hypothesis 4:</b> Youth who do not have emotional support or stress outlets are more likely to contemplate suicide than those who have support/outlets.	The data support the hypothesis.
<b>Hypothesis 5:</b> Youth who have mental health problems are more likely to have thought about/attempted suicide than youth who do not.	The data support the hypothesis.
<b>Hypothesis 6:</b> Youth who know of suicide prevention programs are less likely to harm themselves than those who do not know about these programs.	The data support the hypothesis.
<b>Hypothesis 7:</b> Youth in a bad mental state (i.e. those who have thought about and/or attempted suicide or self harm) are less likely to have adequate stress relief than those not in a bad mental state.	The data support the hypothesis.

<i>Alcohol, Tobacco, and Other Drugs</i>		
<i>Hypothesis 1:</i> Youth who have mental health problems are more likely to drink than those who do not have mental health problems.	The data support the hypothesis.	
<i>Hypothesis 2:</i> Youth who are uninformed about substance abuse issues are more likely to abuse drugs than those who have received such information.	The data support the hypothesis.	
<i>Hypothesis 3:</i> Gang members are more likely to drink than non-gang members.	The data support the hypothesis.	
<i>Hypothesis 4:</i> Youth in a bad mental state (i.e. those who have thought about and/or attempted suicide or self-harm) are more likely to use drugs than those not in a bad mental state.	The data support the hypothesis.	
<i>Hypothesis 5:</i> Youth who use ATOD will have different ideas about what is effective substance abuse prevention than those who do not use ATOD.	The data support the hypothesis.	
<i>Sex and Sexuality</i>		
<i>Hypothesis 1:</i> Youth who are pressured to have sex are more likely to become sexually active than those who are not pressured.	The data support the hypothesis.	
<i>Hypothesis 2:</i> Youth who feel pressure to have sex are less likely to use birth control than those sexually active but not pressured.	The data support the hypothesis.	
<i>Hypothesis 3:</i> Youth who receive sex education are more likely to make informed decisions about sex than those without sex education.	The data support the hypothesis.	
<i>Hypothesis 4:</i> Youth who lack knowledge about sex will be more likely to have had sex than those with more knowledge.	The data support the hypothesis.	

<b>Hypothesis 5:</b> Youth who practice safe sex are more likely to have received good sex information and have a caring environment than those who did not practice safe sex.	The data support the hypothesis.
<b>Hypothesis 6:</b> Youth with knowledge / access to community resources are more likely to have safe sex than those without resources.	The data support the hypothesis.
<b>Hypothesis 7:</b> Drug users are more likely to have sex than youth who do not use drugs.	The data support the hypothesis.
<b>Discrimination</b>	
<b>Hypothesis 8:</b> Youth who have experienced and/or inflicted violence are more likely to be sexually active than those who are not.	The data support the hypothesis.
<b>Hypothesis 1:</b> Youth who have mental health problems are more likely to be a target of discrimination than youth who are not mentally ill.	The data support the hypothesis.
<b>Hypothesis 2:</b> Youth experience discrimination at school based on sexuality.	The data support the hypothesis.
<b>Hypothesis 3:</b> Youth think schools aren't doing enough to discourage discrimination.	The data support the hypothesis.
<b>Hypothesis 4:</b> Youth who feel pressure to hide their sexual orientation are less likely to effectively deal with conflicts than those who do not feel pressure to hide their sexual orientation.	The data support the hypothesis.
<b>Hypothesis 5:</b> Youth who have experienced discrimination will have different views about how schools should promote tolerance than youth who have not.	The data support the hypothesis.
<b>Violence</b>	
<b>Hypothesis 1:</b> Gang membership differs by where youth live.	The data support the hypothesis.

<b>Hypothesis 2:</b> Youth who do not get emotional support are more likely to join gangs than those with emotional support.	The data support the hypothesis.
<b>Hypothesis 3:</b> Youth who have mental health problems (i.e. those who have thought about and/or attempted suicide or self harm) are more likely to be in a gang than those without these problems.	The data support the hypothesis.
<b>Hypothesis 4:</b> Boys and non-whites are more likely to be gang members than whites and girls.	The data support the hypothesis.
<b>Hypothesis 5:</b> Youth who do not have positive ways to reduce stress will engage in riskier behavior than those with positive stress relief.	The data support the hypothesis.
<b>Hypothesis 6:</b> Youth with access to a gun are more likely to carry a gun and be prone to violence than those without gun access.	The data support the hypothesis.
<b>Hypothesis 7:</b> Youth who drink (especially binge) or abuse drugs are more prone to violence than those who do not drink (or drink less).	The data support the hypothesis.
